Summary

The present report contains the budget performance and the budget for the Regional Service Centre in Entebbe, Uganda (RSCE) for the period from 1 July 2024 to 30 June 2025 and 1 July 2026 to 30 June 2027, respectively.

During the 2024/25 period, RSCE delivered administrative, financial, procurement, logistical and information technology services and provided support to liquidating and closed client entities.

During the 2026/27 period, RSCE will deliver on its expanded mandate and assume responsibility for the provision of services to 33 active client entities, including itself, following the integration of 16 clients from the Kuwait Joint Support Office. The Centre will also continue to provide support to liquidating and closed entities. Furthermore, the Centre will contribute to the UN80 Initiative of the Secretary-General by supporting the consolidation of payroll services under the Department of Operational Support. These initiatives are anticipated to yield cost savings, efficiencies and improved effectiveness through streamlined administrative processes and service consolidation.

Following a scalability review for non-transactional services, a new staffing model for these services (by function, with reference ranges) is applied to the budget proposal of RSCE for the 2026/27 period.

Financial resources

In the 2024/25 period, RSCE incurred $48.0 million in expenditure, representing a resource utilization rate of 100 per cent, compared with $43.5 million in expenditure and a resource utilization rate of 99.7 per cent in the 2023/24 period.

The full budget utilization reflects the net impact of the increased requirement for civilian personnel, attributable primarily to higher common staff costs and staff assessment for international staff, and lower actual vacancy rates and retroactive salary increase for national staff, offset by reduced requirements for operational costs attributable primarily to the reprioritization of resources to civilian personnel resulting in lower expenditure mainly under facilities and infrastructure, communications and information technology and other supplies, services and equipment.

The budget proposed for the 2026/27 period in the amount of $45.2 million represents a decrease of $1.0 million, or 2.2 per cent, compared with the apportionment of $46.2 approved for the 2025/26 period.

The estimates for the 2026/27 period reflect reduced requirements for civilian personnel, attributable primarily to the net reduction of 13 posts under international staff and the application of a higher vacancy rate and a lower common staff costs rate for international staff, offset in part by the net increase of 23 posts under national staff, the establishment of 3 general temporary assistance positions, the higher salaries for international and national staff and the impact of currency fluctuation between the Ugandan shilling and United States dollar.

(Thousands of United States dollars; budget year is from 1 July to 30 June)

The actions to be taken by the General Assembly are set out in section IV of the present report.

I. Mandate, results achieved and planned outcome

A. Mandate

1. The Regional Service Centre in Entebbe, Uganda (RSCE), was established in July 2010, by the General Assembly in its resolution 64/269, as a shared service centre for missions in the region under the global field support strategy.

2. In its resolution 69/307, the General Assembly decided to give RSCE operational and managerial independence and requested that the Secretary-General submit a budget proposal for the Centre for the period from 1 July 2016 to 30 June 2017, to be charged against the client missions.

3. The Regional Service Centre was established to enhance efficiency and effectiveness by centralizing logistical, administrative and financial services for field missions in Africa. The Centre's mandate was expanded to provide additional services to other entities, as well as to develop broader cooperation with regional organizations, such as the African Union, following the adoption by the General Assembly of its resolution 78/294.

4. This centralization eliminates duplication and bottlenecks and supports process integration, specialization and standardization. These strategic objectives have been consistently upheld throughout the 2024/25 performance period and will continue to be a cornerstone of the proposed budget for 2026/27.

B. Budget implementation for 2024/25

5. During the 2024/25 period, the Regional Service Centre provided a full range of transactional services to 17 clients in the areas of human resources, finance, travel, movement of personnel and cargo, procurement, and information and communications technology (ICT) support. These included six peacekeeping mission, nine special political missions and the United Nations Office to the African Union, as well as the Centre itself.

6. Table 1 lists the client entities to which the RSCE provided a full range of transactional services during the performance and the current period, as well as the expanded number of client entities for the 2026/27 period.

Table 1
Client entities of the Regional Service Centre

Total	**17**	**17**	**33**

7. During the 2024/25 period, RSCE also provided residual post-liquidation support to closed entities, such as the African Union-United Nations Hybrid Operation in Darfur, the United Nations Integrated Peacebuilding Office in Guinea-Bissau, the United Nations Integrated Transition Assistance Mission in the Sudan (UNITAMS), the Office of the United Nations Emergency Ebola Response Coordinator, the United Nations Multidimensional Integrated Stabilization Mission in Mali (MINUSMA), United Nations Mission for Ebola Emergency Response and the United Nations Electoral Observation Mission in Burundi. The Centre processed 11,644 transactions for the liquidation of MINUSMA and UNITAMS during the performance period.

8. The Regional Service Centre provided services to more than 13,198 international and national civilian staff and uniformed personnel. The number of transactions decreased by 5 per cent compared with 2023/24, exclusive of MINUSMA and UNITAMS support, which was covered under separate funding. The Centre made a smooth transition to supporting the United Nations Transitional Assistance Mission in Somalia after the United Nations Assistance Mission in Somalia ended its operations on 31 October 2024 pursuant to Security Council resolution 2753 (2024).

9. The Regional Service Centre abolished 29 positions in line with its scalability model, owing to the MINUSMA and UNITAMS closures, and assumed responsibility from the United Nations Organization Stabilization Mission in the Democratic Republic of the Congo (MONUSCO) for safety and security and ICT services through the transfer of 31 posts.

10. The Regional Service Centre also provided services such as information technology, office space and support for meeting participants and travel, on a cost-recovery basis, to other entities such as the Mine Action Service, the Office of the United Nations High Commissioner for Human Rights, the triangular partnership programme and the Office of Internal Oversight Services (OIOS) in Entebbe.

11. The Regional Service Centre continued regular engagement with key stakeholders. Meetings of the client board and the steering committee were held on 4 and 5 July and on 29 July 2024, respectively. The Centre also continued to conduct regular operational user group meetings with the chiefs of human resources and chiefs of finance and budget.

12. The Regional Service Centre conducted 26 total client engagements: 2 in-person and 24 online. In-person engagements declined owing to financial constraints but remain essential because they enable the Centre to deliver tailored solutions and address operational gaps.

13. As part of its commitment to continuous improvement, RSCE conducted its annual client satisfaction survey, which recorded a 79.34 per cent satisfaction rate, a slight decrease of 0.66 per cent compared with the previous period due mainly to mission closures and the inclusion of telephone billing and cashier services for the first time. To address feedback and strengthen service delivery, the Centre is implementing targeted action plans, enhancing engagements, ensuring proactive communications to resolve issues promptly and improving overall client satisfaction.

14. The Regional Service Centre continued to efficiently provide protocol and liaison services to all clients on the United Nations Entebbe campus, ensuring accurate handling of work permits, dependant passes and personal effects through communication with key government stakeholders. The Centre secured government clearances and tax exonerations, ensuring financial efficiency and compliance. Authorization for the movement of 30 pieces of contingent-owned equipment and 5 troop rotations was obtained. In addition, the Centre facilitated the repatriation of 32 human remains together with the cancellation of passports and death registrations.

15. The Regional Training and Conference Centre continued to support the use of a hybrid online and in-person training to support remote learning. The number of training participants increased from 3,514 in 2023/24 to 6,691 in 2024/25, which included 3,792 participants from RSCE.

Tenant units of the Department of Operational Support and the Department of Peace Operations

16. The budgets of tenant units were transferred to their parent offices under the support account, effective from the 2025/26 period, as approved by the General Assembly in its resolution 79/300. However, for consistency, the 2024/25 performance information is presented in RSCE budget, where they were originally budgeted. From the next period, performance reporting for these entities will be in the context of the support account.

17. The Forward Support and Deployment Hub remained pivotal in regional logistics, delivering multimodal freight forwarding and standby air cargo support to United Nations entities.

18. The Forward Support and Deployment Hub deployed commercial heavy-lift cargo aircraft for MONUSCO and the United Nations Multidimensional Integrated Stabilization Mission in the Central African Republic (MINUSCA). The Hub, in collaboration with United Nations Logistics Base at Brindisi, Italy (UNLB), also oversaw the redirection of MINUSMA purchase orders during its liquidation phase, with only three purchase orders in transit at year end and all bilateral United Nations-owned equipment transfers from MINUSMA completed.

19. A total of 862 containers and 145 vehicles with a book value of $10.5 million were successfully transferred from MINUSMA to MINUSCA, the United Nations Interim Force in Lebanon, MONUSCO, the United Nations Mission in South Sudan, the United Nations Interim Security Force for Abyei, RSCE and UNLB. In addition, the Forward Support and Deployment Hub facilitated the global delivery of 228 vehicles to 19 United Nations entities under the United Nations global vehicle fleet.

20. The Global Procurement Support Section provided acquisition support to clients, managing long-term, strategic systems and mission-specific contracts for diverse commodities and services. It delivered solutions that enhanced regional procurement by leveraging economies of scale, reducing duplication and improving supplier relationships. The Section continued to offer global acquisition support and serve missions in Africa and global clients, as well as support six clients with no procurement capacity (United Nations Regional Office for Central Africa, United Nations Office for West Africa and the Sahel, Cameroon-Nigeria Mixed Commission, Office of the Special Envoy of the Secretary-General for the Great Lakes Region of Africa, United Nations information centres various countries and RSCE.

21. The Global Procurement Support Section also undertook targeted vendor outreach in developing countries to promote competition and obtain best value for money and assisted regional vendors with registration.

Staff movement within and across sections

22. A total of 12 temporary staffing movement actions occurred among sections to address requirements arising from increased workload in service lines, to support the liquidations of UNITAMS and MINUSMA, accommodate parental leave and manage seasonal fluctuations. The closure of missions and transition-related activities required additional support in specific areas. Details of these staffing movements, as requested by the Advisory Committee on Administrative and Budgetary Questions in its report A/77/767/Add.5 (para. 15) and endorsed by the General Assembly in its resolution 77/306, are presented in table 2.

Evacuation of United Nations personnel and dependants from Democratic Republic of the Congo duty stations to Kinshasa through Uganda: impact of Regional Service Centre support

23. The Regional Service Centre ensured operational continuity for MONUSCO and other United Nations entities by coordinating liaison and logistics support that enabled the evacuation of 4,989 personnel and dependants to Kinshasa by way of Uganda. At its peak, more than 1,600 staff arrived in a single day, including 1,111 relocated using commercial buses and United Nations and commercial flights in close coordination with host country authorities and United Nations entities.

24. The evacuation highlighted the RSCE agility in providing unplanned and unbudgeted support to MONUSCO and the broader United Nations system. By rallying its resources, the Centre ensured timely travel, payment of allowances and security and safety support to clients. Those efforts reduced the risk of injury or loss of life, supported business continuity and mitigated the psychological impact of conflict on personnel.

Regional Service Centre support initiatives

25. The Regional Service Centre strengthened its environmental stewardship by preserving existing vegetation, planting trees and expanding the Unite field remote infrastructure monitoring system to the external sites through the integration of new fuel level and fuel flow sensors. It also harvested more than 143,000 litres of

rainwater through solar-powered pumps, reducing a reliance on the municipal water and supporting the United Nations environmental policy.

26. In June 2025, RSCE launched "Sparta", a management platform that tracks and supports the resolution of pending financial transactions, ensuring the accuracy and timely delivery of client entities' financial statements. Sparta is used to monitor more than 17,000 open items worth more than $200 million, covering payroll and accounts payable transactions. Its structured tracking has supported more than 25 finance staff by improving the visibility of open items and accelerating monthly resolution. Efforts are under way to also include accounts receivable open items, creating a unified platform. Sparta was developed following lessons learned from the MINUSMA closure to better manage outstanding open items.

27. The Regional Service Centre developed the Centre of Excellence for Data Analytics and deployed four customized dashboards producing comprehensive, printable key performance indicator factsheets for the United Nations Office for West Africa and the Sahel, the United Nations Support Mission in Libya, the United Nations Office to the African Union and the Cameroon-Nigeria Mixed Commission. These tools monitor an average of 120 mission-specific key performance indicators across operations, resource management, supply chains and service delivery. This initiative supported the vision of the Secretary-General to use data to drive efficiency, effectiveness and innovation, while assisting decision makers in small, less-resourced missions to strengthen transparency and accountability. Once fully adopted, the factsheets will reduce decision-making time significantly for both operational and strategic decisions. While the four supported missions are already seeing benefits, additional engagements are under way with the Office of the Special Envoy of the Secretary-General for the Horn of Africa and the Office of the Personal Envoy of the Secretary-General for the Sudan for similar analytics support.

28. Within the improving service delivery framework led by the Department of Operational Support, RSCE has spearheaded a transformative initiative on onboarding and separation. The Centre led a cross-Secretariat working group of major service providers aimed at modernizing and streamlining this process. This effort targets three core outcomes:

(a) Standardization and interoperability: Priority templates have been harmonized across entities, laying the foundation for consistent and interoperable human resources documentation;

(b) Digital transformation: A new automated, web-based application has been developed to populate all required forms, significantly reducing manual workload. This tool is now in its final testing phase and represents a major step towards digitizing administrative processes;

(c) Operational efficiency and user experience enhancement: The consolidation of forms and automation is projected to reduce completion time by approximately 20 minutes per case, while improving submission accuracy and quality.

C. Planning assumptions and mission support initiatives for 2026/27

29. In the 2026/27 period, RSCE, under the strategic guidance and leadership of the Department of Operational Support, will continue to deliver standardized high-volume transactional services in the areas of logistics, human resources, finance and travel to 33 clients (see table 1) and location-dependent communications and information technology support and security services.

30. The Regional Service Centre will also strengthen risk management by updating its risk register and manage risks associated with its transformation into a global service centre, including financial constraints, operational changes, and geopolitical and other challenges that could have an impact on service delivery. The risk management and compliance committee chaired by the Director will continue to evaluate mitigation strategies, monitor progress and implement recommendations from oversight bodies. The Centre will manage a broader and more diverse clientele while continuing to respond rapidly to changing geopolitical and emergency situations. Through its Secretariat-wide networks and proven experience, the Centre will support the business continuity of its clients during disruptions, including evacuations and airspace closures.

31. During the 2026/27 period, RSCE will continue to support its clients through all stages of their life cycles, including operationalization, stabilization, drawdown, closure, liquidation and post-liquidation, and will provide residual administrative liquidation support for the closed entities (see para. 7 above).

32. Effective 1 July 2026, RSCE will assume responsibility for the provision of residual liquidation support to the United Nations Investigative Team to Promote Accountability for Crimes Committed by Da'esh/Islamic State in Iraq and the Levant, whose mandate was terminated by the Security Council in its resolution 2697 (2023), as from 17 September 2024, and the United Nations Assistance Mission for Iraq (UNAMI), whose mandate was terminated by the Council, in its resolution 2732 (2024), as from 31 December 2025. Both missions are served by the Kuwait Joint Support Office and are making the transition to the Centre for residual activities.

33. The activation of contingency plans in the 2025/26 period across peacekeeping missions in response to financial constraints has resulted in increased workload for RSCE, most notably within the Benefits and Payroll Section, which experienced a sharp rise in separation cases (more than 1,500 within three months) and was required to provide heightened support to clients. As missions continue to experience further staff reductions and diminishing in-house administrative and human resources capacity, these increased operational demands are expected to persist into the 2026/27 period.

Planned efficiencies and cost reductions

34. As part of the UN80 Initiative and the revised estimates relating to the proposed programme budget for 2026 and the support account for peacekeeping operations for the 2025/26 period (A/80/400, paras. 32–39), the consolidation of payroll services was approved by the General Assembly in its resolution 80/242. It is proposed that 17 of the 25 payroll posts in RSCE be transferred to the Department of Operational Support under the support account, while administrative support will continue to be provided by the Centre. This proposal involves the cost-neutral change in the budget presentation from the Centre to the support account and the reporting line of the 17 posts from the Centre to the Department, while the location of the posts remains in Entebbe. These 17 posts will compose a new global payroll centre in addition to the centres in New York and Nairobi.

35. Following the adoption by the General Assembly of its resolution 78/294, RSCE will lead the consolidation of administrative and financial services, excluding payroll, for 16 active clients[1] of the Kuwait Joint Support Office.

36. The Regional Service Centre was identified as the preferred service provider for Kuwait Joint Support Office clients on the basis of its mandate to provide services, experience in peace operations, scope and scale of services and costs. It had an established performance management framework, client service model and governance structure, together with a demonstrated agility in responding to field-related emergencies. Savings will be created through economies of scale by leveraging existing managerial and governance structures, applying best practices and technological innovation from both the Centre and the Office, refining the Centre's staffing structure and optimizing staffing levels through the transactional and non-transactional scalability models.

37. On the basis of the application of the transactional and non-transactional scalability models, an additional 44 service staff and 1 management staff are required to support the workload related to Kuwait Joint Support Office clients, which takes into account closures of UNAMI, payroll transferring to the Department of Operational Support and a projected decrease in mission staff strength, offset by the provision of core services to the United Nations Interim Administration Mission in Kosovo and the United Nations Peacekeeping Force in Cyprus. Savings in personnel costs due to the transfer of services from the Office to RSCE would be approximately $2.8 million.

38. Taking into account the consolidation of payroll (decrease of 25 posts) and the reduction based on the scalability model for reduced personnel in existing client missions, as well as service line restructuring (decrease of 10 posts), the transactional model yields a net increase of 9 transactional posts. In addition, three general temporary positions are required to support the liquidation and residual activities of UNAMI.

39. The Regional Service Centre has also applied a new non-transactional model in its budget formulation for the 2026/27 period covering offices that are not part of the existing transactional model, such as the office of the Director and the Deputy, including the Safety and Security Unit and the Regional Field Technology Service. The integration of a non-transactional scalability model will enhance budgetary transparency, resource alignment and operational agility. Further details are provided in paragraphs 62 to 65 below and in annex II to the present report.

40. In line with General Assembly resolutions 70/286 and 76/274, RSCE has continued to advance the nationalization of posts, supporting the professional growth of the local workforce and strengthening long-term sustainability. Consequently, the

[1] The Regional Service Centre will provide core services to the United Nations Assistance Mission in Afghanistan, the United Nations Regional Centre for Preventive Diplomacy for Central Asia, the Office of the Special Envoy of the Secretary-General for Yemen, the Office of the Special Envoy of the Secretary-General for Syria, the United Nations Mission to Support the Hudaydah Agreement and the United Nations Integrated Office in Haiti, as well as the United Nations Interim Administration Mission in Kosovo and the United Nations Peacekeeping Force in Cyprus, which were receiving non-core services under the Kuwait Joint Support Office. The United Nations Interim Force in Lebanon, the United Nations Disengagement Observer Force, the United Nations Truce Supervision Organization, the United Nations Military Observer Group in India and Pakistan, the Office of the United Nations Special Coordinator for the Middle East Peace Process, the Office of the United Nations Special Coordinator for Lebanon, the United Nations Verification Mision in Colombia and the United Nations Logistics Base will receive non-core services effective 1 July 2026.

ratio of international to national staff is expected to reduce, generating direct savings of $945,000.

41. Cost savings related to efficiencies and restructuring have also been included in the transactional scalability model outcomes. These efficiencies stem from the efforts of RSCE to review processing times that captured decreases, new dashboards, updates to workflows and the restructuring of the claims service line. These changes are estimated to have resulted in a decrease of seven posts and savings of $498,200.

42. The Regional Service Centre proposes additional cost reductions in discretionary non-post expenditure in official travel by utilizing virtual training and reducing travel.

43. Further details of efficiencies and cost savings are provided in the section on efficiency gains (see below).

Support initiatives

Client service

44. The Regional Service Centre will integrate the 16 new clients transferred from the Kuwait Joint Support Office in a phased implementation approach. The Centre employs a hub-and-spoke methodology to enhance service delivery by centralizing core functions at the Centre and extending complementary support through decentralized units in the missions. The model is structured around a tiered system that ensures clarity in roles and promotes efficient query management. The Centre will continue to provide first-line client support for payroll-related activities to all clients under its purview. Effectiveness will be measured through the client satisfaction survey and tracked against established key performance indicators.

45. The Regional Service Centre will pilot a client-facing chatbot to support the real-time resolution of routine queries and enhance client responsiveness. The pilot will be rigorously evaluated against defined guardrails for privacy, auditability and service quality. This initiative will reduce resolution times, improve client experience and ensure that complex or sensitive matters are escalated seamlessly to designated physical agents.

Communications and information technology

46. During the 2026/27 period, RSCE will implement a strategic technology plan emphasizing reliable, cost-effective and secure connectivity, as well as hybrid-cloud platforms and enhanced ICT security through a zero-trust framework, ensuring seamless operational continuity and process automation. Anticipating a surge in demand from both new and non-traditional clients, including the African Union and Department of Safety and Security offices, the Regional Field Technology Service is committed to enhancing scalable network capacity, securing interconnects, developing training platforms and improving service management.

47. The Regional Service Centre is also advancing the use of artificial intelligence and automation, leveraging available tools for tasks such as document drafting and financial anomaly detection. It will continue to provide training and support while ensuring stringent data protection through sanctioned artificial intelligence channels. Network and security infrastructure will be strengthened, with servers and storage upgraded only where cloud solutions are not viable. Pilot projects for counter-unmanned aerial system training, 3D printing, the Internet of things and extended reality technologies will guide future expansion. The Centre will prioritize the development of in-house talent in areas such as cyberengineering and data expertise, ensuring that it stays at the forefront of technology.

Data analytics

48. Building on the progress of the Centre of Excellence for Data Analytics initiative (see para. 27 above), RSCE will offer to extend its analytical support to Kuwait Joint Support Office client entities.

Automation

49. To reinforce financial controls, RSCE will continue to enhance Sparta, which is being deployed to various service lines and which has already contributed to decreased processing times and the expanded visibility of open items. Cashiering workflows such as cheque receipt processing will be fully digitized and the adoption of a bank messaging interface will enable integration with Umoja to support automated updates and timely receipt matching. Collectively, these efforts are expected to lower payment rejection rates, result in fewer items aged more than 90 days and improve the timeliness of accounts receivable collections.

Quality management systems

50. The Regional Service Centre is pursuing ISO 9001:2015 certification to strengthen operational excellence and continuous improvement. This initiative will enhance credibility and stakeholder confidence, align the Centre's quality management framework with internationally accepted standards, improve efficiencies, strengthen risk management and reinforce accountability and client satisfaction.

Governance structure

51. The Regional Service Centre will continue to foster a client-centric environment by integrating new clients into existing governance structures, including its user group, client board and risk management committee, to promote inclusive decision-making and transparency. Through the utilization of established structures, the Centre will continue to analyse key performance indicators, identify service delivery challenges and support strategic action plans.

Structure of the Regional Service Centre

52. Given that RSCE will transfer payroll services to the Department of Operational Support and realign its structure, changes in the Centre's internal structure are proposed in order to create efficiencies, as follows:

(a) The Benefits and Payroll Section, comprising the international staff benefits and payroll service line, the onboarding and separation service line, the uniformed personnel benefits and payroll service line and the national staff benefits and payroll service line, will reflect the removal of payroll services. Following this change, the Section will be renamed the Benefits and Entitlements Section, reflecting more accurately the services offered, and the international and national staff benefits and payroll lines will be renamed the international benefits and entitlements service line and the national staff benefits and entitlements service line, respectively;

(b) The uniformed personnel service line, located in the Benefits and Payroll Section, will be renamed the affiliated personnel service line. Affiliated personnel refer to individuals who are associated with, but are not directly employed by, the Organization. In addition to transactions for uniformed personnel, the management of contractors from other lines will be consolidated under the newly created service line;

(c) To optimize end-to-end processing of travel and affiliated personnel transactions, including claims, RSCE will integrate claims processing into existing service lines by leveraging automation efficiencies. This restructuring will eliminate the claims service line, resulting in the abolishment of the service line manager (Finance Officer (P-4)) position.

53. Table 3 provides information on the services to be provided by RSCE.

Table 3
Services to be provided by the Regional Service Centre

Portfolio	*Service*	*Mission*
Administrative functions comprising human resources, finance and travel services for all personnel	• Onboarding and separation services: check-in/ check-out, offer management, assignment grants, relocation grants and separation entitlements • Benefits and entitlement services: allowances and recoveries for international payroll, leave entitlements, dependency allowance, installation of dependants, rental subsidies and deductions, other entitlements, contract extensions, travel requests, and time and attendance for rest and recuperation for entitlement travel • Travel and claims services: lump-sum transactions, ticket quotations and issuances, daily subsistence allowance advances, travel claims and expense reports • Financial services: bank reconciliations, processing of cost recoveries and debit advice, general ledger maintenance, monthly and year-end financial reporting, value-added taxes and excise duty claims, accounting for assets under construction, coordination of liquidation support for residual functions transferred to the Centre, internal controls and compliance monitoring, third-party claims, Umoja role mapping, cashier services and payments to vendors	All client missions receiving full services, the Centre itself, Department of Operational Support units (Global Procurement Support Section, Forward Support and Deployment Hub and global payroll team), Department of Peace Operations military planning officers and other supported entities in the Entebbe campus (Integrated Training Service, OIOS, Mine Action Service and Office of the United Nations Ombudsman and Mediation Services)
	• Cashier services	All Secretariat entities using house banks that are managed by the Centre
	• Maintain banking details for all personnel and vendors	All client missions, including the Centre and Department of Operational Support units and Department of Peace Operations military planning officers, as well as other supported entities in the Entebbe campus
Education grant and off-cycle payments for international staff	• Education grant services: education grant advances and claims	All client missions, including the Centre and Department of Operational Support units and Department of Peace Operations military planning officers

Portfolio	*Service*	*Mission*
Allowances processing for affiliated personnel	• Payment of monthly subsistence allowances, advances and final payments for affiliated personnel, and daily allowances and recreational leave allowances for contingents	All client missions receiving full services, including the Centre
Client support	• iNeed/client query and call centre management, and client relationship management	All client missions, including the Centre, Department of Operational Support units and Department of Peace Operations military planning officers
Regional Training and Conference Centre	• Training/conference facilities, technical and administrative support to training/conferences, transportation and reproduction of training materials	All client missions and all other entities, including non-Secretariat entities on as-needed basis
Travel for training participants	• Provision of travel support inclusive of tickets and daily subsistence allowance payments, where applicable, to training participants	Triangular partnership programme, Office of the United Nations High Commissioner for Human Rights and other entities, upon request
Regional Field Technology Service	• Telephone billing and operational support	All client missions receiving full services, including the Centre, OIOS, the Office of the United Nations Ombudsman and Mediation Services and the Mine Action Service
	• Provision of ICT support, Internet and information technology helpdesk services	The Centre and entities in the Entebbe campus (Global Procurement Support Section, Forward Support and Deployment Hub, military planning officers, global payroll team, MONUSCO, MINUSCA, United Nations Mission in South Sudan, United Nations Interim Security Force for Abyei, Integrated Training Service, OIOS, Mine Action Service and Office of the United Nations Ombudsman and Mediation Services)
Security and safety	• Security measures for the safe and secure conduct of activities of United Nations personnel	The Centre and entities in the Entebbe campus (as above) plus ad hoc support to other United Nations entities in Uganda
Protocol	• Implementation of host country agreements	The Centre and entities in the Entebbe campus (as above)
Property management services	• Provision of office space and general and ad hoc maintenance services	OIOS and the Mine Action Service
Umoja tier 2b human resources service desk	• Monitoring and consistent implementation of human resources policies, practices and procedures in Umoja	Services are provided both to human resources practitioners within the

Portfolio	Service	Mission
	• Support for the final separation process, especially for liquidating and downsizing missions, by advising human resources partners of the Centre and client missions • Analyse time and attendance records • Mitigate organizational risk by conducting quality checks and audits to strengthen compliance	Centre and as human resources technical support to client entities

Transactional scalability model

54. The Regional Service Centre has applied the use of its transactional scalability model for budget formulation in the 2026/27 period. The scalability model is focused on transactional elements and considers a full-time equivalent analysis, projecting processing time and projected annual volumes, considering the projected authorized headcount for the client entities in the 2026/27 period. The model was built using a zero-based staffing concept and remains fully scalable. It focuses on the core transactional and direct service delivery component of the Centre's service lines, which provide services to client missions within the administrative areas of human resources, finance, client services and travel, excluding offices of chiefs and non-transactional offices. Transactional services included are onboarding and separation, international and national benefits and entitlements, affiliated personnel, travel, claims and education grant services, cashier services, accounts payable, internal controls, accounting and financial reporting, Umoja human resources service desk (tier 2b) support and client services.

55. A key update to the model for the 2026/27 period includes the removal of payroll-related transactions, resulting in the reduction of 25 full-time equivalents. In addition, the integration of process efficiencies and the consolidation of claims processing into other service lines, as mentioned in paragraph 41 above, together with the projected reductions in authorized positions of client missions (based on the revised estimates for special political missions for 2026 (A/80/400) and a projected 10 per cent reduction for peacekeeping missions) resulted in a further reduction of 10 full-time equivalents.

56. At the same time, the transfer of Kuwait Joint Support Office clients will increase the RSCE transactional workload. To ensure the continued delivery of comprehensive services to this client base, 44 additional transactional positions are required (see para. 37 above). Consequently, the Centre projects a net increase of nine transactional positions in 2026/27 to ensure the Centre's capacity to deliver seamless, high-quality support to existing and new clients.

57. The scope of the transactional scalability model excludes executive direction and management and the Regional Field Technology Service. A separate staffing projection model has been introduced for non-transactional functions, as explained in paragraphs 62 to 65 below and detailed in annex II.

Transactional scalability methodology

58. The 2026/27 transactional scalability model is adjustable for projected staffing changes in client entities, deriving a multiplier on the basis of staff category shifts from 2024/25 to 2026/27. Table 4 presents the multipliers used to project transaction volumes in 2026/27.

Table 4
Scalability model multipliers

ID	*Multiplier description*	*Percentage change (2024/25–2026/27)*	*Multiplier (2026/27)*
A	All staff	1.1	1.011
B	International staff only – core clients	2.7	1.027
B+	International staff only (includes core and non-core clients)	19.5	1.195
C	National staff only	14.8	1.148
D	Affiliated personnel only	(12.9)	0.871
E	Number of client entities served	47.1	1.471
F	Number of client entities served, including liquidated missions	45.5	1.455
G	Number of peacekeeping client missions served	33.3	1.333
X	No volume multiplier	0.0	1.000

Scalability model assumptions

59. To calculate full-time equivalents for each service, the total annual volume was determined relative to the average processing time per transaction. The resulting time was divided by the number of productive days per year and the number of productive hours per day.

60. Productive days per year: A total of 203 productive days per year was calculated as follows:

- 52 weeks x 5 working days = 260 working days
- 10 United Nations holidays
- 30 annual leave days
- 5 days for professional development, as mandated in the Secretary-General's bulletin on the learning and development policy (ST/SGB/2009/9)
- 5 days for training on various Umoja roles and functionalities to ensure operational effectiveness, including mentorship (mentee and mentor requirements), training to acquire roles in Umoja and time required to learn new or changed policies or processing platforms and systems
- 7 uncertified sick leave days

61. In terms of productive hours per day, the RSCE working hours are from 8.30 a.m. to 5.30 p.m., and staff are expected to take a one-hour lunch break, effectively enabling an eight-hour workday. Consideration has been given to time required for meetings, personal administration and effective collaboration among teams. Therefore, seven hours of effective transactional productive time have been considered per day.

Table 5
Transactional scalability model results

Service line	Staffing requirements summary 2025/26 Approved	2026/27 Projected	Variance

	Uniformed	–	–	210	100.0
Total		–	–	**2 513**	**100.0**

[a] Only education grant services will be transferred to the Regional Service Centre.
[b] General temporary assistance positions in the missions are included starting from the 2022/23 scalability model projections.

Non-transactional scalability model

62. As an extension of the scalability review of the support account, and in response to the legislative requests for UNLB and RSCE, a staffing model (by function with reference ranges) is also applied to the budget proposal of UNLB and the Centre for the 2026/27 period. The model categorized the Centre's non-transactional operations into two functions: management and security and field technology services.

63. The budget proposal of RSCE includes changes in posts and positions driven by the staffing model, with the 2020/21 period as the baseline, as applied in the revised estimates for the support account for the 2025/26 period. The review also considered changes in scale of operations that may have occurred since the baseline year.

64. The model considers a wide range of possible workload drivers, including drivers related directly or indirectly to the scale of operations, as well as other possible drivers of the support required. The model identifies which workload drivers are relevant for each function and assigns their relative importance in determining support needs. It then generates a reference range formula that indicates how staffing levels for peacekeeping and special political missions should adjust in response to changes in operational requirements. Support staffing requirements are expressed in terms of full-time equivalents, which represent the work of a single person, on average, in a given function. The model and reference ranges apply to all posts and positions in RSCE with non-transactional functions, including contractors in the field technology services.

65. On the basis of the model application, a net change of zero full-time equivalents is proposed in the 2026/27 period (increase of five posts under management and security, offset by a decrease of four posts and one contractor under the field technology services). The summary of the review and implementation of the model is presented in annex II.

D. Regional mission cooperation

66. The Regional Service Centre will continue to provide location-dependent security, information technology and protocol and liaison services to all clients on the campus, including MONUSCO, MINUSCA, the United Nations Mission in South Sudan, the United Nations Interim Security Force for Abyei and the Office of the United Nations Ombudsman and Mediation Services. The Centre will also provide office space, facilities maintenance and property management services, on a cost-recovery basis, to entities such as the Mine Action Service and OIOS. In addition, the Centre offers non-location specific travel and daily subsistence allowance payment services to training participants, on a cost-recovery basis, to entities such as the Office of the United Nations High Commissioner for Human Rights, the triangular partnership programme and telephone billing services to the Office for the Coordination of Humanitarian Affairs in Afghanistan.

67. The Regional Service Centre will continue to engage proactively with the United Nations country team in Uganda and remains a member of the operations management team. The team leads and coordinates unified operations for the United Nations across the country, thereby ensuring that mandated programme delivery is cost-effective, responsive and of high quality. The Director of RSCE, who also serves as the designated area security coordinator for the Entebbe region, will maintain close cooperation with the resident coordinator, who is responsible for the safety and security of United Nations personnel, premises and assets nationwide.

68. The Regional Service Centre will continue to lead the monthly meetings of the area security management team, which include representatives from the Mine Action Service, OIOS, the Department of Safety and Security and MONUSCO, to discuss matters of the safety and security of staff at the United Nations Entebbe campus.

F. Proposed staffing changes

Staffing justifications

69. The Regional Service Centre proposes the following post actions in accordance with the results of the transactional scalability model to achieve operational alignment:

(a) Establishment of 34 posts, as follows: 1 Finance Officer (National Professional Officer), 2 Assistant Finance Officers (National Professional Officer), 3 Travel Assistants (national General Service), 17 Finance Assistants (national General Service) and 11 Human Resources Assistants (national General Service);

(b) Abolishment of four posts, as follows: two Finance Assistants (Field Service), one Finance Budget Assistant (Field Service) and one Finance Officer (P-4), which can also be attributable to the restructuring of the claims service line into the travel service line.

70. As a result of payroll consolidation, RSCE will reduce 25 payroll posts from its current service lines. A total of 17 of these posts (shown as abolished) will be transferred to the support account budget under the Department of Operational Support for consolidation of payroll staff into a single global team. Four of the eight remaining posts (Field Service, comprising three Human Resources Assistants and one Finance Assistant) will be abolished, while four posts (two Finance Officers (Field Service) and two Human Resources Assistants (national General Service)) will be redeployed to take on additional workload in relation to the transfer of Kuwait Joint Support Office clients, as noted in paragraph 71 below. These proposed actions will support business continuity in relevant service lines.

71. The Regional Service Centre proposes the redeployment of 15 posts in accordance with the results of the transactional scalability model necessary to achieve operational alignment, as also shown in table 13:

(a) One Human Resources Officer (P-3) from the International benefits and entitlements service line to the Human Resources and Talent Management Unit;

(b) One Assistant Human Resources Officer (National Professional Officer) from the Human Resources and Talent Management Unit to the International benefits and entitlements service line; one Associate Finance Officer (National Professional Officer) from the national benefits and entitlements service line to the onboarding and separation service line, one Associate Human Resources Officer (National Professional Officer) from the Office of the Chief, Travel, Claims and Education Grant Section to the national benefits and entitlements service line; one Human Resources Officer (National Professional Officer) from the national benefits and entitlements service line to the international benefits and entitlements service line and one Finance Officer (National Professional Officer) from the claims service line to the Office of the Chief, Travel, Claims and Education Grant Section;

(c) One Finance Officer (Field Service) from the national benefits and entitlements service line to the accounts payable service line, one Finance Officer (Field Service) from the onboarding and separation service line to the education grant service line, one Human Resources Assistant (Field Service) from the onboarding and separation service line to the travel service line, two Finance Assistants (Field Service) and one Finance Assistant (national General Service) from the claims Service line to the travel service line, which is also attributable to the consolidation of the claims service line to the travel service line;

(d) One Human Resources Assistant (national General Service) from the International benefits and entitlements service line to the national benefits and entitlements service line, one Human Resources Assistant (national General Service) from the onboarding and separation service line to the national benefits and entitlements service line and one Human Resources Assistant (national General Service) from the national benefits and entitlements service line to the Office of the Chief, Travel, Claims and Education Grant Section.

72. The Regional Service Centre proposes the following post actions in accordance with the results of the non-transactional scalability model necessary to achieve operational alignment:

(a) Establishment of five posts, as follows: one Associate Administrative Officer (P-2), one Contracts Management Assistant (national General Service) and three Field Security Assistants (national General Service). The proposal for the Security Assistants is attributable directly to the increased presence of MONUSCO staff on the United Nations Entebbe campus, while the proposal for the P-2 is attributable to additional workload due to an increase in client missions served as a result of the Kuwait Joint Support Office transfer of services;

(b) Abolishment of four posts in the Regional Field Technology Service, as follows: two Field Service and one national General Service Telecommunications Assistants and one Information Systems Assistant (national General Service);

(c) Redeployment of one Cyber Security Assistant (national General Service) from the Regional Operations Unit to the Regional Information Security and Compliance Unit.

73. The Regional Service Centre proposes nationalization through conversion of one Human Resources Assistant (Field Service) to one Human Resources Assistant (national General Service) and of one (Field Service) Finance and Budget Assistant (Field Service) to one Finance Assistant (national General Service) as part of efforts to advance the nationalization of posts and support a more integrated, sustainable workforce model.

74. Given the expanded responsibilities and increased complexity of financial operations resulting from organizational changes and staff growth, RSCE proposes the reclassification of one Finance and Budget Officer (Field Service) to a Finance and Budget Officer (P-3). A professional post is required to provide the skills and competencies for effective strategic planning, financial analysis and compliance with international standards. This also ensures strong leadership, effective team development and alignment with best practices observed in similar organizations, thereby supporting financial integrity and the Organization’s strategic objectives.

75. Lastly, RSCE also proposes the establishment of three general temporary assistants, namely, one Finance Assistant (national General Service) and 2 Human Resources Assistants (national General Service), to support residual liquidation activities for UNAMI, which will include the processing of entitlements travel and claims, the resolution of customer queries and the closure of open items. These post resources, requested for the 2026/27 period only, will enable the Centre to deliver dedicated support to UNAMI, ensuring that all residual liquidation tasks are completed efficiently and in accordance with organizational standards.

G. Results-based budgeting frameworks[2]

Component: Executive direction and management

Expected accomplishments	*Indicators of achievement*
1.1 Increased efficiency and effectiveness of the Regional Service Centre	1.1.1 Average annual percentage of authorized international posts vacant (2022/23: 11.3 per cent; 2023/24: 10.6 per cent; 2024/25: 11.7 per cent; 2025/26: 7.1 per cent; 2026/27: not applicable)
	1.1.2 Average annual percentage of female civilian staff (2022/23: 56 per cent; 2023/24: 56 per cent; 2024/25: 55 per cent; 2025/26: 50 per cent; 2026/27: 50 per cent)
	1.1.3 Average number of calendar days for post-specific recruitments, from posting of the job opening to candidate selection, for P-3–D-1 and FS-3–FS-7 (2022/23: 97 days; 2023/24: 220 days; 2024/25: 413 days; 2025/26: < 120 days; 2026/27: < 120 days)
	1.1.4 Overall score on the property management performance index, based on 20 underlying key performance indicators (2022/23: 1,911; 2023/24: ≥ 1,909; 2024/25: 2,000; 2025/26: ≥ 1,800; 2026/27: ≥ 1,900)
	1.1.5 Event requests received by the Regional Training and Conference Centre that receive a response within 24 working hours (2022/23: 93 per cent; 2023/24: 90 per cent; 2024/25: 87 per cent; 2025/26: ≥ 95 per cent; 2026/27: ≥ 95 per cent)
	1.1.6 Number of personnel working files managed by the Archives and Records Management Unit (2022/23: 17,520; 2023/24: 17,628; 2024/25: 17,821; 2025/26: 20,000; 2026/27: not applicable)
	1.1.7 Documents retrieved and provided within 24 working hours of the request (2022/23: not applicable; 2023/24: not applicable; 2024/25: 100 per cent; 2025/26: 90 per cent; 2026/27: 95 per cent)

[2] The results-based budgeting outputs are available for consultation on the Umoja Analytics platform as part of efforts to streamline the volume of information presented in the new combined budget and performance report.

Expected accomplishments	*Indicators of achievement*
	1.1.8 Deviation from demand plan in terms of planned quantities and timeliness of purchase (2022/23: 5.78 per cent; 2023/24: 4 per cent; 2024/25: 24 per cent; 2025/26: ≤ 10 per cent; 2026/27: ≤ 10 per cent)
	1.1.9 Liaison services requests received and processed to the point of host Government approval within 20 working days (2022/23: not applicable; 2023/24: 100 per cent (acted upon within 10 working days); 2024/25: 100 per cent (acted upon within 10 working days); 2025/26: 100 per cent; 2026/27: 100 per cent)
	1.1.10 Monitoring and reporting on the compliance with the requirement to purchase tickets 16 calendar days or more in advance of travel (2022/23: 46 per cent; 2023/24: 75 per cent; 2024/25: 100 per cent; 2025/26: 100 per cent; 2026/27: 100 per cent)

Component 1: Benefits and Entitlements Section

Expected accomplishments	*Indicators of achievement*
2.1 Effective and efficient onboarding and separation services to international staff in client missions	2.1.1 Completion rate for processing onboarding cases received within 70 calendar days and within 120 calendar days (2022/23: 81 per cent/98 per cent; 2023/24: 83 per cent/97 per cent; 2024/25: 85 per cent/98 per cent; 2025/26: 90 per cent/100 per cent; 2026/27: 90 per cent/100 per cent)

Indicator Target	100%	100%	100%	100%	100%

11.2 Operational and strategic requirements are aligned through enhanced skills among civilian and uniformed personnel in the Regional Service Centre and in Centre client missions	11.1.2 Overall participants satisfaction with the Regional Field Technology Service capacity-building and training programmes (2022/23: 82 per cent; 2023/24: 80 per cent, 2024/25: 80 per cent; 2025/26: 80 per cent; 2026/27: 80 per cent)
11.3 Effective and efficient education grant services to clients	11.3.1 Non-expendable assets in stock that have passed their life expectancy (2022/23: 9.6 per cent; 2023/24: 4.36 per cent; 2024/25: 8 per cent; 2025/26: ≤ 10 per cent; 2026/27: not applicable)
	11.3.2 Non-expendable assets in stock in good or fair condition (2022/23: 98.1 per cent; 2023/24: 92.9 per cent; 2024/25: 96 per cent; 2025/26: ≥ 90 per cent; 2026/27: not applicable)
11.4 High level of client satisfaction with regional information and communications technology services	11.4.1 Client satisfaction with Regional Field Technology Service, as measured through client satisfaction surveys (2022/23: 97.5 per cent; 2023/24: 97.3 per cent; 2024/25: 98 per cent; 2025/26: 96 per cent; 2026/27: 96 per cent)
	11.4.2 Utilization of the Unite field remote infrastructure monitoring system technology to help missions to reduce their environmental footprint in coordination with the United Nations Logistics Base (2022/23: 80 per cent; 2023/24: 80 per cent; 2024/25: 80 per cent; 2025/26: 80 per cent; 2026/27: 80 per cent)
	11.4.3 On-time provision of cybersecurity support for the Regional Service Centre and client missions within 30 days of receipt of request (2022/23: 88 per cent; 2023/24: 95 per cent; 2024/25: 97 per cent; 2025/26: 95 per cent; 2026/27: 95 per cent)

Expected accomplishments	Indicators of achievement
11.5 Deployment support of enterprise systems and applications and projects for the Regional Service Centre and its client missions	11.5.1 Deployment support of United Nations-developed software systems (Field Support Suite modules, including aviation information management systems; e-ticketing and global movement of personnel; SharePoint; and enterprise and cloud-based) and off-the-shelf systems for Regional Service Centre and its client missions (2022/23: 95 per cent; 2023/24: 95 per cent; 2024/25: 100 per cent; 2025/26: 95 per cent; 2026/27: 95 per cent)
	11.5.2 On-time completion of business process reengineering projects, relating to a minimum of 5 enterprise systems, both locally and on a regional mission level, for the Regional Service Centre and its client missions (2022/23: 80 per cent; 2023/24: 80 per cent; 2024/25: 85 per cent; 2025/26: 80 per cent; 2026/27: 80 per cent)

Component 6: Forward Support and Deployment Hub

Expected accomplishments	Indicators of achievement
12.1 Facilitate and deliver comprehensive logistical support for regional air transportation, freight-forwarding options and regional deployment stocks	12.1.1 Freight-forwarding solution established within 15 working days from the client missions request received for third-party logistics and freight-forwarding services (2022/23: not applicable; 2023/24: 100 per cent (within 7 days); 2024/25: 100 per cent; 2025/26: not applicable; 2026/27: not applicable)
	12.1.2 Flight hour utilization for client missions' requirement under available letter of assist and standby air charter agreement (2022/23: not applicable; 2023/24: not applicable; 2024/25: 100 per cent; 2025/26: not applicable; 2026/27: not applicable)
	12.1.3 Provide options of air transportation services availability within 7 working days from the receipt of the client missions' request. (2022/23: 100 per cent; 2023/24: 100 per cent; 2024/25: 80 per cent; 2025/26: not applicable; 2026/27: not applicable)
	12.1.4 Effective operationalization of the Regional Deployment Stock Cell in terms of stock holdings/ inventory (2022/23: not applicable; 2023/24: not applicable; 2024/25: not applicable; 2025/26: not applicable; 2026/27: not applicable)

Expected accomplishments	*Indicators of achievement*
	12.1.5 Percentage of mission sourcing requests for regularly required materials from the Regional Deployment Stock Cell fulfilled and shipments released for transportation to the missions within 15 working days (2022/23: 100 per cent; 2023/24: 100 per cent; 2024/25: 86 per cent; 2025/26: not applicable; 2026/27: not applicable)
	12.1.6 Assets and equipment in stock physically verified and inventory counted on a quarterly basis (2022/23: not applicable; 2023/24: not applicable; 2024/25: 100 per cent per cent: 2025/26: not applicable; 2026/27: not applicable)
	12.1.7 Regional deployment stocks and United Nations reserve items received by the requesting mission from the Forward Support and Deployment Hub within 60 days from the approved stock transfer request (2022/23: 100 per cent; 2023/24: 90 per cent; 2024/25: 42 per cent: 2025/26: not applicable; 2026/27: not applicable)

External factors

Changes to mission mandates calling for revised concept of operation

Security situation impeding the implementation of movements

Delays in government clearances for movements of regional deployment stocks to the missions

Delays in transit due to the maritime transportation crisis

Vendor non-response on utilizing the transportation module for tracking and tracing of freight-forwarding movement

Component 7: Global Procurement Support Section

Expected accomplishments	*Indicators of achievement*
13.1 Increased efficiency and effectiveness of procurement operations conducted by the Global Procurement Support Section to support global clients who need ad hoc procurement support and to render full procurement support for smaller clients who do not have procurement capacity	13.1.1 Commercial evaluations for requests for proposal and invitations to bid completed within 14 and 10 working days, respectively (2022/23: 40 per cent/71 per cent; 2023/24: 69 per cent/92 per cent; 2024/25: 100 per cent/46 per cent; 2025/26: not applicable; 2026/27: not applicable)
	13.1.2 Contract awards/signatures completed within 10 working days of approval of award (2022/23: 70 per cent; 2023/24: 48 per cent; 2024/25: 71 per cent; 2025/26: not applicable; 2026/27: not applicable)
	13.1.3 Vendor response rate to competitive solicitations within stipulated due date (2022/23: 48 per cent; 2023/24: 11 per cent; 2024/25: 15 per cent; 2025/26: not applicable; 2026/27: not applicable)

Expected accomplishments	*Indicators of achievement*
13.2 Provision of vendor outreach with a view to increasing procurement from developing countries and economies in transition countries	13.2.1 Vendors provided with registration support to register in the United Nations Global Marketplace within 5 working days from the receipt of support request (2022/23: 100 per cent (within 4 days); 2023/24: 100 per cent (within 4 days); 2024/25: 90 per cent; 2025/26: not applicable; 2026/27: not applicable)

External factors

Vendors have an interest in registering with the United Nations Global Marketplace and provide needed documentation for approval

Evaluation activities

76. An evaluation, on the audit of mission liquidation, transition and closure support by RSCE (Ref. no. 2024/075), completed by OIOS during the 2024/25 period, has guided the Centre's planning for the 2026/27 period.

77. In response to the results of the evaluation referenced above, RSCE incorporated the lessons learned by initiating the roll-out of the Sparta application to improve the visibility of open items and coordination across service lines. In addition, for future liquidation activities, the Centre will utilize a software to track mission closure milestones and performance.

78. For the 2026/27 period, as part of the RSCE ISO 9001:2015 quality management certification process, the Centre will conduct a self-audit of its core service delivery, and the outcomes will be leveraged to drive ongoing improvements.

II. Financial resources

A. Overall

(Thousands of United States dollars; budget year is from 1 July to 30 June)

B. Efficiency gains

79. The cost estimates for the period from 1 July 2026 to 30 June 2027 take into account the following efficiency initiatives:

(Thousands of United States dollars)

Budget class	*Description of the initiative*	*Estimated efficiency gains (2024/25)* (1)	*Realized efficiency gains (2024/25)* (2)	*Variance (2024/25)* (3)=(2)-(1)	*Investment since inception to generate the efficiency gains of 2026/27* (4)	*Cumulated efficiency gains since inception and before 2026/27* (5)	*Estimated efficiency gains (2026/27)* (6)	*Cumulated investments and efficiency gain as of 2026/27* (7)=(4)+(5)+(6)
	Internal							
Civilian personnel	Cost savings from integrating Kuwait Joint Support Office core and non-core clients into the Regional Service Centre portfolio	–	–	–	–	–	2 752.4	2 752.4
Civilian personnel	Abolishment of 5 Regional Service Centre Field Service positions and establishment of 5 Regional Service Centre national General Service positions	–	–	–	–	–	675.0	675.0
Civilian personnel	Nationalization of two Field Service posts	–	–	–	–	–	270.0	270.0
Civilian personnel	Scalability model: business process refinements due to implementation of Sparta, resulting in a reduction of 6 posts	–	–	–	–	–	254.4	254.4
Civilian personnel	Scalability model: claims service line restructure, resulting in a reduction of 1 P-4 post	–	–	–	–	–	243.8	243.8
Operational costs: information and communications technology	Cost avoidance related to the MINUSMA asset transfers and the non-acquisition of communications and information technology equipment past life expectancy	–	–	–	–	–	388.3	388.3

Budget class	Description of the initiative	*Estimated efficiency gains (2024/25)* (1)	*Realized efficiency gains (2024/25)* (2)	*Variance (2024/25)* (3)=(2)-(1)	*Investment since inception to generate the efficiency gains of 2026/27* (4)	*Cumulated efficiency gains since inception and before 2026/27* (5)	*Estimated efficiency gains (2026/27)* (6)	*Cumulated investments and efficiency gain as of 2026/27* (7)=(4)+(5)+(6)
	External[a]							
Operational costs: travel	Airline discounts	–	729.9	729.9	–	729.9	730.0	1 459.9
Operational costs: various	Prompt payment discounts	–	2 756.6	2 756.6	–	2 756.6	2 861.5	5 618.1
Operational costs: travel	Fare audit – realized savings	–	–	–	–	–	5.9	5.9
Total		**–**	**3 486.5**	**3 486.5**	**–**	**3 486.5**	**8 181.2**	**11 667.8**
Approved budget for 2025/26							46 154.0	
2026/27 estimated efficiencies as a percentage of the approved budget for 2025/26							17.7	

[a] These represent savings in the budgets of entities on whose behalf the Regional Service Centre purchases tickets and makes payments.

C. Unencumbered balance

80. Unencumbered balances for the periods from 2022/23 to 2024/25 as reported in the relevant performance reports are as follows:

Trend of the unencumbered balance

(Thousands of United States dollars)

	Amount		
Group	*2022/23*	*2023/24*	*2024/25*
Civilian personnel	1 187.8	(720.1)	(1 491.1)
Operational costs	200.7	834.3	1 494.5
Total	**1 388.5**	**114.2**	**3.4**

D. Cancellation of prior-period obligations

81. Prior-period obligations for the periods from 2022/23 to 2024/25 were cancelled, as follows:

Trend of the cancellation of prior-period obligations

(Thousands of United States dollars)

	Amount		
Group	*2022/23*	*2023/24*	*2024/25*
Civilian personnel	85.4	14.4	5.1
Operational costs	15.6	68.2	121.5
Total	**101.0**	**82.6**	**126.6**

Note: The amounts represent the total obligations that were cancelled at the end of the 12-month period following the end of the budget period in respect of goods supplied and services rendered in the budget period, and at the end of an additional period of four years in respect of obligations to troop- and police-contributing countries.

E. Other revenue and adjustments, and borrowing

1. Other revenue and adjustments

(Thousands of United States dollars)

Category	*Amount*
Investment revenue	300.2
Other/miscellaneous revenue[a]	25.2
Voluntary contributions in cash	–
Prior-period adjustments	–
Cancellation of prior-period obligations	126.6
Total	**455.4**

[a] Breakdown of other/miscellaneous revenue: refund of prior-period expenses ($5,200); and other revenue ($20,000).

82. Credits comprising the unencumbered balances, other revenue and the cancellation of prior-period obligations reduce the assessed contributions owed by Member States in the following financial year. The credit for the 2024/25 period for overall peacekeeping operations amounts to $335.5 million, including the support entities and MINUSMA. In the current financial situation, offsetting this large amount of credit against a future assessment for the 2026/27 period will reduce the collection and undermine the ability of peacekeeping operations to fully implement their mandates. Accordingly, the Secretary-General proposes that the General Assembly approve that the credits in respect of the financial period 2024/25 be placed in a reserve that would be used in the event that collections are insufficient to enable the implementation of those mandates and allow Member States to apply their share towards current or future dues once the Assembly determines that the liquidity situation has sufficiently improved. This proposal is explained in more detail in the peacekeeping overview report.

2. Borrowing

83. The Regional Service Centre did not receive loans from active peacekeeping missions during the reporting period.

F. Vacancy factors

84. The cost estimates for the period from 1 July 2026 to 30 June 2027 take into account the vacancy factors outlined in the table below. The table also summarizes, by category, the actual rates in the periods from 2022/23 to 2024/25, as well as the approved and current rates for the 2025/26 period.

(Percentage)

	Actual						
Category	*2022/23*	*2023/24*	*2024/25*	*2025/26 approved*	*Actual as at 31 December 2025*	*Actual average, January to December 2025*	*2026/27 proposed*

Temporary positions[a]							
National General Service staff	–	–	–	–	–	–	50.0

[a] Funded under general temporary assistance.

85. The assumptions considered for the vacancy factors include the current 12-month average vacancy rate, from January to December 2025, or the actual vacancy rate as at 31 December 2025. This is in line with the policy guidance provided to improve the accuracy and consistency of the vacancy factors applied in the proposed budgets for the 2026/27 period and to ensure that proposed vacancy rates are based, as much as possible, on actual rates. A vacancy rate of 50 per cent has been applied in the calculation of costs for the proposed establishments and conversions.

III. Analysis of variances[3]

	2024/25 variance		*2026/27 variance*	
International staff	($213.5)	(0.8%)	($2 336.5)	(10.2%)

86. For the 2024/25 period, the increased requirements were attributable mainly to a higher staff assessment due to revised salary scales and higher actual common staff cost rates compared with the approved budget. The increased requirements were offset in part by the higher actual average vacancy rate of 11.7 per cent compared with 9.8 per cent in the approved budget and a decrease in the average post adjustment, from 36.7 to 35.7 per cent.

87. For the 2026/27 period, the reduced requirements are attributable primarily to a net reduction of 13 posts in line with the application of the scalability staffing models, including the proposed conversion of two Field Service posts to national General Service posts, the application of a higher vacancy rate of 9.7 per cent compared with 7.1

[3] Resource variance amounts are expressed in thousands of United States dollars. Analysis is provided for variances of at least plus or minus 5 per cent or $100,000.

in the approved budget and lower common staff costs compared with rates in the approved budget, offset by the application of higher salary rates effective 1 January 2026.

	2024/25 variance		*2026/27 variance*	
National Professional Officer	($727.8)	(15.6%)	$446.4	8.2%

88. For the 2024/25 period, the increased requirements were attributable primarily to a lower actual average vacancy rate of 2.5 per cent compared with 15.4 per cent in the approved budget, resulting primarily from the transfer of three MONUSCO posts in relation to the transfer of security and information technology functions and the two abolishments due to MINUSMA and UNITAMS closures; retroactive salary increases of 2.3 and 2.6 per cent effective November 2023 and November 2024, respectively, which were not known at the time of the preparation of the budget proposal for the 2024/25 period; and the fluctuation of the United States dollar against the Ugandan shilling, resulting in an actual average exchange rate of 3,671 Ugandan shillings to 1 United States dollar, compared with the rate of 3,814 Ugandan shillings in the approved budget. The increased requirements were offset in part by lower actual common staff costs compared with the approved budget.

89. For the 2026/27 period, the increased requirements are attributable primarily to a net increase of three posts in line with the application of the scalability staffing models, the application of higher salary rates effective November 2024 of 2.6 per cent not included in the approved budget and the application of the exchange rate of 3,620.01 Ugandan shillings to 1 United States dollar, compared with the rate of 3,682.00 Ugandan shillings in the approved budget, offset in part by slightly lower common staff cost rates compared with rates in the approved budget.

	2024/25 variance		*2026/27 variance*	
National General Service staff	($547.9)	(6.4%)	$758.5	8.6%

90. For the 2024/25 period, the increased requirements were attributable primarily to a lower actual average vacancy rate of 3.6 per cent compared with 7.6 per cent in the approved budget, resulting primarily from the transfer of 23 MONUSCO posts in relation to the transfer of security and information technology functions, as well as 25 abolishments due to MINUSMA and UNITAMS closures; retroactive salary increases of 2.3 and 2.6 per cent effective November 2023 and November 2024, respectively, which were not known at the time of the preparation of the budget proposal for the 2024/25 period; and the fluctuation of the United States dollar against the Ugandan shilling, resulting in an actual average exchange rate of 3,671 Ugandan shillings to 1 United States dollar, compared with the rate of 3,814 Ugandan shillings in the approved budget. The increased requirements were offset in part by lower actual common staff costs compared with the approved budget.

91. For the 2026/27 period, the increased requirements are attributable primarily to a net increase of 20 posts in line with the application of the scalability models, the application of higher salary rates effective November of 2.6 per cent not included in the approved budget, and the application of an exchange rate of 3,620.01 Ugandan shillings to 1 United States dollar, compared with the rate of 3,682.00 Ugandan shillings applied in the approved budget for the 2025/26 period.

	2024/25 variance		2026/27 variance	
United Nations Volunteers	($1.3)	(0.5%)	$81.5	30.3%

92. For the 2026/27 period, the increased requirements are attributable to an increase in allowances, including dependency, medical and monthly rental allowances, and non-recurrent costs such as exit allowances and repatriation expenses for international United Nations Volunteers.

	2024/25 variance		2026/27 variance	
General temporary assistance	($0.5)	(22.7%)	$70.5	3 204.5%

93. For the 2026/27 period, the increased requirements are attributable to the addition of three general temporary assistant positions at the national General Service level to support the liquidation and residual tasks of UNAMI.

	2026/27 variance	
Consultants and consulting services	$13.0	100.0%

94. For the 2026/27 period, the increased requirements are attributable to the provision for annual pre-surveillance assessment and surveillance audit costs to maintain ISO 9001-2015 certification, which is under way.

	2024/25 variance		2026/27 variance	
Official travel	$96.2	39.3%	($38.8)	(20.6%)

95. For the 2024/25 period, the reduced requirements were attributable primarily to cost-control measures for the reprioritization of operational resources to cover the increased requirements for civilian personnel.

96. For the 2026/27 period, the reduced requirements are attributable primarily to a shift towards online training modalities and a reduction in non-essential travel, offset in part by travel requirements associated with the integration of new client missions from the Kuwait Joint Support Office.

	2024/25 variance		2026/27 variance	
Facilities and infrastructure	$531.0	26.0%	$163.4	7.6%

97. For the 2024/25 period, the reduced requirements were attributable primarily to reduced requirements for common shared costs for utilities and waste disposal services, maintenance services and supplies due to the increased presence of MONUSCO staff in Entebbe, lower acquisitions of stationery and office supplies and office furniture due to cost-control measures for the reprioritization of resources to cover the increased requirements for civilian personnel and a reduced portion of Department of Safety and Security charges for the year compared with the approved budget. The reduced requirements were offset in part by the increased requirement for the acquisition of safety and security equipment to replace the failing video wall system used by security to monitor live video feeds, which is critical to safeguarding the personnel and property of the Organization.

98. For the 2026/27 period, the increased requirements are attributable primarily to the proposed replacement of an X-ray machine at the main entrance, as well as security cameras, which have exceeded their life expectancy and are essential for maintaining campus security, the provision for the maintenance and repair of speed gates that had not previously been budgeted for and the higher estimated average price

of fuel of $0.9298 per litre compared with the budgeted rate of $0.8971 per litre, as well as higher projected fuel requirements of 298,244 litres based on actual consumption in the 2024/25 period compared with 237,472 litres in the 2025/26 budget, attributable to the higher use of generators due to frequent instability in city power. The increased requirements are offset in part by a reduction in protective gear and fire safety items that were provided for in 2025/26 budget and not required in the 2026/27 budget period.

	2024/25 variance		*2026/27 variance*	
Ground transportation	$44.7	21.9%	$5.7	3.7%

99. For the 2024/25 period, the reduced requirements were attributable to the postponement of repairs and maintenance costs due to cost-control measures for the reprioritization of resources to cover for the increased requirements for civilian personnel and reduced requirements for common shared costs related to vehicle fuel, incurred on behalf of RSCE. The reduced requirements were offset in part by an increase in motor vehicle insurance premiums.

	2024/25 variance	
Air operations	$61.2	64.5%

100. For the 2024/25 period, the reduced requirement was attributable to air pallet nets and accessories being budgeted under this budget line but implemented under the other supplies, services and equipment and facilities and infrastructure budget lines owing to the nature of expenditure.

	2024/25 variance		*2026/27 variance*	
Communications and information technology	$589.4	10.9%	($184.4)	(3.3%)

101. For the 2024/25 period, the reduced requirement was attributable primarily to reduced acquisitions of communications and information technology equipment and services due to the need to reprioritize resources for increased requirements under civilian personnel. This was offset in part by an increase in Internet costs due to an increase in MONUSCO personnel on the campus following evacuations.

102. For the 2026/27 period, the reduced requirements are attributable primarily to lower centralized Office of Information and Communications Technology charges and the reduction of one contractor position in line with the results of the non-transactional model, offset in part by contractual increases in ICT contractor fees, increased requirements for network segmentation, online server storage and data back-up for improved security and performance, and additional costs in software and applications to automate tasks and enhance productivity.

	2024/25 variance	
Medical	$53.3	57.1%

103. For the 2024/25 period, the reduced requirement was attributable to reduced purchases of medical supplies due to the reprioritization of resources to cover for the increased requirements for civilian personnel.

	2024/25 variance		*2026/27 variance*	
Other supplies, services and equipment	$118.7	21.1%	$22.1	4.3%

104. For the 2024/25 period, the reduced requirements were attributable primarily to a reduction in training activities and lower freight costs resulting from reduced acquisitions due to the reprioritization of resources to cover for the increased requirements for civilian personnel. The reduced requirements were offset in part by a new requirement for property and terrorism insurance and the procurement of air pallet nets and accessories, which were budgeted under the air operations budget line but charged in part under this line owing to the nature of expenditure.

IV. Actions to be taken by the General Assembly

105. **The actions to be taken by the General Assembly in connection with the financing of the Regional Service Centre Entebbe, Uganda, are:**

(a) **To take note of the unencumbered balance of $3,400 with respect to the period from 1 July 2024 to 30 June 2025;**

(b) **To take note of other revenue for the period ended 30 June 2025 amounting to $452,000 from investment revenue ($300,200), other/miscellaneous revenue ($25,200) and the cancellation of prior-period obligations ($126,600);**

(c) **To approve the apportionment of the amount of $455,400 among Member States in accordance with the applicable scale of assessment for 2025 and to place such apportioned amount in a reserve that would be used in the event that collections are insufficient to enable the full, efficient and effective implementation of mandates;**

(d) **To allow Member States to apply their share of the amount apportioned in subparagraph (c) above towards current or future dues once the General Assembly determines that the liquidity situation has improved sufficiently to allow such application;**

(e) **To appropriate the amount of $45,155,400 for the maintenance of the Centre for the 12-month period from 1 July 2026 to 30 June 2027;**

(f) **To prorate the amount in subparagraph 105 (e) among the budgets of the Centre's active client peacekeeping operations and against the programme budget for 2027;**

(g) **To take note of the requirements for the proposed programme budget for the period from 1 January to 31 December 2027 for the share of client special political missions of the Centre to meet the financing requirements of the Centre for the period from 1 July 2026 to 30 June 2027.**

V. Summary of follow-up action taken to implement the decisions and requests of the General Assembly in its resolutions 76/274 and 79/299, including the requests and recommendations of the Advisory Committee on Administrative and Budgetary Questions endorsed by the Assembly

A. General Assembly

Cross-cutting issues

(Resolution 76/274)

Decision/request	*Action taken to implement decision/request*
Requests the Secretary-General to improve comprehensive oversight of the activities of peacekeeping missions and implement the recommendations of relevant oversight bodies in this regard to avoid deficiencies in management and related economic losses, with the aim of ensuring full compliance with the Financial Regulations and Rules of the United Nations (para. 17).	As at 31 December 2025, RSCE had implemented all 12 OIOS recommendations. Two Board of Auditors recommendations from 2024/25 remained open, with regular monitoring in place to ensure their timely resolution.
Requests that future budget proposals demonstrate the scalability of mission support components, including their staffing and operational costs, be proportionate in relation to the changing level of other mission components and include standard indicators (para. 27).	The transactional scalability model has been updated and continues to be applied. The non-transactional scalability staffing model (by function and reference ranges) is applied to the budget proposal for 2026/27. (see paras. 62–65 above and annex II).
Requests the Secretary-General to consider options for greater nationalization of functions when formulating budget submissions, commensurate with mission mandates and requirements where applicable (para. 34).	Over the years, RSCE has made significant progress in nationalizing functions. Since 2013/14, the Centre has made the transition from a majority-international to a majority-national staffing structure and has sustained this model. For 2026/27, the Centre has further optimized restructuring efforts, following the consolidation of payroll services and the transition of Kuwait Joint Support Office clients, enabling the additional nationalization of posts and supporting a more integrated and sustainable workforce. Consequently, the ratio of international to national staff is expected to shift from 32:68 per cent in 2025/26 to 27:72 per cent in 2026/27.

B. Advisory Committee on Administrative and Budgetary Questions

Cross-cutting issues

(A/76/760 and General Assembly resolution 76/274)

Request/recommendation	*Action taken to implement request/recommendation*
While the Advisory Committee supports inter-mission cooperation, it notes the continued lack of clear and transparent reporting on the areas of cooperation and the respective financing arrangements and trusts that future overview reports and relevant mission performance reports will provide more comprehensive information on the areas of inter-mission cooperation, including the recording of related resources between the originating and receiving missions (para. 77).	The United Nations Entebbe campus is shared by RSCE and MONUSCO, along with other entities, with the Centre serving as the landlord. While MONUSCO and the Centre maintain responsibility for managing their relevant operations and facilities within clearly defined areas of the campus, essential services in common shared areas, such as security fees, utilities and maintenance, are jointly utilized. The provision and financing of these common services are governed through an agreement, in which roles and responsibilities are outlined. Under this framework, each entity contributes its proportional share of the costs for services if provided by the other entity, with the cost-sharing arrangements clearly documented and regularly reviewed to ensure transparency and accountability.

Financing of the Regional Service Centre in Entebbe

(A/79/724/Add.5 and General Assembly resolution 79/299)

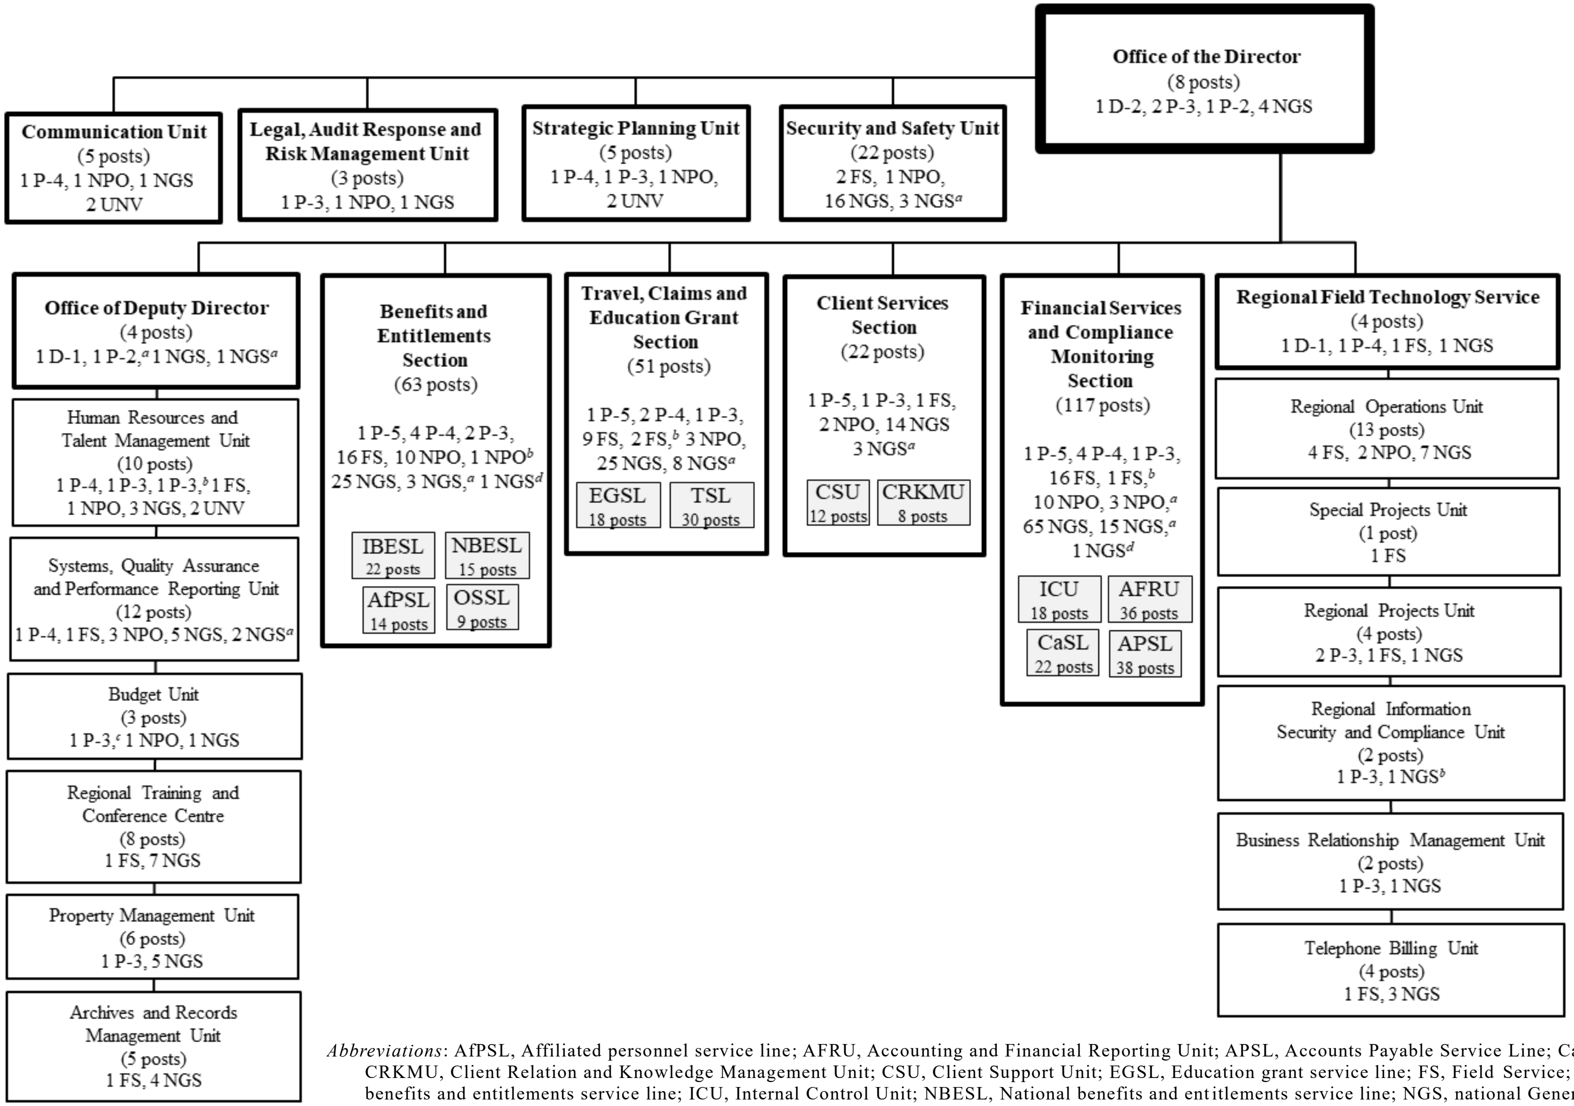
Request/recommendation	*Action taken to implement request/recommendation*
The Advisory Committee notes that business processes, which form the basis of full-time equivalents applied within the scalability model, are currently under review with the expectation to generate the efficiencies noted above and trusts that an update will be provided in the next report. The Committee trusts that lessons learned from the review, including on the streamlining of transactional processes, will be shared with other support entities within the Secretariat, as appropriate, with a view to strengthening the Organization's culture of efficiency (para. 9).	The business process reviews remain ongoing. The business processes related to open items have been refined following the implementation of Sparta and incorporated into the updated transactional scalability model for 2026/27, resulting in efficiencies. The outcomes and lessons learned have been shared with other entities.
The Advisory Committee looks forward to the presentation of the results on the new scalability model for non-transactional functions of the Regional Service Centre in the context of the next budget report (para. 10).	The new non-transactional scalability model for the RSCE non-transactional functions has been developed and applied in preparation for the 2026/27 budget proposal. The results are provided for in paragraphs 62 to 65 above and in annex II.

Request/recommendation	*Action taken to implement request/recommendation*
The Advisory Committee trusts that an update on the recruitment status of all vacant posts, as well as on the impact of the liquidity situation on projected hirings, will be provided to the General Assembly at the time of its consideration of the present report and in the context of the next report (para. 17).	Details on vacant posts and recruitment status are provided in the supplementary information.
The Advisory Committee trusts that future budget will contain comprehensive cost-recovery information, including the related income and expenditure. The Committee also trusts that greater details of planned cost-recovery service expansion to other United Nations and non-United Nations entities, as well as the related cost-efficiencies, will be provided to the General Assembly in future reports (para. 36).	The Regional Service Centre continues to strengthen its cost-recovery framework, and work is under way to expand service provision to additional partners, supported by clearer costing methodologies and strengthened financial tracking. Recent initiatives, including end-to-end travel administration support for training participants under the triangular partnership programme and the provision of business-continuity connectivity services to agencies, funds and programmes in Uganda, demonstrate the Centre's growing capacity to generate efficiencies and recover associated costs. The Centre will provide the General Assembly with comprehensive cost-recovery information in the context of future reports.
The Advisory Committee, noting the progress made by the Centre in improving its client satisfaction performance, recalls its earlier recommendations on the matter (see A/78/744/Add.6, para. 22 (a), and A/77/767/Add.5, para. 18 (a)) and trusts that the Centre will continue to strengthen its efforts, including through the establishment of focal points, as appropriate, and will provide an update to the General Assembly on the progress made in employing the above approaches to increase client satisfaction in the context of the next report of the Secretary-General (para. 38).	Paragraphs 11 to 13 and 44 and 45 of the present report contain information on the steps taken to improve client satisfaction performance. The Regional Service Centre, having previously reviewed various models, chose the hub-and-spoke client service delivery model because it is designed to centralize accountability and streamline query management and is scalable. Clients also benefit from individualized attention through multiple communication channels. Owing to budgetary constraints in recent years, the Centre has had to strategically prioritize activities, leading to reduced travel for client engagements.
The Advisory Committee trusts that the Secretary-General will include fare auditing savings as part of his refined methodology for tracking efficiency gains. The Committee further recalls its earlier recommendation (see A/77/767/Add.5, para. 18) and trusts that the Secretary-General will enhance his efforts to promote the use and adoption of fare auditing throughout the Secretariat. The Committee is also of the view that, where appropriate, the methodologies for carrying out fare audits should be harmonized to enhance efficiencies and potential cost savings across the Secretariat (para. 41).	Third-party fare audits help to ensure that the United Nations obtains the most economical airfares in compliance with the Organization's travel policies and contractual obligations. While implementation arrangements differ across duty stations, the contracted travel management company is, in general, required to undergo regular, independent third-party airfare audits. At larger duty stations, these external reviews are often complemented by internal operational assessments undertaken by United Nations travel-processing officers. The combined results feed into the key performance indicators used to evaluate vendor compliance and overall performance. The results of the audit reflect cost avoidance and compliance control measures, contributing to vendor accountability through periodic independent review.

Request/recommendation	*Action taken to implement request/recommendation*
	As regards Secretariat-wide implementation, fare auditing services may not be available in all duty stations. Headquarters continues to encourage and recommend that travel-processing offices in other locations explore feasible regional options where such services exist. Lastly, the methodology for implementing fare auditing services appropriately rests with each Secretariat entity, which is best positioned to determine the appropriate approach on the basis of its operational requirements.
The Advisory Committee notes that the Regional Service Centre carries out its due diligence in adjusting its scalability model, inclusive of personnel requirements, and keeps its service assumptions under continuous review. The Committee considers that automation and deployment of new technologies will lead to further efficiencies in business processes, which could potentially also affect related staffing requirements. The Committee trusts that such efficiencies will be provided in future reports and shared with other Secretariat entities, as appropriate, with a view to strengthening the Organization's culture of efficiency (see also para. 10 above) (para. 42).	The Regional Service Centre is actively leveraging automation and new technologies to achieve further efficiencies in business processes. Recent initiatives include the implementation of the Sparta platform, which has improved the accuracy, timeliness and visibility of financial transactions across service lines. The Centre will continue to introduce tools as they become available and will report any realized efficiencies in future reports.
The Advisory Committee trusts that the Regional Service Centre will further pursue its efforts to promote equitable geographical representation and gender parity in the Centre (para. 43).	The Regional Service Centre will continue to consider geographical representation during the selection process and remains committed to advancing gender parity. Since 1 July 2025 the percentage of international female staff has increased from 54.5 to 55.3 per cent.

Annex I

Proposed organizational structure of the Regional Service Centre in Entebbe, Uganda (2026/27)



Abbreviations: AfPSL, Affiliated personnel service line; AFRU, Accounting and Financial Reporting Unit; APSL, Accounts Payable Service Line; CaSL, Cashier service line; CRKMU, Client Relation and Knowledge Management Unit; CSU, Client Support Unit; EGSL, Education grant service line; FS, Field Service; IBESL, International benefits and entitlements service line; ICU, Internal Control Unit; NBESL, National benefits and entitlements service line; NGS, national General Service; NPO, National Professional Officer; OSSL, Onboarding and separation service line; TSL, Travel service line; UNV, United Nations Volunteer;.

[c] Reclassified post.

[d] Converted post.

Annex II

Review of peacekeeping support functions performed by the United Nations Logistics Base at Brindisi, Italy, and the Regional Service Centre in Entebbe, Uganda

I. Introduction

1. The review of peacekeeping support functions performed by the United Nations Logistics Base at Brindisi, Italy (UNLB), and the Regional Service Centre in Entebbe, Uganda (RSCE), was undertaken in response to legislative requests.[1] It was conducted as an extension of the review of the support account for peacekeeping operations, as a result of which meaningful progress has been made in reviewing scalability and developing a new staffing model (by function and with reference ranges). The review was conducted with the assistance of an experienced external consultancy firm. The General Assembly took note of the related report of the Secretary-General (A/79/781) in section II of its resolution 79/298, as recommended by the Advisory Committee on Administrative and Budgetary Questions (A/79/842, para. 43). This model was applied, as part of the UN80 Initiative, to the revised estimates relating to the support account for the 2025/26 period (A/80/400), resulting in the abolishment of 127 posts (due to the staffing model) of the overall 202 posts and positions abolished in the support account.

2. As noted in the review, Base staffing levels grew from 136 posts (including general temporary assistance and United Nations Volunteers) in 2003/04 to 452 posts in 2024/25, while its budget (not adjusted for inflation) grew from $22.0 million in 2003/04 to $69.0 million in 2024/25, roughly in tandem with the peacekeeping budget up to 2014/15. Some of the increase in support capacity went to supporting the greater scale of peacekeeping operations and some went to building core capacities in key areas, including the maintenance of the Base itself and relevant infrastructure, as well as some of the work related to strategic deployment stocks and the United Nations reserve. UNLB staffing levels have remained mostly steady since 2015/16 despite a decreasing trend in the overall peacekeeping budget. UNLB initially provided services to peace operations, funded through a shared service model from the overall United Nations peacekeeping budget. Over time, it has evolved to serve a broader range of clients in line with the principles of the management reform adopted by the General Assembly in 2019 to organize work according to services provided rather than client served, under the management of the Office of Supply Chain Management in the Department of Operational Support.

3. Since RSCE first started to operate as a separate entity for budget purposes in 2016/17, the number of posts (inclusive of general temporary assistance and United Nations Volunteers) has declined slightly, from 421 in 2016/17 to 404 in 2024/25, while the budget (not adjusted for inflation) has grown from $39 million in 2016/17 to $48 million in 2024/25. The Centre already utilizes a transactional scalability model, driven by trends in the number of transactions that it conducts. The Advisory Committee on Administrative and Budgetary Questions has noted that “non-transactional offices”, including the executive direction and management component and the Regional Field Technology Service, are excluded from this transactional scalability model, and indicated that at least “safety and security as well as

[1] Recommendations of the Advisory Committee on Administrative and Budgetary Questions contained in A/76/760/Add.5 (UNLB) and A/78/744/Add.6 (RSCE), endorsed by the General Assembly in its resolutions 76/277 and 78/294, respectively, as well as the recommendation of the Board of Auditors in A/78/5 (Vol. II).

information and telecommunications technology functions could be considered scalable going forward".

II. Methodology

A. Functions

4. Following the methodology used for the scalability review of the support account, the model categorized UNLB operations into three functions: (a) field supply chain; (b) digital technology service delivery, covering the Service for Geospatial, Information and Telecommunications Technologies; and (c) management – UNLB, comprising the Central Service and the Office of the Director. In the case of RSCE, the existing transactional scalability model continues to be applied, while the new staffing model is being applied to the non-transactional functions, namely management and security and field technology services.

Table 1
Support functions in the United Nations Logistics Base and corresponding organizational units

Support function	*Organizational units*
Management – UNLB	Office of the Director
	Central Service
Field supply chain	Supply Chain Service
Digital technology service delivery	Service for Geospatial, Information and Telecommunications Technologies

Table 2
Support functions in the Regional Service Centre and corresponding organizational units

Support function	*Organizational units*
Management and security – RSCE	Office of the Director
	Office of the Deputy Director (excluding tier 2B)
Field technology services	Regional Field Technology Service

5. The review built on the approach developed for the review of the support account, which, like the United Nations Logistics Base and non-transactional functions in RSCE, conducts work that cannot be divided into transactions. The approach was designed to capture the full scope of work supporting peacekeeping, special political missions, other missions and activities by analysing data on how effort is allocated across organizational units and all posts and positions, including contractors. The approach produces, for each support function, a reference range formula describing how staffing requirements should be expected to change, taking into account changes in peacekeeping and special political missions supported. The reference range formulas provide clear definitions of scalability that can be used to

guide the budget formulations. At the same time, these formulas allow for differences by function, avoiding oversimplification of approaches, such as assuming that support function budgets should be a fixed proportion of the peacekeeping budget. Furthermore, the formulas are expressed as ranges, rather than single numbers, reflecting the uncertainty inherent in functions that are not transactional in nature and providing a degree of flexibility for proposing budgets while still having guidelines.

6. The data analysis and calculations are undertaken in three main steps:

(a) Estimating the distribution of support staffing, by purpose and by workload driver, based on triangulation and analysis of workload data from interviews, surveys, organizational charts and other documentation;

(b) Estimating the amount of current support that is (i) dedicated or allocable to peacekeeping operations and (ii) dedicated to or allocable to special political missions;

(c) Determining primary drivers of support requirements and devising reference ranges for how support requirements should change with (i) changes in the scale of operations and (ii) other workload drivers, and a set of reference ranges for support allocable to peacekeeping operations and special political missions combined.

B. Reference ranges

7. The formula for each function for support staffing for peacekeeping and special political missions starts with the total number of full-time equivalents allocable to peacekeeping and special political missions plus appropriate allocations from cross-cutting support to the Secretariat and/or all field missions and administrative and management support for the function itself. As opposed to the formula used in the support account, special political mission client missions are also taken into account as drivers to measure workload functions for UNLB and RSCE, except for management functions, which do not provide direct services to missions.

8. The staffing allocable to peacekeeping and special political missions is broken down into three components: (a) those driven by the scale of operations supported, (b) those driven by other factors and (c) minimum capacity requirements, using the distribution of support work by workload driver (see appendix I). The review showed that approximately 50 per cent of overall capacity requirements for UNLB and RSCE are driven by the scale of operations.

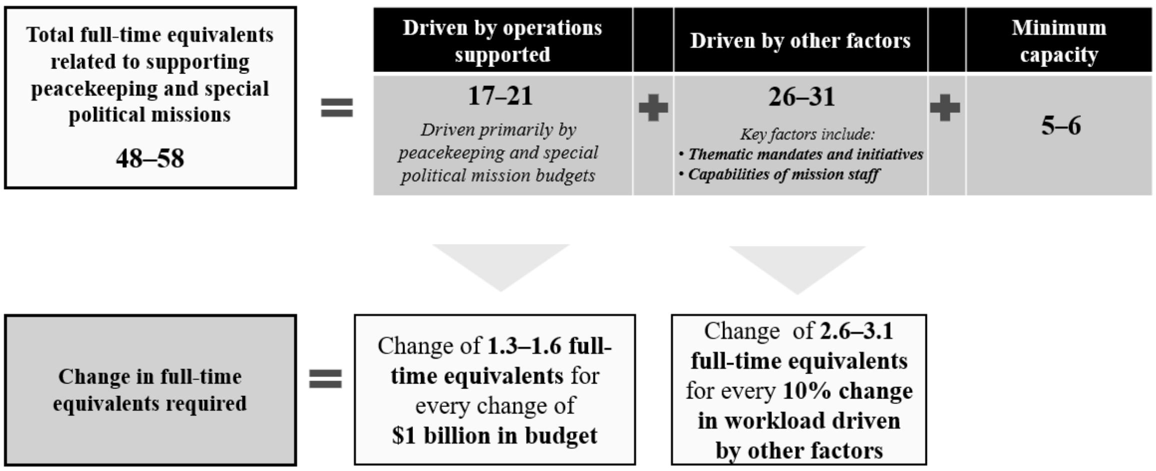
9. Next, the formula describes how the total number of full-time equivalents required for support for peacekeeping and special political missions should change for each component.

10. To illustrate how the reference range model would be used in practice, using a fictional function, the top line in figure I below shows that, for this function, the full-time equivalent of its current staffing resources (between 48 and 58) is focused on support for peacekeeping and special political missions. Of these resources, the workload of between 17 and 21 full-time equivalents is driven by the scale of operations. In addition, the workload of between 26 and 31 full-time equivalents is driven by other factors, while the workload of 5 to 6 full-time equivalents is driven by management support of the function itself.

11. In this example, the primary driver of the work that is dependent on the scale of operations is the total budget for peacekeeping and special political missions, while the other workload of the function is dependent on surge events and the complexity of processes. A formula provided for the change in each category can be used to determine that each increase or decrease in the total budget for peacekeeping and

special political missions by $1 billion may require a change of between 1.3 and 1.6 full-time equivalents. Correspondingly, every 10 per cent change in the function's work-related surge events and complexity of processes may result in changes of between 2.6 and 3.1 full-time equivalents.

Figure I
Illustrative example of a reference range formula for support for peacekeeping and special political missions, for a fictional function



12. The breakdown of the reference ranges and the individual workload drivers for all functions, including an indication of the changes in full-time equivalents that would be required as a result of changes across categories of workload drivers, is contained in appendix II.

III. Support staffing allocable to peacekeeping and special political missions

13. The distribution of support staffing by purpose was estimated for each function considered. Purposes have been aggregated into five primary categories: peacekeeping; cross-cutting; special political missions; non-peacekeeping/special political missions; and management and administration.

14. Support allocable to peacekeeping and special political missions includes specific support work to each category, plus an appropriate allocation for each support function of: (a) the capacity devoted to cross-cutting support for the Secretariat and/or all field missions; and (b) the management and administration of support functions.

15. The findings show that, for UNLB, a portion of full-time equivalents is dedicated to supporting non-peacekeeping and special political missions, while none of the posts and positions are funded from special political missions or regular budgets, highlighting the funding misalignment.

16. The review contained a recommendation that UNLB and RSCE should maintain single budgets that are funded by appropriate allocations to the budgets for peacekeeping missions and for regular and special political missions, which is currently the approach taken for the Centre.

IV. Identifying prior-year reductions

17. For UNLB and RSCE (non-transactional support), the staffing model will be applied from the 2026/27 budget period, as stated in the relevant budget reports (A/79/767 and A/79/751). Similar to the support account, the 2020/21 budget period was selected as the most suitable baseline line year, based on the closure of the African Union-United Nations Hybrid Operation in Darfur and the United Nations Multidimensional Integrated Stabilization Mission in Mali and the assumption that it does not account for any other changes to the scale of peacekeeping operations.

18. For UNLB, the calculations of reductions based on the application of the baseline year were offset against reductions already made since the 2020/21 period. Reductions already made for UNLB between 2020/21 and 2025/26 relate to changes due to the scale of operations under field supply chain services and digital technology service delivery, for a total of 23 positions, including 20 contractors.

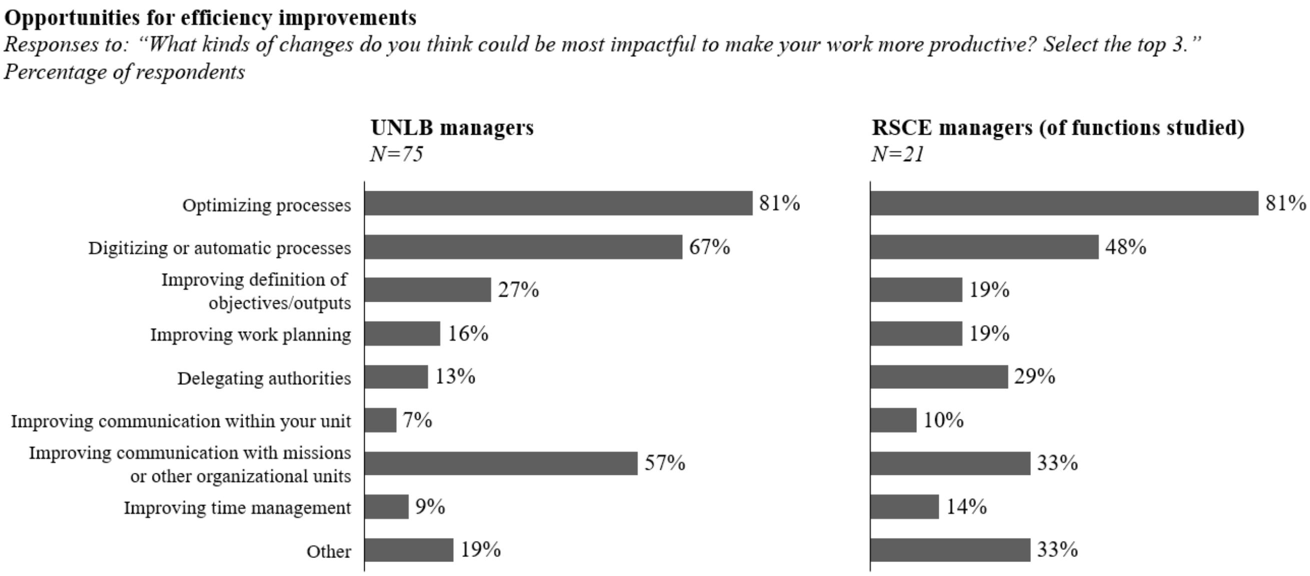
19. There were no reductions for RSCE between the baseline year and 2025/26 in staffing relevant to non-transactional work.

V. Observations about enhancing effectiveness and efficiency

Feedback from managers of the United Nations Logistics Base and the Regional Service Centre

20. The feedback from UNLB managers highlighted the areas for efficiency improvements as shown in figure II below. The consultant noted in the report that some of the interventions had already been implemented to varying degrees. In addition, it is worth noting that the Secretariat has been firmly committed to strengthening the culture of efficiency in support entities, including UNLB and RSCE. In the 2023/24 period, UNLB and the Centre efficiency gains amounted to $0.4 million and $4.9 million, respectively. For the 2024/25 period, efficiency gains (estimated) were $3.9 million for UNLB and $3.5 million for the Centre. For the 2026/27 period, the projected efficiency gains are in the range of $7.6 million for UNLB and $8.2 million for the Centre.

Figure II
Efficiency improvement areas identified in surveys of managers for all support functions in the United Nations Logistics Base and support functions studied in the Regional Service Centre



VI. Recommendations from the consultant

21. The consultant provided the following recommendations for UNLB and RSCE:

(a) Maintain single budgets for UNLB and RSCE and charge an appropriate allocation to both the peacekeeping and regular budgets for the UNLB budget, as is already done for the Centre's budget, to address current mismatches between work and funding sources and support a functional and service-based delivery model;

(b) Use the reference range formulas as a tool in developing assessed budgets for support functions. Use those formulas appropriately in conformity with guidelines;

(c) Conduct an independent and objective assessment of the appropriateness of absolute staffing levels in support functions. The review includes a recommendation that there should be an independent and objective assessment of what absolute staffing levels are appropriate, i.e. sufficient to meet support requirements and not in excess of requirements, for each support function. Another way to view the purpose of an objective assessment of absolute staffing levels is that it should determine whether, for each support function, the current year should be treated as the "baseline year", or if some prior year in which support capacity was appropriate to the larger scale of operations at the time should be used instead;

(d) Consider the suggestions for opportunities for efficiency improvements identified by functions in UNLB and RSCE.

VII. Implementing the staffing model for 2026/27 (by function and with reference ranges)

22. The proposed 2026/27 budget for UNLB and RSCE applied the staffing model based on the methodology described in section III of the present annex. The process followed a sequence of defined steps, as outlined below, for the respective functions under both entities (see tables for complementary details):

Step 1

Gross reduction targets were calculated by function, using only the scale-of-operation drivers, except for the management function, which took into consideration other workload drivers due to the increasing United Nations Organization Stabilization Mission in the Democratic Republic of the Congo presence in the Entebbe campus and the expanded client base. The baseline period used was 2020/21, compared with the 2026/27 projected budget and revised estimates for the support account and special political missions, including a transfer of payroll to the Department of Operational Support and the anticipated closure of the United Nations Assistance Mission for Iraq, approved by the General Assembly in its resolution 80/243. The projected 2026/27 peacekeeping budget takes into account the reduction in the budget and staffing of 10 per cent as assessed at the time of budget formulation, as well as the new United Nations Support Office in Haiti.

Step 2

For each function, the midpoint within the range of full-time equivalent changes was selected. For example, if the range was 2.5 to 3.5, the target reduction was set at 3.

Step 3

Net reduction targets were then derived by subtracting reductions already implemented since 2020/21 from the gross reduction targets.

Step 4

Each entity selected posts and positions for abolishment in order to meet the function- and entity-level targets identified in steps 2 and 3.

Table 3
Application of the staffing model by function for the United Nations Logistics Base

	Steps 1 and 2	*Step 3*	*Step 4*
Function	*Gross reduction targets*	*Reduction since 2020/21*	*Net reduction required*
Management – UNLB (Office of the Director and Central Service)	(4)	–	(4)
Field supply chain	(18)	2	(16)
Digital technology service delivery	(24)	21	(3)
Total change	**(44)**	**23**	**(21)**

Table 4
Application of the staffing model, by function, for the Regional Service Centre

	Steps 1 and 2	*Step 3*	*Step 4*
Function	*Gross reduction targets*	*Reduction since 2020/21*	*Net reduction required*
Management and security – RSCE (Office of the Director and Office of the Deputy Director, excluding tier 2B)	5	–	5
Field technology services	(5)[a]	–	(5)
Total change	**–**	**–**	**–**

[a] Reductions under field technology services include 4 posts and 1 contractor.

23. While the Secretariat concurs with the consultant's recommendation for charging a portion to special political missions by maintaining a single budget for UNLB, the implementation of this recommendation will be deferred to future periods, taking into account the ongoing significant changes in the scale and scope of peacekeeping and special political missions and any lessons learned from the utilization of the model.

Appendix I

Figure 1
Distribution of support work, by workload driver, for all functions in the United Nations Logistics Base

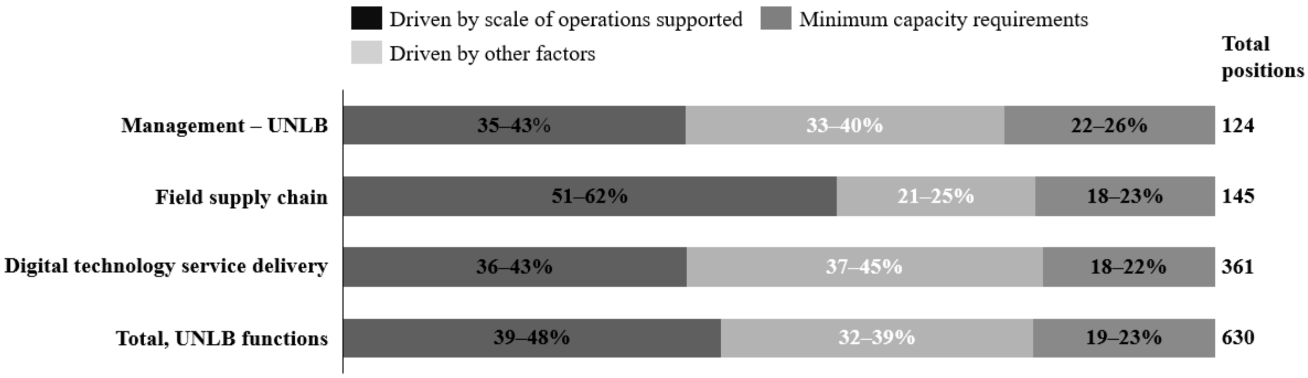


Figure 2
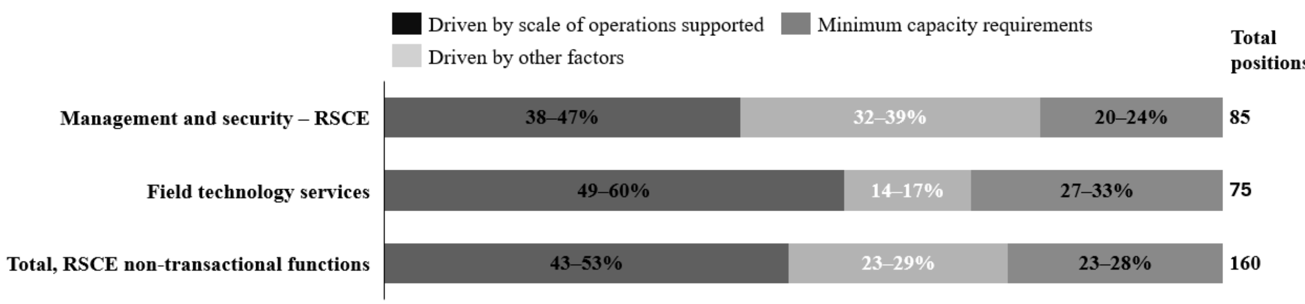
Distribution of support work, by workload driver, for functions studied in the Regional Service Centre



Appendix II

Reference range for all support functions in the United Nations Logistics Base and the Regional Service Centre

Table 1
Reference range formulas for changes in support staffing for both peacekeeping and special political missions for all support functions in the United Nations Logistics Base

Function		*Full-time equivalents related to supporting peacekeeping and special political missions*	*Full-time equivalents dependent on scale of peacekeeping and special political missions*	*Primary scale driver(s)*	*Dependence of support staffing on primary scale driver(s)*	*Full-time equivalents dependent on other factors*	*Leading other factors driving workload*	*Dependence of support staffing on workload changes due to other drivers*	*Minimum capacity requirements (full-time equivalents)*
Management – UNLB		84–102	33–40	UNLB personnel (including tenant units)	0.6–0.8 full-time equivalents per change of 10 personnel	31–37	• Surge events (e.g. mission start-up or drawdown) • Complexity of internal processes • Internal initiatives	3.1–3.7 full-time equivalents for every 10% change in workload	20–25
Supply chain	Field supply chain	106–129	60–73	Peacekeeping and special political mission (cluster III + UNAMA + UNAMI) budgets*	8.5–10.4 full-time equivalents per change of $1 billion in budget	24–29	• Surge events requiring logistical support • Development of new products and services	2.4–2.9 full-time equivalents for every 10% change in workload	22–27
Digital technology service delivery		237–289	62–75	Peacekeeping and special political mission (cluster III + UNAMA + UNAMI) budgets	8.8–10.7 full-time equivalents per change of $1 billion in budget	97–118	• Development of new products and services • Number of applications hosted, geographic information system products offered, cloud instances, and others • Surge events (e.g. mission start-up and liquidation) • Level of demand from client entities	9.7–11.8 full-time equivalents for every 10% change in workload	47–57
			32–39	Number of peacekeeping missions and special political missions (cluster III + UNAMA + UNAMI)	1.2–1.5 full-time equivalents per change of 1 peacekeeping or special political mission				

Abbreviations: UNAMA, United Nations Assistance Mission in Afghanistan; UNAMI, United Nations Assistance Mission for Iraq.

Table 2
Reference range formulas for changes in support staffing for both peacekeeping and special political missions for all support functions studied in the Regional Service Centre

Function	*Full-time equivalents related to supporting peacekeeping and special political missions*	*Full-time equivalents dependent on scale of peacekeeping and special political missions*	*Primary scale driver(s)*	*Dependence of support staffing on primary scale driver(s)*	*Full-time equivalents dependent on other factors*	*Leading other factors driving workload*	*Dependence of support staffing on workload changes due to other drivers*	*Minimum capacity requirements (full-time equivalents)*
Management and security – RSCE	65–80	28–34	RSCE personnel (including tenant units)	0.6–0.8 full-time equivalents per change of 10 personnel	23–29	• Initiatives from senior management • Surge events (e.g. mission liquidation and security situations) • Capabilities in missions	2.3–2.9 full-time equivalents for every 10% change in workload	14–17
Field technology services	32–39	9–11	Budget for African peacekeeping and special political missions served, and the United Nations Office to the African Union	1.7–2.1 full-time equivalents per change of $1 billion in budget	5–6	• Complexity of processes • Level of demand from client entities	0.5–0.6 full-time equivalents for every 10% change in workload	10–12
		8–10	RSCE personnel (including tenant units)	0.2–0.2 full-time equivalents per change of 10 personnel
