* The present document (A/81/6 (Sect. 29B)/Part A), consisting of the programme plan and programme performance information (part II; see General Assembly resolution [77/267](#), para. 10), will be replaced by a document containing parts A and B (A/81/6 (Sect. 29B)) once part B is issued.

** [A/81/50](#).

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the programme plan and programme performance information (part II) is submitted through the Committee for Programme and Coordination for the consideration of the Assembly.

Subprogramme 3. Special activities	25
Subprogramme 4. Administration, New York	29

A. Proposed programme plan for 2027 and programme performance in 2025

Overall orientation

Mandates and background

- 29B.1 The Department of Operational Support is the operational arm of the Secretariat and the client facing interface for operational support matters in the Secretariat's management structure, which exists to support the objective of effective mandate delivery, in partnership with Secretariat entities and other clients. The mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including resolutions [72/266 B](#) and [73/281](#). The Department delivers rapid, effective, efficient, responsible and, where required, customized enabling solutions that help partners to meet their mandates, including in the most challenging operating environments.

Strategy and external factors for 2027

- 29B.2 In 2027, the Department will continue to support effective mandate implementation through the delivery of operational support. In executing its programme, the Department will partner with client entities to identify needs and jointly develop solutions, including in the areas of end-to-end supply chain management, support for uniformed personnel, human resources, a broad range of training services, business process improvement, medical and occupational health and safety, and information and communications technology services delivered through the Office of Information and Communications Technology. In exceptional circumstances, the Department will exercise delegated authority on behalf of client entities across the Secretariat. The Department will lead the implementation of the common administrative platform at Headquarters in New York, providing support to some 50 entities and their personnel in New York and, to various extents, their personnel located outside New York. The Department will also provide advisory support to guide the implementation of the common administrative platform in Bangkok and the establishment of additional common administrative platforms in Addis Ababa, Beirut, Geneva, Nairobi and Vienna.
- 29B.3 The Department will seek to strike an appropriate balance between direct service delivery and advisory support, adapting its approach to diverse client requirements and promoting a positive client experience. It will adapt its planning to anticipate and respond to changes in the operating environment, fostering a culture that is agile, responsive and forward-looking. The Department will also leverage technology, automation, innovation and high-quality data to simplify and streamline processes. In addition, it will assist relevant Secretariat actors in integrating positive legacy considerations into the planning and management of United Nations operations, including facilities, infrastructure and services, to maximize potential secondary benefits for host communities.
- 29B.4 With regard to cooperation with other entities at the global, regional, national and local levels, the Department will strengthen collaboration with Member States and regional organizations, including through capacity-building initiatives, knowledge-sharing and functional arrangements across areas of operational support, with a view to achieving the scale and effectiveness required to address complex operational challenges.
- 29B.5 With regard to inter-agency coordination and liaison, the Department will further advance its operating model for the provision of a comprehensive range of services within and beyond the United Nations Secretariat, guided by comparative advantage. In doing so, it will lead and coordinate a network of service providers, where the Department focuses its own efforts on enhancing service delivery and overall effectiveness.
- 29B.6 With regard to the external factors, the Department considered applicable risks identified in its risk register, and, accordingly, the overall plan for 2027 is based on the following planning assumptions:
- (a) There is adequate support from relevant stakeholders to enable the delivery of effective operational support solutions in challenging operating environments;

- (b) Requirements for crisis response and other special situations will not exceed the Department's capacity to respond.
- 29B.7 The Department integrates a gender perspective into its operational activities, deliverables and results, as appropriate. For example, activities will include camp design methodologies, improvements in the area of women's health, staffing initiatives such as the senior women talent pipeline, and advice to field entities, upon request, to enable them to meet targets related to gender parity. In order to encourage a more equitable approach to the Organization's supply chain, the Department will continue to strengthen outreach and training for vendors, including women-owned businesses.
- 29B.8 In line with the United Nations Disability Inclusion Strategy, the Department will support efforts to improve accessibility for persons with disabilities to the United Nations premises, to enable their full, meaningful and effective participation in the work of the United Nations, as outlined in result 3 under subprogramme 4. In addition, the Department will enhance accessibility for persons with disabilities to its training materials developed under subprogramme 1 component 2, and will further integrate disability inclusion across its global procurement activities, including through targeted outreach to disability-inclusive vendors under subprogramme 2, component 1.

Adjustments arising from the UN80 Initiative

- 29B.9 The proposed programme plan for 2027 reflects changes arising from the UN80 Initiative. In particular, the tables of deliverables reflect updated planned deliverables for 2026, in line with the approved programme budget for 2026. In addition, as outlined under paragraph 29B.2, the Department is leading the development and implementation of the common administrative platform in New York and supporting the implementation and/or establishment of common administrative platforms in other locations. These changes have also affected the targets for result 2 under subprogramme 3. Furthermore, payroll operations have been centralized into one team located in three global centres hosted at Headquarters in New York, the Regional Service Centre in Entebbe, Uganda, and the United Nations Office at Nairobi and reporting to the Department, as reflected in the updated strategy of subprogramme 4. Serving approximately 55,000 personnel, this consolidation of payroll functions will enhance internal controls, standardize processes and provide greater consistency and accountability in payroll services.
- 29B.10 Required adjustments to the Department's programme of work have also been implemented. Some changes enable greater efficiency and resilience, while others reflect efforts to maintain core functions. For example, the number of operational and language learning initiatives will not be further expanded, as reflected under result 2 under subprogramme 1, component 2. In the area of healthcare management, the implementation of healthcare quality and patient safety standards will follow a risk-based approach, with an initial emphasis on level 2+ hospital facilities where clinical complexity and patient safety risk are highest, as reflected in the updated strategy of subprogramme 1, component 3. The completion of facilities and commercial services requests will be scaled down, as reflected in the table of deliverables of subprogramme 4.
- 29B.11 The Department will be guided by any future decisions taken in the context of the UN80 Initiative, in accordance with the applicable rules and procedures, including decisions, resolutions and established practice of the competent intergovernmental organs. This includes, among others, any decisions concerning proposals to further consolidate operational support services.

Legislative mandates

- 29B.12 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

72/266 A; 72/266 B; 73/281; 77/267	Shifting the management paradigm in the United Nations	80/242	Questions relating to the proposed programme budget for 2026
76/274	Cross-cutting issues	80/243	Special subjects relating to the proposed programme budget for 2026
79/1	The Pact for the Future	80/244 A–C	Programme budget for 2026

Subprogramme 2 Supply chain management

Component 1 Integrated supply chain management

General Assembly resolution

69/273	Procurement
--------	-------------

Component 2 Uniformed capabilities support

General Assembly resolutions

50/222	Reform of the procedures for determining reimbursement to Member States for contingent-owned equipment	76/276	Rates of reimbursement to troop- and police-contributing countries
67/261	Report of the Senior Advisory Group established pursuant to General Assembly resolution 65/289 to consider rates of reimbursement to troop-contributing countries and other related issues	77/303	Triennial review of the rates and standards for reimbursement to Member States for contingent-owned equipment
76/275	Post-traumatic stress disorder framework	79/298; 80/240	Support account for peacekeeping operations

Subprogramme 3 Special activities

Security Council resolutions

2719 (2023)	2793 (2025)
-------------	-------------

Deliverables

29B.13 Table 29B.1 lists all cross-cutting deliverables of the programme.

Table 29B.1

Cross-cutting deliverables for the period 2025–2027, by category and subcategory

Category and subcategory	2025 planned	2025 actual	2026 planned	2027 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	4	4	4	4
Meetings of the:				
1. Fifth Committee	1	1	1	1
2. Advisory Committee on Administrative and Budgetary Questions	1	1	1	1
3. Committee for Programme and Coordination	1	1	1	1
4. Special Committee on Peacekeeping Operations	1	1	1	1
E. Enabling deliverables				
Administration: six meetings of the Management Client Board.				

Evaluation activities

- 29B.14 An evaluation of the Department's standing surge capacity mechanism, completed by the Department in 2025, has guided the proposed programme plan for 2027.
- 29B.15 In response to the results of the evaluation referenced above, the Department will implement recommendations to improve the efficiency of the standing surge capacity mechanism and explore opportunities to enhance the mechanism so that it goes beyond serving solely as a technical tool for crisis management, evolving into a more strategic approach that can be expanded across the United Nations common system.
- 29B.16 An evaluation of the walking blood bank project, to be conducted by the Department, is planned for 2027.

Programme of work**Subprogramme 1
Support operations****Component 1
Human resources support****Objective**

- 29B.17 The objective, to which this component contributes, is to strengthen the human resources capacity of all Secretariat entities, enable improved, simplified human resources processes and offer the Organization talented and diverse staffing pools.

Strategy

- 29B.18 To contribute to the objective, the component will:
- (a) Support Secretariat entities in the exercise of delegated authority in the area of human resources, including through:
 - (i) Specialized advisory support and guidance to human resources business partners across the Secretariat, including on dispute prevention and resolution, affiliated-personnel capacities and other entity-specific operational human resources needs;
 - (ii) Active engagement and regular analysis of support requests, with a view to communicating required policy changes to the Department of Management Strategy, Policy and Compliance on the basis of client needs;
 - (iii) Simplification and digitalization of human resources processes, tools and procedures, such as recruitment, rostering, testing and examination services, affiliated-personnel capacities and workforce planning, in cooperation with the Office of Human Resources and the Office of Information and Communications Technology;
 - (b) Offer high-quality and diverse pools of candidates by managing global Secretariat rosters across all job families;
 - (c) Administer the young professionals programme.
- 29B.19 The above-mentioned work is expected to result in:
- (a) Secretariat entities accountably, effectively and efficiently exercising their delegated human resources authority in support of their mandates;

- (b) Increased efficiencies and measurable reductions in delays and redundancies in human resources processes;
- (c) Strengthened capacity for the timely identification and recruitment of candidates and talent that are the best fit.

Programme performance in 2025

Secretariat entities receive comprehensive operational human resources support and guidance for restructuring and downsizing

- 29B.20 In the context of mission transitions, evolving operational priorities and resource constraints, several Secretariat entities have undertaken restructuring, downsizing and contingency planning measures. These developments have occurred alongside broader organizational reforms under the UN80 Initiative. The component provided extensive support to Secretariat entities with policy and operational guidance, including briefings, guidance materials and toolkits on the downsizing policy. This support was essential to maintain business continuity and mitigate the impact on staff and personnel during periods of significant change. The component also supported United Nations peace operations in implementing contingency planning measures and other entities undergoing downsizing related to reductions in extrabudgetary funding.
- 29B.21 Progress towards the objective is presented in the performance measure below (see table 29B.2).

Table 29B.2
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	—	9 peacekeeping missions and the United Nations Support Office in Somalia successfully implemented contingency planning
		68 entities received guidance on restructuring and downsizing in the context of the UN80 Initiative and reductions in extrabudgetary funding

Planned results for 2027

Result 1: improved performance management across the Secretariat

Programme performance in 2025 and target for 2027

- 29B.22 The component's work contributed to managers across the Secretariat's 105 entities being empowered to better manage performance and respond to issues related to performance management through guidance, briefings and training, which met the planned target.
- 29B.23 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.3).

Table 29B.3
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Managers and human resources practitioners in 48 client entities gain capacity and understanding on the different stages of the performance cycle and their responsibilities at each stage	Increased capacity of 47 human resources practitioners from 30 client entities to advise on complex performance management cases	Managers are empowered to better manage performance and respond to issues related to performance management through guidance, briefings and training	Human resources practitioners and managers increase their awareness and capacity in the area of performance management through lessons learned initiatives	Human resources practitioners and managers apply lessons learned to strengthen the implementation and consistency of performance management

Result 2: enhanced roster building and management for the global Secretariat**Programme performance in 2025 and target for 2027**

- 29B.24 The component's work contributed to client entities having access to updated guidance, enhanced Inspira tools such as the talent finder and the United Nations online examinations and tests system in order to streamline roster building and management, and to having access to refreshed, time-bound rosters for efficient and high-quality recruitment selections, which met the planned target. These efforts led to a 55 per cent reduction in roster memberships, reflecting the removal of outdated or inactive memberships.
- 29B.25 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.4).

Table 29B.4
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Increased collaboration and communication with stakeholders to ensure alignment and coherence	Increased comprehension by human resources stakeholders of the new global roster management approach to effectively manage the change	Client entities have access to enhanced Inspira tools, including the United Nations online examinations and tests system, to streamline roster building and management United Nations entities have access to refreshed, time-bound rosters for efficient and high-quality recruitment selections	Increased accuracy and efficiency of roster management	Candidates receive support with roster-related queries

Result 3: enhanced recruitment of gratis personnel**Proposed programme plan for 2027**

- 29B.26 The recruitment and nomination process for gratis personnel (gratis personnel type II and experts on non-reimbursable loan) relies on paper-based workflows, which create inefficiencies and lack transparency. Individual entities reach out to Member States separately by email, resulting in fragmented communication, limited visibility of opportunities and delays in processing nominations

and resumes. The component has undertaken measures to streamline and modernize the process. Efforts have focused on identifying bottlenecks in the existing system and assessing digital solutions to strengthen coordination and transparency.

Lessons learned and planned change

- 29B.27 The lesson for the component was the need to establish a centralized and efficient system to prevent delays, increase the visibility of opportunities and reduce administrative burden. In applying the lesson, the component has developed an automated online workflow in Inspira that consolidates all opportunities in a dedicated portal. This will enable entities to publish vacancies centrally, allow Member States to submit nominations online and facilitate candidates' direct application to vacancies. These enhancements will improve efficiency, accountability and equitable access to opportunities. The automated online workflow also allows managers to utilize existing screening tools in Inspira to review submitted applications in a more consistent, transparent and fair manner. The component will roll out the new workflow and provide training for entities and Member States' representatives.
- 29B.28 Expected progress towards the objective is presented in the performance measure below (see table 29B.5).

Table 29B.5
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	—	A centralized, automated workflow in Inspira is developed	Centralized automated workflow is rolled out, and awareness of Member States and United Nations entities on its use is raised	60 per cent of Member States and entities using the workflow report increased effectiveness and efficiency

Deliverables

- 29B.29 Table 29B.6 lists all deliverables of the component.

Table 29B.6
Subprogramme 1, component 1: deliverables for 2027, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: advice and guidance to Secretariat entities on all human resources issues, including escalation to the Department of Management Strategy, Policy and Compliance regarding authoritative policy interpretation, when necessary; affiliate-personnel administration; advice on attaining targets related to gender equality; talent programmes focused on field mission recruitment (e.g. senior women talent pipeline); examinations and tests, including the competitive examination for language positions for approximately 5,000 candidates, the young professionals programme for approximately 2,000 candidates and the language proficiency examination for approximately 6,000 participants; placement of approximately 60 young professionals programme roster candidates and reassignment of young professional staff members after their initial two years of service; refresh rosters across 23 job families; administration of the Inspira talent management platform for recruitment and rostering; management of the United Nations online examinations and tests system and related recruitment assessment content; guidance packages, advice and capacity-building on human resources delegation of authority, performance management, affiliate personnel administration, workforce planning, organizational design and roster management to facilitate the human resources planning process for all Secretariat entities; official status files in largely digital format for the efficient administration of peacekeeping personnel and towards a Secretariat-wide personnel records management system; and enhanced Umoja functionalities in support of human resources processes globally.

Component 2

Capacity development and operational training

Objective

- 29B.30 The objective, to which this component contributes, is to ensure that all Secretariat entities have the operational capacities necessary to effectively deliver on the mandates entrusted to them.

Strategy

- 29B.31 To contribute to the objective, the component will:
- (a) Design, develop and deliver a diverse portfolio of training and capacity-building services tailored to operational needs in collaboration with Secretariat entities; create and execute comprehensive training programmes across key operational areas, such as resources stewardship, data-related capacities and other support functions, including Umoja; and emphasize the integration of e-learning platforms and apply change management strategies to facilitate effective learning outcomes and seamless adaptation;
 - (b) Strengthen knowledge management and innovative information-sharing to boost operational effectiveness through standardized, accessible guidance and process improvement initiatives;
 - (c) Reinforce and refocus the language and communications training and resources to further advance linguistic diversity in the context of multilingualism.
- 29B.32 The above-mentioned work is expected to result in:
- (a) Stronger organizational governance by senior leadership teams, as well as better trained and empowered staff to support operational decision-making, resource management and improved operational processes;
 - (b) Knowledge management and learning management platforms that reach a broad spectrum of practitioners across the Secretariat, resulting in strengthened awareness and competence with regard to resource stewardship and other operational responsibilities;
 - (c) Greater linguistic capability and diversity and improved communication capacities across the Secretariat in support of multilingualism.

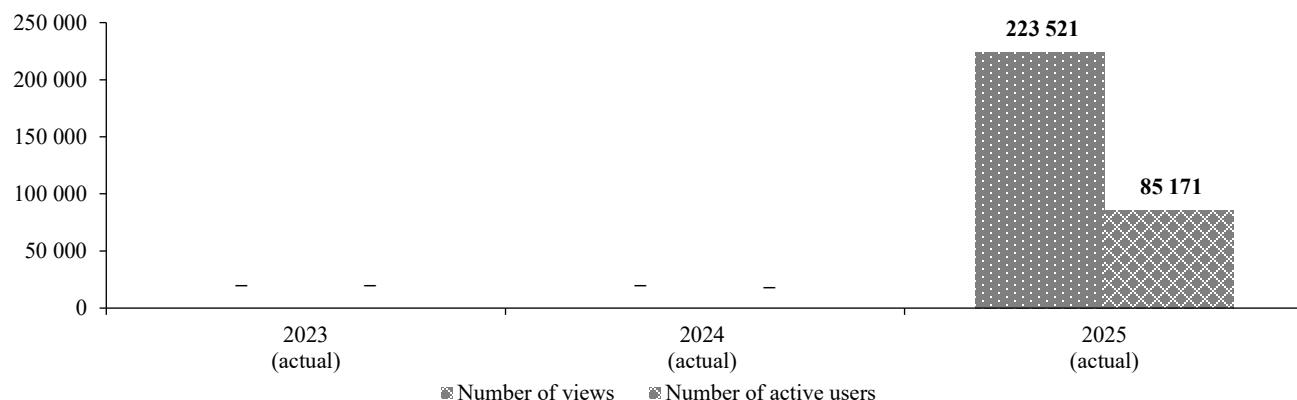

Programme performance in 2025

United Nations staff and personnel, Member States, job candidates and hiring managers have access to a centralized hub for language and communications skills

- 29B.33 In 2025, the component launched the first centralized digital platform for language and communications learning in the six official languages of the United Nations. The United Nations languages website established a standardized and structured language and communications learning ecosystem with diverse assets that span language development courses, high-impact communication workshops, self-assessment tools and customized training solutions in the six official languages, expanding the multilingual skills of the workforce at the Organization. The new platform functions as a resource hub for accessible, inclusive and innovative programming aligned with the United Nations Language Framework and illustrative multimedia samples of all levels in the six official languages. Sustained outreach during enrolment periods alongside the component's Secretariat-wide initiatives, including the flagship United Nations "Skills Fest", significantly furthered the visibility of and engagement with the new platform. Beneficiaries across the world, including United Nations staff, Member States, job candidates and hiring managers, gained a deeper familiarity of opportunities to enhance their language and communication skills, support career mobility and enhance job function and professional development.
- 29B.34 Progress towards the objective is presented in the performance measure below (see figure 29B.I).

Figure 29B.I

Performance measure: number of views and number of active users of the United Nations languages website

Planned results for 2027

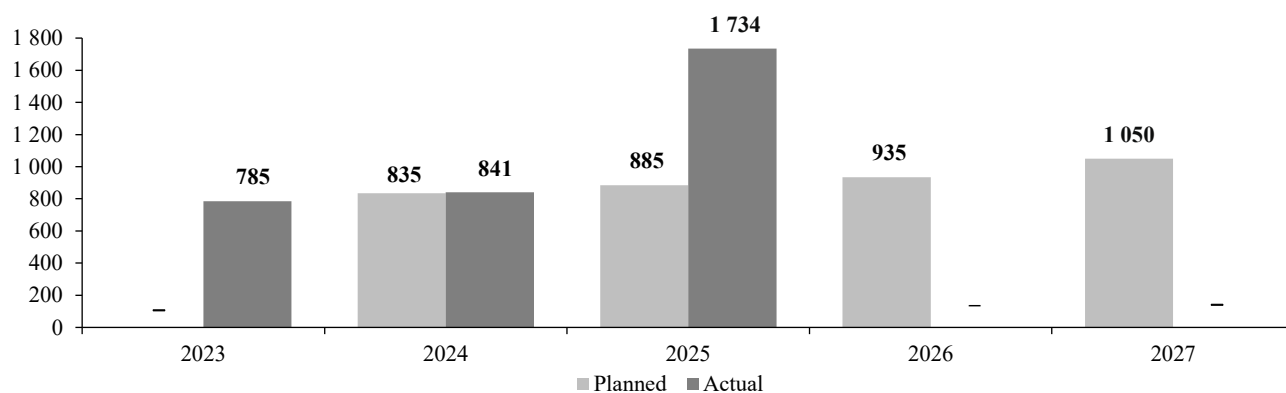

Result 1: UNTold: collective learning and innovation across the United Nations system

Programme performance in 2025 and target for 2027

- 29B.35 The component's work contributed to more than 1,734 personnel engaged in UNTold interactive learning sessions, which exceeded the planned target of 885.
- 29B.36 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 29B.II).

Figure 29B.II

Performance measure: number of United Nations personnel engaged in UNTold interactive learning sessions (annual)

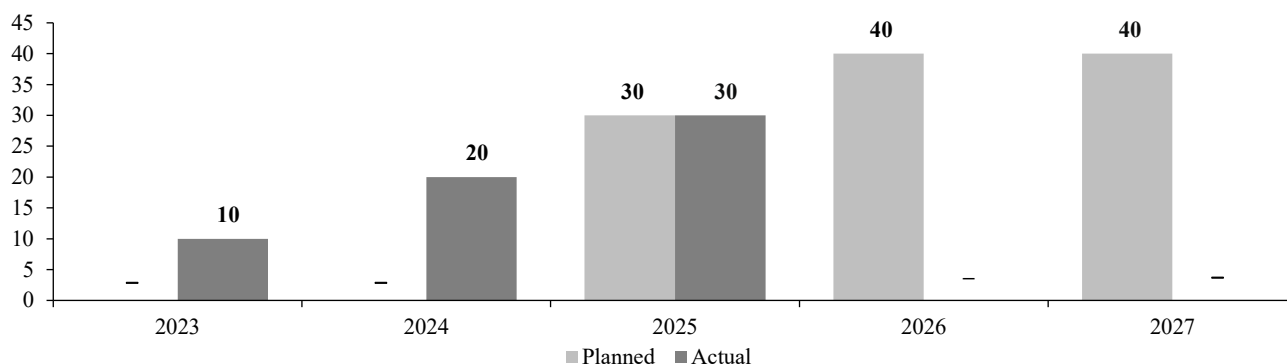

Result 2: strengthened organizational capabilities in innovation, data analytics, digital transformation, strategic foresight and behavioural science

Programme performance in 2025 and target for 2027

- 29B.37 The component's work contributed to 10 additional operational learning initiatives undertaken to strengthen organizational capabilities in innovation, data analytics, digital transformation, strategic foresight and behavioural science, which met the planned target.
- 29B.38 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 29B.III).

Figure 29B.III

Performance measure: number of operational learning initiatives to strengthen organizational capabilities in innovation, data analytics, digital transformation, strategic foresight and behavioural science (cumulative)

Result 3: improved availability and accessibility of administrative and operational guidance

Proposed programme plan for 2027

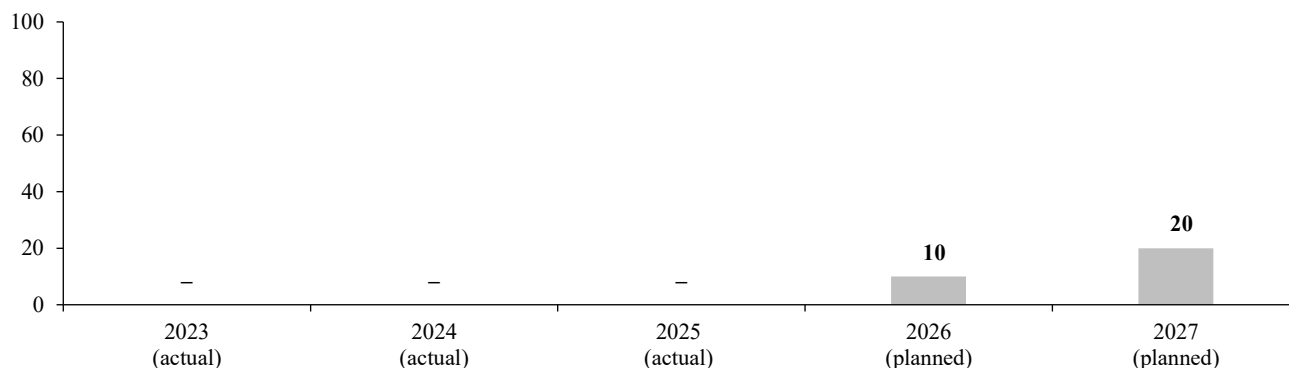

- 29B.39 Effective access to timely, accurate and harmonized administrative and operational guidance is essential for staff to perform their functions efficiently, in particular in an environment characterized by increased operational complexity, geographically dispersed duty stations and continuing resource constraints. The component has established the Knowledge Gateway as a centralized digital platform providing validated administrative and operational guidance and best practices across more than 148 thematic areas. The platform has proved to be highly effective, attracting more than 4 million views and supporting staff across the Secretariat in navigating administrative and operational requirements. Building on this strong foundation, the component will further enhance the Knowledge Gateway by leveraging digital technology to improve the discoverability, accessibility and usability of authoritative guidance.

Lessons learned and planned change

- 29B.40 The lesson for the component was that even highly utilized digital platforms required continuous improvement. Analysis of usage patterns and user feedback highlighted opportunities to further strengthen search and navigation capabilities to ensure that staff could locate relevant guidance as efficiently as possible at the point of need. In applying this lesson, the component will enhance the existing Knowledge Gateway through the introduction of an artificial intelligence-enabled chat search functionality, enabling more intuitive, query-based access to harmonized administrative and operational information, while continuing to rely on validated and authoritative sources.
- 29B.41 Expected progress towards the objective is presented in the performance measure below (see figure 29B.IV).

Figure 29B.IV

Performance measure: percentage of active users of the Knowledge Gateway that used the artificial intelligence-enabled chat search functionality (annual)

Deliverables

29B.42 Table 29B.7 lists all deliverables of the component.

Table 29B.7

Subprogramme 1, component 2: deliverables for 2027, by category and subcategory

Category and subcategory

E. Enabling deliverables

Administration: in-person, online and blended courses, workshops, guides, reference material, capacity development programmes and initiatives; in-person and virtual governance improvement programme for approximately 16 senior leadership staff from 2 United Nations Secretariat entities; instructor-led and self-paced language and communication training in all 6 official United Nations languages, including direct provision at United Nations Headquarters and other duty stations, with approximately 300 initiatives and the promotion of comparable online language learning for remote locations; training on the use of updated and simplified enterprise system workflows and business process improvement; and harmonized guidance and best practices across 148 thematic areas through the Knowledge Gateway platform, enhanced by artificial intelligence-enabled chat search functionality to support faster, more intuitive access to administrative and operational guidance for staff across the Secretariat.

Component 3

Healthcare management and occupational safety and health

Objective

29B.43 The objective, to which this component contributes, is to ensure the health and well-being of the United Nations workforce.

Strategy

29B.44 To contribute to the objective, the component will:

- (a) Ensure standardized credentialing for United Nations healthcare personnel, with priority given to high-risk and high-volume missions, so that healthcare personnel with appropriate qualifications and skills are deployed to field duty stations;
- (b) Implement healthcare quality and patient safety standards at all United Nations healthcare facilities at level 1+ and above, through selective facility assessments and the review of relevant quality and patient safety data;
- (c) Develop evidence-based health promotion and disease prevention guidance for implementation by United Nations medical services globally;
- (d) Implement key elements of workplace risk management for Secretariat entities, including incident reporting and oversight through policy, standards and guidance;
- (e) Maintain essential business processes for medical entitlements and medical operations, including the use of the electronic medical record system and the integration of data related to absence due to sickness, medical evacuations and service-incurred compensation;
- (f) Improve access of personnel of peace operations to health services, including women's and mental health services, in line with paragraph 42 (d) of the Pact for the Future.

29B.45 The above-mentioned work is expected to result in:

- (a) A reduction in adverse events and preventable harm through strengthened medical governance and patient safety oversight;
- (b) Continued identification and mitigation of priority workplace and health-related risks;

- (c) Sustained compliance with United Nations healthcare quality and patient safety standards in field and referral facilities.

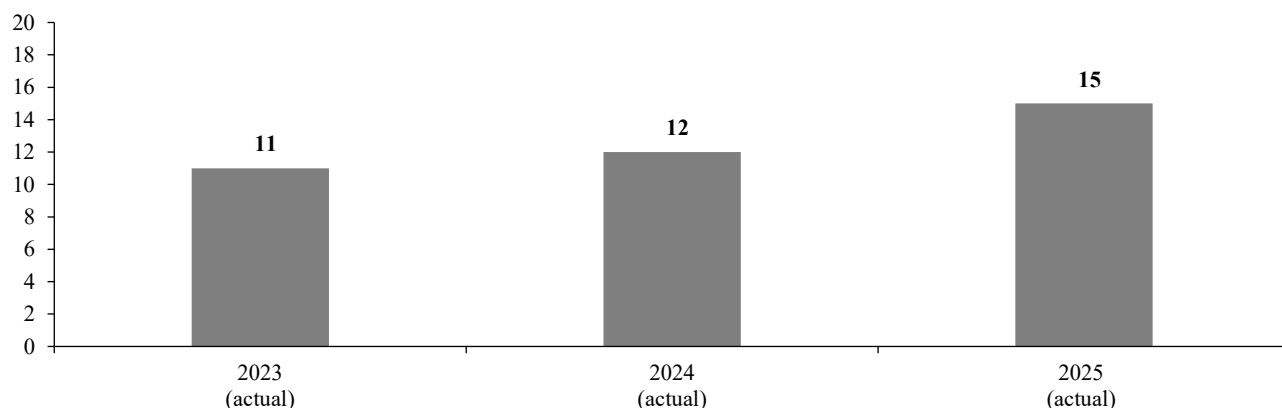

Programme performance in 2025

Improved preparedness to prevent and mitigate communicable disease risks affecting United Nations staff and personnel

- 29B.46 Communicable disease outbreaks continue to pose a significant risk to the health of United Nations staff and personnel and the continuity of operations, in particular in duty stations with limited health infrastructure or heightened exposure risks. The component has strengthened organizational preparedness by developing or updating comprehensive communicable disease risk mitigation plans, providing duty stations and staff with clear, practical guidance to prevent, detect and mitigate the risk of communicable disease outbreaks. These plans consolidate risk assessment prevention measures and response protocols, supporting consistent and timely action across diverse operating environments.
- 29B.47 Progress towards the objective is presented in the performance measure below (see figure 29B.V).

Figure 29B.V

Performance measure: number of up-to-date system-wide communicable disease risk mitigation plans in place (annual)

Planned results for 2027

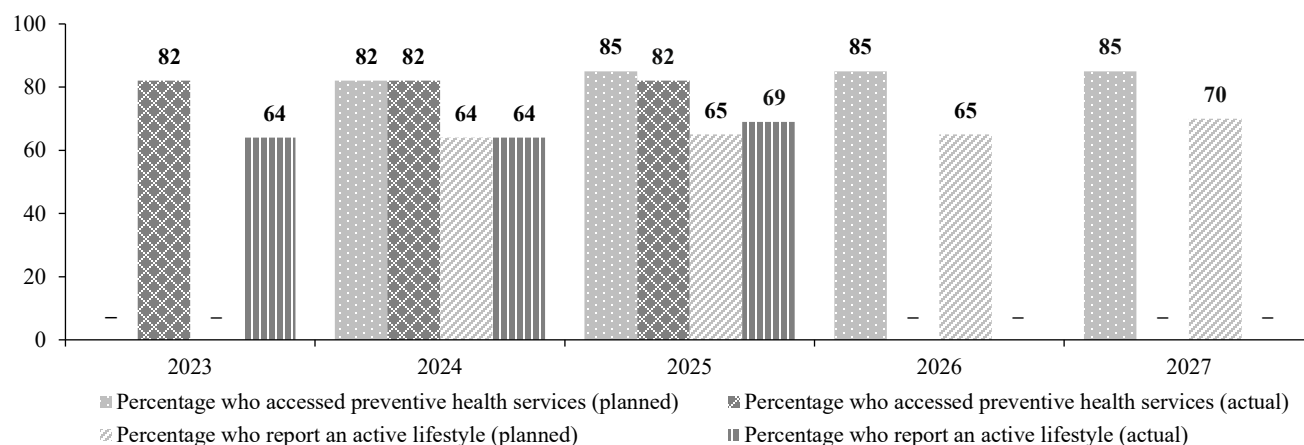

Result 1: United Nations personnel use preventive health services to improve their health and well-being

Programme performance in 2025 and target for 2027

- 29B.48 The component's work contributed to 82 per cent of United Nations personnel accessing preventive health services, which did not meet the planned target of 85 per cent, and 69 per cent reporting an active lifestyle, which exceeded the planned target of 65 per cent. The target was not met owing to factors related to individual uptake of preventive health services. The component will continue to raise the awareness of staff and personnel in this regard.
- 29B.49 Progress towards the objective and the target for 2027 is presented in the performance measure below (see figure 29B.VI).

Figure 29B.VI

Performance measure: improved health and well-being of United Nations personnel^a

Result 2: improved quality of patient care

Programme performance in 2025 and target for 2027

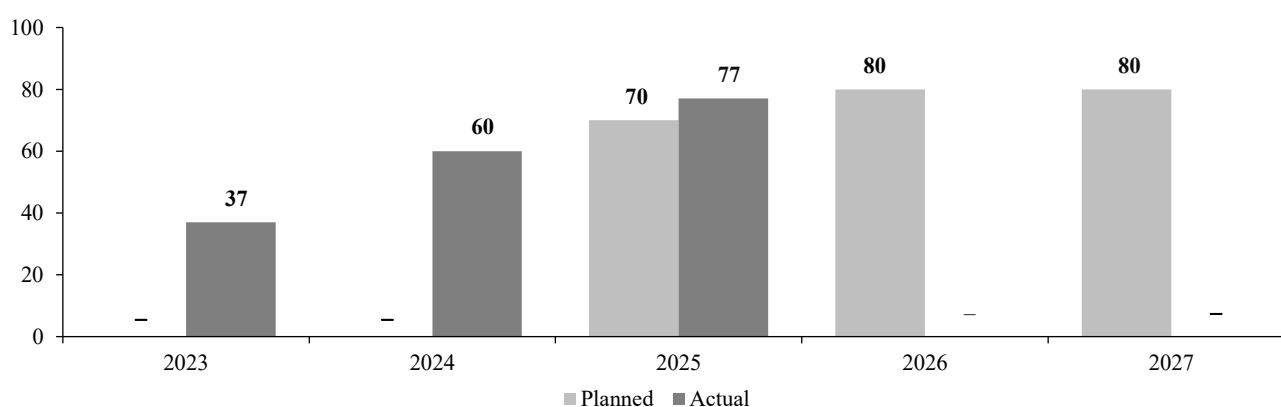

29B.50 The component's work contributed to 77 per cent of United Nations clinics being compliant with established clinical standards or pathways, which exceeded the planned target of 70 per cent.

29B.51 Progress towards the objective and the target for 2027 is presented in the performance measure below (see figure 29B.VII).

Figure 29B.VII

Performance measure: compliance rates of United Nations clinics with clinical standards or pathways (annual)

(Percentage)

Result 3: enhanced access to digital mental health support for peacekeeping personnel

Proposed programme plan for 2027

29B.52 Peacekeeping personnel face heightened psychological stress arising from operational exposure, isolation and complex security environments. The component develops and deploys digital mental health tools and resources designed to be accessible, scalable and suitable for diverse field settings. Building on work undertaken in prior years, the component has expanded the availability of digital mental health support products for both uniformed and civilian peacekeeping personnel, facilitating early access to guidance, self-support tools and referral pathways.

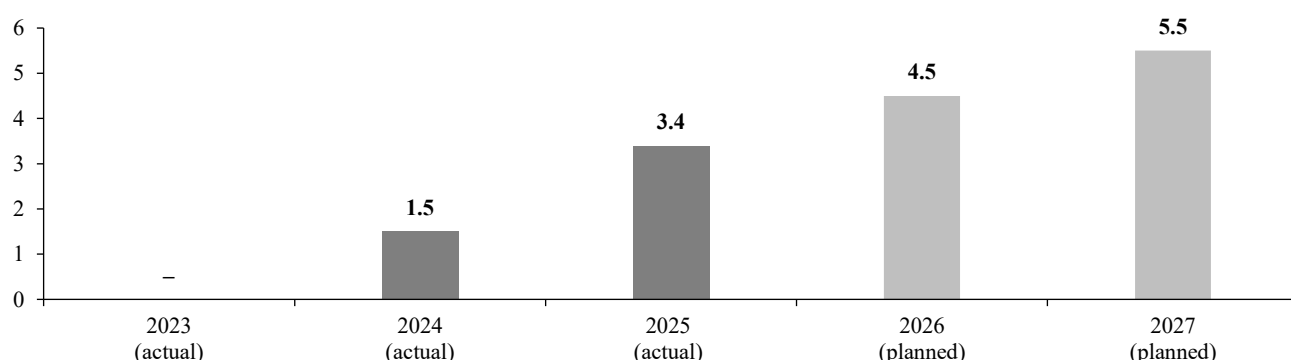

Lessons learned and planned change

- 29B.53 The lesson for the component was that digital delivery mechanisms enabled the broader, more timely and cost-effective reach of mental health support in peace operations, in particular where in-person services were limited. In applying this lesson, the component will prioritize the use of standardized digital means for providing mental health support rather than expanding resource-intensive in-person models and will focus on increasing the awareness and accessibility of existing tools.
- 29B.54 Expected progress towards the objective is presented in the performance measure below (see figure 29B.VIII).

Figure 29B.VIII

Performance measure: United Nations peacekeeping uniformed and civilian personnel who had access to digital mental health support resources (annual)

(Percentage)

- 29B.55 Table 29B.8 lists all deliverables of the component.

Table 29B.8

Subprogramme 1, component 3: deliverables for 2027, by category and subcategory

Category and subcategory

E. Enabling deliverables

Healthcare management and occupational safety and health: credentialing process for healthcare personnel in compliance with the guidelines for technical clearances and the technical skills framework; medical clearance of personnel for recruitment and travel and immunizations of personnel; guidance on global occupational health and safety services; advice on workplace accommodation and occupational ergonomics; field health support plans for field duty stations and field missions, upon request; assessment of field hospitals for compliance with healthcare quality and patient safety standards, and training medical personnel on those standards; patient experience surveys; online courses on women's health and emergency hemotherapy; training on occupational health and safety issues and on medical entitlement for field health case managers; guidance for public health emergencies; assessments on emergency preparedness, including for mass casualty events; and emergency preparedness and response.

Subprogramme 2 Supply chain management

Component 1 Integrated supply chain management

Objective

- 29B.56 The objective, to which this component contributes, is to ensure the availability of the right goods and services at the right place, the right time and the right costs for effective and efficient mandate implementation by United Nations Secretariat client entities.

Strategy

29B.57 To contribute to the objective, the component will:

- (a) Improve alignment of the Secretariat's end-to-end supply chain with the 2030 Agenda for Sustainable Development and operationalize 24-month rolling supply chain planning, for continuous monitoring and update of supply chain plans to meet operational requirements and priorities;
- (b) Identify and ensure the availability of appropriate sourcing options and solutions, such as global and regional systems contracts, local procurement, letters of assist and memorandums of understanding, or the leveraging of existing stock;
- (c) Continue outreach efforts to facilitate diversity and proportionate participation in business opportunities with the United Nations, including through targeted outreach to Member States and the enhanced use of business seminars, in particular for women-owned and disability-inclusive businesses and vendors from developing countries and countries with economies in transition;
- (d) Maintain the list of strategic goods and services sourced through Headquarters to improve risk management in procurement, economies of scale and standardization;
- (e) Support all entities with the timely and effective sourcing and delivery of goods and services, including the fulfilment of unforeseen requirements.

29B.58 The above-mentioned work is expected to result in:

- (a) The availability of the right goods and services at the right time, while taking into consideration their full cost of ownership;
- (b) Client entities gaining access to appropriate, effective and efficient sourcing and delivery solutions to implement their mandates;
- (c) A more diversified vendor roster for more inclusive and effective international competition.

Programme performance in 2025

Safe and timely repatriation of uniformed personnel in line with mission contingency plans

29B.59 The liquidity crisis faced by the Organization has entailed significant challenges for peacekeeping operations. In 2025, the Secretary-General requested that all peacekeeping missions funded under the peacekeeping budget implement their contingency plans for a 15 per cent reduction in expenditure. This has necessitated a reduction in the size of military and police units in peacekeeping operations and the repatriation of some uniformed personnel. The component worked closely with all field missions to ensure the safe and timely repatriation of uniformed personnel. This effort was far more complex than a routine repatriation because it required urgent, large-scale, contingency-driven movements under severe time, financial, logistical and diplomatic pressures that far exceeded normal rotational planning. The approach emphasized minimizing the impact on mandate delivery and personnel while maintaining strategic engagement with stakeholders. As a result of the effort, in close coordination with field missions 10,785 uniformed personnel were repatriated between 8 October and 31 December 2025, representing 74.1 per cent of the total number of uniformed personnel to be repatriated as part of the mission contingency plans.

29B.60 Progress towards the objective is presented in the performance measure below (see table 29B.9).

Table 29B.9
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	—	Safe and timely repatriation of 10,785 uniformed personnel between 8 October and 31 December 2025

Planned results for 2027

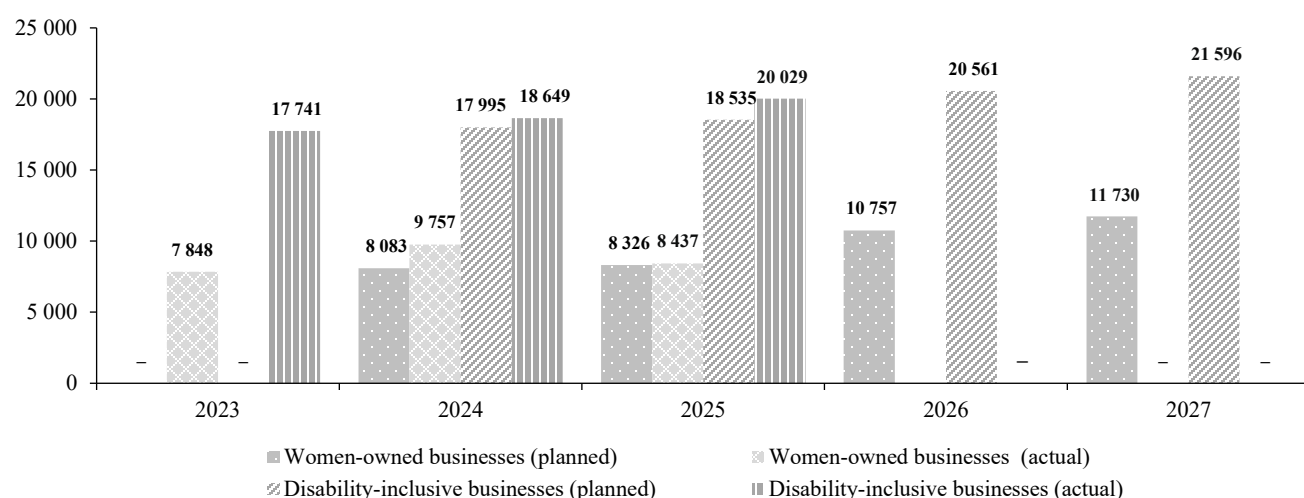

Result 1: diversified participation in United Nations business opportunities

Programme performance in 2025 and target for 2027

- 29B.61 The component's work contributed to 8,437 women-owned businesses and 20,029 disability-inclusive businesses registered in the United Nations Global Marketplace, which exceeded the planned targets of 8,326 and 18,535, respectively.
- 29B.62 Progress towards the objective and the target for 2027 is presented in the performance measure below (see figure 29B.IX).

Figure 29B.IX

Performance measure: number of women-owned and disability-inclusive businesses registered in the United Nations Global Marketplace (cumulative)

Result 2: increased availability of on-call logistics solutions

Programme performance in 2025 and target for 2027

- 29B.63 The component's work contributed to United Nations Secretariat entities having access to logistical solutions through new or existing partnerships with Member States, including three air transport arrangements to enable the airlift and transportation of cargo and passengers, as well as logistical support related to fuel, the maintenance of vehicles, accommodation and ground handling, among others, which met the planned target.
- 29B.64 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.10).

Table 29B.10
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	—	United Nations Secretariat entities have access to logistical solutions through new or existing partnerships with Member States, including three air transport arrangements and other logistical support	Agencies, funds and programmes have access to logistical solutions through new or existing partnerships with Member States	United Nations entities, including agencies, funds and programmes have access to additional logistical solutions through new or existing partnerships with Member States

Result 3: integrated supply chain solutions for humanitarian and complex environments**Proposed programme plan for 2027**

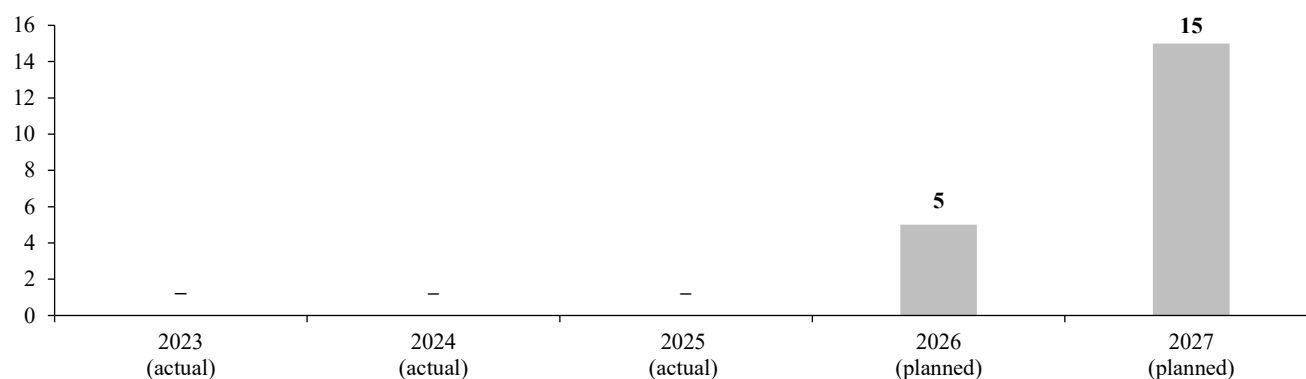

- 29B.65 As part of the humanitarian reset, the component has been supporting a system-wide initiative to reprioritize resources and streamline operations in response to reduced humanitarian funding, with a view to enabling the United Nations to “deliver as one” through more efficient and integrated supply chain solutions. In collaboration with the Office for the Coordination of Humanitarian Affairs, the United Nations Children’s Fund and the World Food Programme, the component developed an integrated approach to delivering supply chain solutions in humanitarian and complex operational environments.

Lessons learned and planned change

- 29B.66 The lesson for the component was that fragmented, entity-specific arrangements limited the ability of the United Nations system to deliver in a coherent manner, reduce the efficiency and timeliness of support and increase operational burdens on field teams. In applying the lesson, the component will operationalize an integrated approach focused on three areas: (a) coordinated procurement of key items through demand aggregation, technical collaboration, joint market engagement and strategic contracting; (b) optimizing global freight by pooling access to optimized global logistics services and leveraging pre-negotiated contracts, established supplier networks and shared infrastructure; and (c) harmonized in-country logistics, including import processing, customs clearance, warehousing, inventory management and humanitarian fleet operations. This approach will improve the speed and reliability of international transport and upstream logistics, reduce burdens on field teams and enable the more efficient delivery of assistance. The integrated service offer will be provided as an opt-in model, with services provided on a transparent, full cost-recovery basis, enabling entities to reduce or phase out duplicative capacities, as appropriate, while respecting mandates.
- 29B.67 Expected progress towards the objective is presented in the performance measure below (see figure 29.B.X).

Figure 29B.X

Performance measure: number of entities served by at least one integrated supply chain solution in humanitarian or complex operational environments (cumulative)

Deliverables

29B.68 Table 29B.11 lists all deliverables of the component.

Table 29B.11

Subprogramme 2, component 1: deliverables for the period 2025–2027, by category and subcategory

Category and subcategory	2025 planned	2025 actual	2026 planned ^a	2027 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	1	1	–	1
1. Report of the Secretary-General on supply chain activities to the General Assembly (biennial report)	1	1	–	1
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	54	38	46	38
2. Seminars on how to do business with the United Nations for suppliers from developing countries and countries with economies in transition	54	38	46 [54]	38
C. Substantive deliverables				
Consultation, advice and advocacy: advice on local procurement authority requests from client entities.				
D. Communication deliverables				
Outreach programmes, special events and information materials: briefings for 6 international partners, including Member States, on functional arrangements within areas of logistical cooperation in all field missions, system-wide cooperation on business operation projects and procurement cases with the United Nations entities procurement network; and outreach to vendors.				
Digital platforms and multimedia content: e-catalogue for goods and services; Ariba eTendering platform; supply chain performance management framework; business intelligence reports for all functions in the Secretariat-wide supply chain, including on supply chain performance; dedicated virtual space to encourage innovation and excellence in supply chain management; and annual update of Secretariat procurement statistics.				
E. Enabling deliverables				
Administration: advisory services on procurement matters for 44 client entities, including on optimal acquisition plans, sourcing solutions, system contracts, procurement modalities and other supply chain matters; annual supply chain plan and strategic sourcing; operationalized mutual recognition, in line with the promulgated supply chain operational guidance on cooperation with United Nations organizations; global systems contracts and turnkey contracts, air transportation service contracts and other contracts; vendor registration documents in the 6 official United Nations languages; strategic-level support within the logistics specialist areas; system-wide aviation regulatory framework; guidance on aviation safety, including that related to air service vendors; operational guidance, manuals, contract performance evaluation tools and best practices on supply chain management; and Umoja master data management and data quality assurance.				

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 29B).

Component 2

Uniformed capabilities support

Objective

- 29B.69 The objective, to which this component contributes, is to ensure the efficient and effective functioning of the peace and security pillar of the United Nations.

Strategy

- 29B.70 To contribute to the objective, the component will:
- (a) Serve as the single point of contact for troop- and police-contributing countries on all administrative and logistical issues related to force generation, memorandums of understanding, contingent-owned equipment and reimbursement;
 - (b) Support the periodic review by the General Assembly of the reimbursement framework associated with uniformed capabilities deployed in formed units, support the negotiation and finalization of memorandums of understanding with troop- and police-contributing countries, expeditiously process applicable reimbursements in line with the decisions of the Assembly and facilitate the strategic integration of relevant performance data related to deployed contingent-owned equipment;
 - (c) Provide a streamlined reimbursement process involving an enhanced memorandum of understanding and payment processes;
 - (d) Provide strategic and operational support and foster enhanced partnerships with troop- and police-contributing countries.
- 29B.71 The above-mentioned work is expected to result in:
- (a) Servicing of the General Assembly during the periodic review of the reimbursement framework for formed units and the implementation of all derivative guidance;
 - (b) Streamlined and timely payments to troop- and police-contributing countries for uniformed personnel and contingent-owned equipment deployed in formed units, letter-of-assist reimbursements, death and disability claims and ad hoc claims;
 - (c) Increased transparency and accountability of the reimbursement process and the real-time availability of data to Member States, Headquarters and field missions.

Programme performance in 2025

Peacekeeping missions implement contingency plans that enabled cost reductions

- 29B.72 The liquidity crisis faced by the Organization has entailed significant challenges for peacekeeping operations. In 2025, the Secretary-General requested that all peacekeeping missions funded under the peacekeeping budget implement their contingency plans for a 15 per cent of reduction in expenditure. This has necessitated a reduction in the size of military and police units in peacekeeping operations and the repatriation of some uniformed personnel. The component provided comprehensive support to eight missions through guidance on key operational aspects, including the issuance of cessation of operations through fragmentation orders, a proportionate reduction in contingent-owned equipment, the verification, reporting and reimbursement framework and timely amendments to various memorandums of understanding. These measures enabled the implementation of contingency plans and related cost reductions in uniformed personnel and contingent-owned equipment.
- 29B.73 Progress towards the objective is presented in the performance measure below (table 29B.12).

Table 29B.12
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	—	Peacekeeping missions implemented contingency plans, which enabled cost reductions related to uniformed personnel and contingent-owned equipment

Planned results for 2027**Result 1: a secure one-stop-gateway for Member States to submit claims and access information on their deployments to peace operations****Programme performance in 2025 and target for 2027**

- 29B.74 The component's work contributed to troop- and police-contributing countries using the Member States Portal for Uniformed Capabilities Support to securely gain access to reimbursement information on death and disability claims, contingent-owned equipment claims, uniformed personnel reimbursement claims and letter of assist claims, which did not meet the planned target of troop- and police-contributing countries using the Member States Portal for Uniformed Capabilities Support to submit claims and securely gain access to memorandums of understanding and reimbursement information. The target was not met owing to liquidity constraints, which entailed delays in developing the functionality in the portal for the submission of claims. This functionality is to be implemented in 2026. In addition, in the light of the delays experienced, it is anticipated that functionalities to gain access to letters related to payments and reimbursements and contingent-owned equipment verification reports will be implemented only in 2027.
- 29B.75 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.13).

Table 29B.13
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
The Member States Portal for Uniformed Capabilities Support provides basic information and visualizations	Functionalities were further enhanced to provide more detailed information on the status of death and disability claims	Troop and police-contributing countries use the Member States Portal for Uniformed Capabilities Support to obtain the most recent reimbursement information on death and disability claims, contingent-owned equipment claims, uniformed personnel reimbursement claims and letter of assist claims	Troop- and police-contributing countries use the Member States Portal for Uniformed Capabilities Support to directly access payment letters, quarterly reimbursement letters and final quarterly contingent-owned equipment verification reports	Troop- and police-contributing countries use the Member States Portal for Uniformed Capabilities Support to directly access payment letters, quarterly reimbursement letters and final quarterly contingent-owned equipment verification reports, and to submit claims

Result 2: updated policies, procedures, standards and definitions for uniformed personnel and contingent-owned equipment

Programme performance in 2025 and target for 2027

- 29B.76 The component's work contributed to the nomination of the sample group for the quadrennial survey and the commencement of data collection, the completion of the mandated studies from the 2023 Working Group on Contingent-Owned Equipment, and the convening of the pre-session bureau of the 2026 Working Group on Contingent-Owned Equipment, which met the planned target.
- 29B.77 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.14).

Table 29B.14
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Standards and rates of reimbursement for contingent-owned equipment were updated on the basis of the 57 recommendations of the 2023 Working Group on Contingent-Owned Equipment	Member States received guidance on preparing issue papers and national cost data for the 2026 Working Group on Contingent-Owned Equipment	Sample group for the quadrennial survey nominated Completion of the mandated studies from the 2023 Working Group on Contingent-Owned Equipment Pre-session bureau of the 2026 Working Group on Contingent-Owned Equipment convened	General Assembly receives the survey on the standard rate of reimbursement for uniformed personnel deployed in formed units Standards and rates of reimbursement for the Working Group on Contingent-Owned Equipment updated on the basis of the recommendations of the 2026 Working Group on Contingent-Owned Equipment	Implementation of the decisions of the General Assembly on the standards for and rates of reimbursement for contingent-owned equipment

Result 3: strengthened management of contingent-owned ammunition

Proposed programme plan for 2027

- 29B.78 Effective ammunition management is critical to ensure operational readiness, accountability and safety, while minimizing risks of diversion, loss or accidental incidents. Managing ammunition inventory can help to ensure the accurate tracking, transparency and life-cycle monitoring of ammunition, enabling informed decision-making, timely reporting and oversight across field missions. The component manages the Uniformed Capabilities Management System, a platform that streamlines and enables end-to-end planning for uniformed capabilities management for troop- and police-contributing countries.

Lessons learned and planned change

- 29B.79 The lesson for the component was that the absence of a centralized repository for ammunition limited the ability of field missions and Headquarters to monitor ammunition status and plan for timely disposals and replenishments. In applying the lesson, the component developed, in close coordination with the Department of Peace Operations, field missions and the Office of Information and Communications Technology, a new module in the Uniformed Capabilities Management System to record, monitor and manage contingent-owned ammunition. This ammunition management module will standardize the ammunition inventory across all missions and enable field missions to

generate inspections and record all transactions throughout the life cycle of the contingent-owned ammunition. This module will be further enriched to include performance analyses and data reporting, as well as additional functionalities related to ammunition claims and reimbursements.

29B.80 Expected progress towards the objective is presented in the performance measure below (see table 29B.15).

Table 29B.15
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	—	Ammunition management module launched in the Uniformed Capabilities Management System	Enhanced operational readiness and increased compliance with ammunition management standards through additional functionalities of the ammunition management module to provide reports and analysis of ammunition inventory	Increased accountability through additional functionalities of the ammunition management module to provide rates, submit claims and gain access to reimbursement information

Deliverables

29B.81 Table 29B.16 lists all deliverables of the component.

Table 29B.16

Administration: reimbursement framework for formed units, including: the quadrennial survey on standard uniformed personnel reimbursements; administration of the Member States Portal for Uniformed Capabilities Support; training for Secretariat entities and all field missions with formed units on the reimbursement framework; new and amended statements of unit requirements, memorandums of understanding, letters of assist and agreements for military and police contingents deployed to field missions or pledged to the rapid deployment level of the Peacekeeping Capability Readiness System and participation in advisory, predeployment, rapid deployment-level, contingent-owned equipment verification and other visits to troop- and police-contributing countries; reimbursements to military and police personnel and for contingent-owned equipment deployed to field missions on memorandums of understanding or letters of assist, including through the calculation of premiums, deductions and death and disability and post-traumatic stress disorder compensation; servicing of the Contingent-Owned Equipment/ Memorandum of Understanding Management Review Board; and comparative performance analysis and management decision reports.

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 29B).

Subprogramme 3 Special activities

Objective

- 29B.82 The objective, to which this subprogramme contributes, is to ensure effective and efficient operational support responses by the Secretariat, including for unique and escalated requirements.

Strategy

- 29B.83 To contribute to the objective, the subprogramme will:
- (a) Lead and coordinate the Secretariat's operational support response to emerging situations and other unique and surge-level requirements, including through planning support and monitoring, shared situational awareness, the provision of surge and specialized capacities and the facilitation of coordinated efforts;
 - (b) Lead efforts to redesign and strengthen the capacities, efficiency and responsiveness of the Secretariat's operational support architecture, including by working with Secretariat and United Nations system entities on the establishment and implementation of the common administrative platforms, global payroll services and the United Nations system unified services road map, as well as by providing direct support for the establishment and implementation of United Nations system partnerships for Secretariat entities;
 - (c) Coordinate and maintain bilateral and other multiparty relationships with key non-Secretariat partners in operational support, including on the implementation of Security Council resolution 2719 (2023).
- 29B.84 The above-mentioned work is expected to result in:
- (a) Sustainable and multidimensional operational response to escalated situations and unique requirements;
 - (b) Fit-for-purpose support solutions that leverage existing capacities and expertise across the Secretariat and with United Nations agencies, funds and programmes to enhance efficiency, responsiveness, interoperability and operational continuity;
 - (c) Mutually beneficial collaboration between Secretariat and non-Secretariat entities, including Member States and regional organizations, that addresses priority needs across Secretariat entities;

- (d) Measurable gains in efficiency and responsiveness across the Secretariat operational support architecture, including deepened cooperation in support operations with United Nations agencies, funds and programmes.

Programme performance in 2025

United Nations Support Office in Haiti established

- 29B.85 In 2025, the Security Council adopted resolution [2793 \(2025\)](#), by which it requested the Secretary-General to establish the United Nations Support Office in Haiti (UNSOH) to provide support, primarily to the Gang Suppression Force, the United Nations Integrated Office in Haiti, the Haitian National Police and the Haitian armed forces, on any joint operations with the Force, as well as technical support to the Organization of American States. Following the adoption of the resolution, the subprogramme immediately initiated and led all action necessary for the establishment of UNSOH. Key achievements, in close collaboration and cooperation with other Secretariat entities, included the preparation and signing of an agreement with the Government of Haiti regarding the grant, occupancy and use of land and premises; the designation of the Dominican Republic as the medical evacuation destination for UNSOH-supported personnel and consent to host an office for non-location-dependent functions to be operationalized on 20 January 2026; the preparation of a template memorandum of understanding concerning reimbursement of eligible categories of contingent-owned equipment in relation to the Gang Suppression Force in Haiti, to be concluded with countries contributing personnel to the Force; the preparation of a draft agreement between the United Nations and the Government concerning the status of UNSOH; and the initiation of procurement action for critical requirements of UNSOH, including civilian aviation capability, medical evacuation services, the provision of rations and fuel, medical services, freight forwarding and the establishment of infrastructure to support the Gang Suppression Force and UNSOH.
- 29B.86 Progress towards the objective is presented in the performance measure below (table 29B.17).

Table 29B.17

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	—	United Nations Support Office for Haiti established, with several actions undertaken to operationalize the Office
		An advance team to support immediate needs was in place by early 2026

Planned results for 2027

Result 1: enhanced through-life management of operational support functions by entities undergoing transitions

Programme performance in 2025 and target for 2027

- 29B.87 The subprogramme's work contributed to further development of the operational support monitoring tool by aligning it with the internal controls framework and developing Umoja-based reporting to increase the automation and accuracy of the tool, which did not meet the planned target of the tool and related training being available to field entities. The target was not met owing to limited extrabudgetary resources available to complete the development of the tool and provide training to field entities. The tool is now expected to be finalized by 2027, subject to the availability of extrabudgetary resources.
- 29B.88 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.18).

Table 29B.18
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
–	MINUSMA utilized the beta version of the operational support monitoring tool in its work managing the liquidation process	Operational support monitoring tool further developed by aligning it with the internal controls framework and developing Umoja-based reporting, to increase the automation and accuracy of the tool	Refined operational support monitoring tool and related training is available for field entities	Operational support monitoring tool and related training is available for field entities

Result 2: efficient and improved service delivery through enhanced support and advisory services**Programme performance in 2025 and target for 2027**

- 29B.89 The subprogramme's work contributed to the development of three common back offices, in Colombia, Pakistan and Zimbabwe, and two Secretariat shared services being available in an expanded solution across the United Nations system, which did not meet the planned target of the full realization of the United Nations common back office initiative in three countries for all Secretariat entities. The planned target was not met owing to a shift in focus of the subprogramme's work to implement the UN80 Initiative, in particular the development of the common administrative platforms and consolidation of payroll functions, the United Nations system unified services road map and other initiatives under the High-Level Committee on Management. The common back offices in Pakistan and Zimbabwe are expected to launch in the second quarter of 2026 and the common back office in Colombia is projected to launch by the third quarter of 2026.
- 29B.90 With regard to the planned target for 2026 on expanded shared service solutions across the United Nations system, a feasibility study has been undertaken, in the light of the UN80 Initiative, to assess strategic options on the future state for global shared services within the United Nations system. This will revise the framework and approach through which this target will be pursued.
- 29B.91 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.19).

Table 29B.19
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
–	–	Development of three common back offices, in Colombia, Pakistan and Zimbabwe Two Secretariat shared services available in an expanded solution	Full realization of the United Nations common back office initiative in five additional countries for all Secretariat entities Two additional Secretariat shared services available	Expansion of the common administrative platforms from two to seven

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
		across the United Nations system	in an expanded solution across the United Nations system	

Result 3: strengthened support partnership arrangements

Proposed programme plan for 2027

- 29B.92 The Department has put in place a support partnership framework to facilitate an active approach to establishing and drawing on partnership arrangements within the Department and across the Secretariat. As part of this effort, the Department introduced support guidelines in reviewing and managing support partnership arrangements in a more consistent and coordinated manner, helping to clarify roles and streamline internal processes.

Lessons learned and planned change

- 29B.93 The lesson for the subprogramme was that, notwithstanding the establishment of a support partnership framework and related institutional partnership initiatives, gaps remained in translating partnership engagement into consistent practice. While initial scoping and relationship-building with designated focal points has helped to identify opportunities for cooperation with key partners, these efforts have not always progressed to formalized arrangements or sustained implementation. In applying the lesson, the subprogramme will establish a departmental-wide governance mechanism to provide strategic direction for support partnerships, ensure alignment with operational priorities and support accountability for advancing partnerships from engagement to delivery. This will help to strengthen coherence, clarify roles and ownership and reinforce a more results-oriented approach to support partnerships.
- 29B.94 Expected progress towards the objective is presented in the performance measure below (see table 29B.20).

Table 29B.20
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	—	Secretariat entities have access to guidelines on the review and management of support partnership arrangements and a related information repository	Secretariat entities have strengthened understanding of the support partnerships framework through outreach and awareness-raising	Secretariat entities receive more consistent, responsive and tailored support through strengthened partnership arrangements with external stakeholders, enabled by the support partnership framework

Deliverables

- 29B.95 Table 29B.21 lists all deliverables of the component.

Table 29B.21

Subprogramme 3: deliverables for 2027, by category and subcategory*Category and subcategory***E. Enabling deliverables**

Administration: 52 regular situational response and awareness reports; standardized procedures for escalated situations and an emerging situation data management platform; deployments of surge and specialized support capacities within 10 days; administration of residual entity liquidation issues; support partnerships, including arrangements that address client priority needs; project management of common administrative platform establishment (phase II) in New York; management of integrated performance management and knowledge management frameworks for common administrative platforms; operational support reviews in support of clients undertaking General Assembly-mandated spending reviews; assignment of shared service providers to 5 Secretariat entities; support programme and package to 5 Secretariat entities entering into United Nations system self-starter common back office arrangements; and training programme and package on the use of the operational monitoring tool deployed to entities undergoing transitions.

Subprogramme 4

Administration, New York

Objective

- 29B.96 The objective, to which this subprogramme contributes, is to ensure a safe and fit-for-purpose physical environment at Headquarters and responsive facilities, as well as administrative, logistical, information and other services in support of the efficient functioning of the Organization and a public informed of the work of the United Nations.

Strategy

- 29B.97 To contribute to the objective, the subprogramme will:
- (a) Proactively maintain and operate the Headquarters buildings to achieve efficiencies, promote a modern workplace and preserve the property value of the campus, with an emphasis on reviewing building components completed more than 10 years ago and improving accessibility for persons with disabilities and environmental sustainability;
 - (b) Regularly adjust the long-term planning of office accommodation to support the needs of entities in New York, centred on implementing the recommendations from the mandated assessment of the real estate portfolio (see General Assembly resolution [75/253 C](#));
 - (c) Provide efficient, timely and cost-effective services to clients in New York in the areas of building management, office space, asset and official gift management, inventory and warehouse management, travel and transportation, mail and pouch services, event management, postal administration and catering and other commercial operations;
 - (d) Provide effective archives and records management services to Secretariat entities globally and strengthen the subprogramme's capacity to manage the accelerated shift from paper to digital archives;
 - (e) Coordinate and manage commercial insurance policies to mitigate and transfer risk pertaining to property, terrorism and liability programmes, as well as the malicious acts insurance policy, for the Organization, including offices away from Headquarters and peacekeeping and special political missions; adjudicate claims emanated from these insurance programmes and obtain settlements from the insurers; and provide insurance advice for vendor, memorandum of understanding and pro bono contracts and agreements;
 - (f) Ensure accurate and timely disbursement of salaries and related allowances for all United Nations Secretariat staff;

- (g) Process other disbursements in respect of the financial obligations of the Organization and process the tax reimbursement claims of United States taxpayers.

29B.98 The above-mentioned work is expected to result in:

- (a) A highly functional, more inclusive and sustainable campus that symbolizes the ideals of the United Nations;
- (b) High client satisfaction and cost-efficiency in the provision of services;
- (c) Increased public awareness of the past and current work of the Organization.

Programme performance in 2025

Rental cost recovery automated through payroll

29B.99 The rental obligations for leased buildings at Headquarters are funded from the regular budget, the peacekeeping support account and cost recovery for extrabudgetary positions. In previous years, the cost-recovery process required extensive engagement with all entities to review their extrabudgetary-funded positions based on Umoja staffing tables and to determine the total rental charge for each entity, taking into account the projected incumbency of each position for the year. Once an agreement was reached, cost-recovery transactions were processed manually, for each position or through a monthly batch process, depending on the availability of funding. This approach required continuous data reconciliation and the execution of thousands of manual transactions annually. In 2025, the subprogramme introduced a payroll-based cost-recovery mechanism, fully automating the process. This significantly reduced administrative overhead or burden and improved accuracy based on actual incumbency.

29B.100 Progress towards the objective is presented in the performance measure below (table 29B.22).

Table 29B.22

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	—	Rental cost recovery relating to extrabudgetary positions processed automatically through payroll

Planned results for 2027

Result 1: historical records digitally preserved

Programme performance in 2025 and target for 2027

- 29B.101 The subprogramme's work contributed to procedures established to appraise and preserve digital records of enduring and permanent value, which did not meet the planned target of a comprehensive inventory of the digital records available to Secretariat entities. The target was not met owing to liquidity constraints, which prevented the establishment of dedicated capacity to develop the digital preservation programme.
- 29B.102 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.23).

Table 29B.23
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
–	Processes established to dispose digital records, in accordance with approved retention schedules, that no longer need to be kept by the United Nations	Procedures established to appraise and preserve digital records of enduring and permanent value	Digital records of enduring and permanent value preserved	Increased number of digital records of enduring and permanent value preserved

Result 2: office space aligned with the needs of the Organization**Programme performance in 2025 and target for 2027**

- 29B.103 The subprogramme's work contributed to the alignment of office space with the evolving needs of the Organization through the signing of a new lease agreement for the DC-2 Building and the commencement of preparations for the renovation of the DC-2 Building, including the establishment of the required contracts and the consultation on workspace requirements with the occupants, which met the planned target.
- 29B.104 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 29B.24).

Table 29B.24
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
The General Assembly took note of the report of the Secretary-General on the assessment of the workplace at United Nations Headquarters (A/78/325) DC-1 lease vacated	Real estate portfolio further reduced with the lease of the Falchi Building vacated in October 2024	New 15-year lease signed for the DC-2 Building Phase 1 of the renovation of the DC-2 Building commenced, including consultations with all occupant entities on workspace requirements	Increased availability of flexible workspaces in the DC-2 Building, as part of phase 1 of the DC-2 renovation project	Phase 2 of the renovation of the DC-2 Building completed, with 14 floors in the building converted into flexible workspace Leases of Albano and FF buildings vacated

Result 3: increased accessibility of premises and facilities at United Nations Headquarters for persons with disabilities**Proposed programme plan for 2027**

- 29B.105 In 2018, the subprogramme commissioned a baseline accessibility assessment of the Headquarters premises. Following the initial assessment, the subprogramme implemented a three-year programme to upgrade the United Nations facilities and premises to meet basic accessibility levels, with a focus on the physical accessibility of United Nations buildings. By the end of 2023, the Department had implemented improvements, including the installation of automatic doors to several conference

rooms, a wheelchair accessible exit gate at the staff entrance and wheelchair charging stations, and a lift in the General Assembly rostrum and an accessible ramp at the General Assembly 200 entrance, as well as modifications to a select portion of the floor seating in the General Assembly Hall and the modification of all curb cuts on campus to meet accessibility standards and provide safe, barrier-free access for persons with disabilities.

Lessons learned and planned change

- 29B.106 The lesson for the subprogramme was that further improvements could be made to enhance the accessibility of premises and facilities at United Nations Headquarters to go beyond meeting the minimum standards. In applying the lesson, the subprogramme will implement a five-year programme, which commenced in 2025, to further upgrade the premises and facilities to enhance accessibility for persons with disabilities. Accordingly, the subprogramme completed the first phase of its second accessibility assessment focused on the routes used by delegates, staff and visitors. This assessment has and will continue to inform the implementation of further improvements to the premises and facilities. The second phase of this accessibility assessment is planned for 2027.
- 29B.107 Expected progress towards the objective is presented in the performance measure below (see table 29B.25).

Table 29B.25

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
United Nations facilities and premises meet basic accessibility levels	United Nations facilities and premises meet basic accessibility levels	Accessibility assessment (phase 1) of United Nations Headquarters completed Automatic doors for 11 of 33 doors installed to staff office floor entrances Braille signs to conference rooms in staff office floors introduced	Automatic doors for an additional 22 doors to staff office floor entrances installed Height modifications to water fountains outside conference rooms completed	Accessibility assessment (phase 2) of United Nations Headquarters completed Mobile lift at General Assembly upper podium installed Modifications to restrooms in the conference building completed

Deliverables

- 29B.108 Table 29B.26 lists all deliverables of the subprogramme.

Table 29B.26

Subprogramme 4: deliverables for 2027, by category and subcategory

Category and subcategory

D. Communication deliverables

External and media relations: information and reception services to visitors, delegates and the general public, including responses to approximately 20,000 enquiries on the current and past work of the United Nations.

Library services: archives, records and information management services to all entities at United Nations Headquarters and field missions; guidance on record-keeping for Secretariat entities; security-screened, catalogued, stored and preserved paper and digital records; and digitized legacy paper archives.

E. Enabling deliverables

Logistics: management and maintenance of the United Nations Headquarters complex and leased premises, related facilities and assets, including gifts; office accommodations provided for Secretariat personnel; completion of approximately 6,000 service requests for facilities and commercial services; conferences and special events logistics; warehousing and transportation services; approximately 27,500 travel requests and travel documents, lump-sum calculations and host country registrations processed; airline agreements; mail services; and processing of approximately 650,000 postal, courier and diplomatic pouch shipment and messenger services.

Administration: transactions and claims for 6,600 staff members in the area of tax reimbursement; management of 18 commercial insurance programmes covering \$2.95 billion in assets under the global property and terrorism insurance policies, 206,000 personnel under the malicious acts policy and 24,800 vehicles of diverse types under the worldwide auto policy, including the adjudication of related claims; insurance advice and review of certificates of insurance for 150 contracts and agreements; payroll for 26,000 staff and retirees, including assignment and separation payments; pension schedules for all entities at United Nations Headquarters and offices away from Headquarters; troop- and contingent-owned equipment reimbursements; and payments to vendors, consultants and individual contractors.
