Programme performance in 2025	29

* The present document (A/81/6 (Sect. 4)/Part A), consisting of the programme plan and programme performance information (part II; see General Assembly resolution [77/267](#), para. 10), will be replaced by a document containing parts A and B (A/81/6 (Sect. 4)) once part B is issued.

** [A/81/50](#).

*** In keeping with paragraph 10 of General Assembly resolution [77/267](#), the part consisting of the programme plan and programme performance information (part II) is submitted through the Committee for Programme and Coordination for the consideration of the Assembly.

A. Proposed programme plan for 2027 and programme performance in 2025

Overall orientation

Mandates and background

- 4.1 The Office for Disarmament Affairs is responsible for supporting multilateral efforts aimed at achieving the goal of general and complete disarmament under strict and effective international control. Its mandate derives from the priorities established in relevant General Assembly resolutions and decisions, including the final document of the tenth special session of the Assembly, which was the first special session devoted to disarmament (resolution [S-10/2](#)). Weapons of mass destruction, in particular nuclear weapons, remain the primary concern owing to their unparalleled destructive potential. The evolving global strategic environment has heightened the urgency of addressing biosecurity risks, including through improving processes to anticipate, prevent, coordinate and respond to such risks, as well as bolstering the norm against chemical weapons. The rapid uptake of emerging technologies has intensified State action to address scientific and technological developments and their implications for international security, with mandated support from the Office. The illicit trade in small arms and light weapons remain a significant driver of armed violence and conflict, and safety and security risks associated with through-life conventional ammunition management fall within the Office's mandate to support national and international efforts to combat, prevent and eradicate such threats. The Office's mandate also spans regional disarmament initiatives, including dialogue, confidence-building and tailored capacity-building initiatives and fellowships across regions. The mandate further encompasses partnerships, global information, outreach and education and inclusive multi-stakeholder engagement for and in disarmament, arms control and non-proliferation processes. The Office advances the meaningful participation, skills development and leadership opportunities of and for young people within disarmament, arms control and non-proliferation processes.

Strategy and external factors for 2027

- 4.2 The Office will ensure full implementation of its legislative mandates and adherence to United Nations policies and procedures. It will continue to support multilateral negotiations and deliberations and offer expertise and practical solutions, while fostering confidence and trust among Member States. It will help to facilitate the reconciliation of disparate positions among Member States resulting from an international security environment that is expected to remain complex and challenging in 2027. The Office will seek to mitigate identified risks through the implementation of its 2026–2030 strategic plan, which serves as an important reference point for managing uncertainty.
- 4.3 The Office will continue to be guided by existing frameworks, including relevant elements of the Sustainable Development Goals and the Secretary-General's peace and security and development reforms, in accordance with relevant General Assembly resolutions.¹
- 4.4 With respect to the programme structure, consolidation of the delivery of capacity development functions in Vienna offers an opportunity to streamline operations and facilitate synergies across fellowships and training programmes. Accordingly, a new subprogramme, Regional disarmament, capacity-building and outreach, is proposed in order to reflect the consolidation of the Office's fellowships, training programmes and capacity-building functions, specifically curriculum development, management of partnerships with training institutes and logistical support. The new

¹ The Office will also be informed by *Securing Our Common Future: An Agenda for Disarmament*, in accordance with the mandates of the Office. Furthermore, it will actively support Member States in the implementation of their disarmament obligations and commitments, as outlined in the Pact for the Future (General Assembly resolution [79/1](#)).

subprogramme combines subprogrammes 4 and 5 presented in the programme budget for 2026. Correspondingly, the tables of deliverables of subprogramme 4 and 5 from the programme budget for 2026 are absorbed under the new subprogramme. In addition, the coordination and implementation of fellowships and related deliverables are reflected in the new subprogramme table of deliverables. These programmatic adjustments will provide opportunities to repurpose and expand the use of existing learning platforms, while better connecting target audiences and building a coherent community of practice. The programme of work of the Office is presented under the new structure, with an annex reporting on programme performance against additional results reflected in the proposed programme plan for 2026 (see annex to the present report).

- 4.5 With regard to cooperation with other entities, the Office will continue to enhance collaboration with other international, regional and subregional organizations in the areas of disarmament, arms control and non-proliferation, including on emerging technologies and their impact on international security. The Office will continue to cooperate with relevant regional, subregional, civil society and other organizations, such as the African Union, the Caribbean Community, the Economic Community of West African States, the Organization of American States, the Association of Southeast Asian Nations, the Organization for Security and Cooperation in Europe and the Pacific Islands Forum, among others, on these areas in order to build on existing synergies and avoiding the duplication of efforts already undertaken by such organizations. It will facilitate dialogue and cooperation among States and regional and subregional organizations. The Office will also continue its outreach to and partnerships with stakeholders, including academia, research institutes, young people and the general public to advance disarmament and arms control priorities. It will continue to promote youth engagement and the meaningful and inclusive participation of young people in disarmament and non-proliferation discussions, in line with General Assembly resolution [78/31](#), including through youth-led initiatives and education and capacity-building programmes.
- 4.6 With regard to inter-agency coordination and liaison, and in order to enhance delivery, support coherence and avoid the duplication of efforts, the Office will continue to pursue cohesive and integrated approaches across the Secretariat and resident coordinators and with United Nations agencies, funds and programmes and other United Nations entities, such as the United Nations Youth Office, the Office for Digital and Emerging Technologies and the Coordinating Action on Small Arms mechanism, which is the United Nations system-wide inter-agency coordination mechanism for small arms and ammunition control and the reduction in armed violence. This will help to ensure the promotion of a holistic approach to addressing risks associated with arms and to ensure the greater integration of disarmament, conflict prevention, humanitarian and development efforts, thereby contributing to the protection of civilians and international peace and security. These arrangements have generated efficiency gains by leveraging shared expertise and networks, enabling the Office to maximize impact.
- 4.7 With regard to the external factors, the overall plan for 2027 is based on the following assumptions:
 - (a) The political environment and developments are supportive of disarmament efforts and are conducive to the facilitation of negotiations on new arms limitation and disarmament agreements;
 - (b) Member States continue to engage with multilateral solutions for disarmament, non-proliferation and arms control and are willing to implement the recommendations, resolutions and decisions of relevant meetings and conferences;
 - (c) International and regional organizations and entities and relevant stakeholders are interested and engaged in advancing and supporting disarmament, non-proliferation and arms control objectives;
 - (d) National institutions support the promotion of equal opportunities for women and of the meaningful and inclusive participation and engagement of young people in disarmament, non-proliferation and arms control;
 - (e) The Office has adequate resources for the implementation of planned activities.
- 4.8 The Office integrates a gender perspective into its activities, deliverables and results, as appropriate, in line with organizational mandates for mainstreaming a gender perspective into policies and

programmes in the United Nations system (Economic and Social Council resolution [2024/3](#)). The Office will continue to assist Member States, upon request, in implementing the Security Council resolutions on women and peace and security and, in line with General Assembly resolution [65/69](#) and subsequent resolutions on women, disarmament, non-proliferation and arms control, promote the role of women in these fields, and promote gender-sensitive policymaking and programming, including through data collection and education.

- 4.9 In line with the United Nations Disability Inclusion Strategy and General Assembly resolutions [74/144](#) and [76/154](#), the Office will continue to implement its departmental action plan and collaborate with other United Nations entities to promote accessibility and the equal participation of persons with disabilities in disarmament discussions and decision-making processes.

Adjustments arising from the UN80 Initiative

- 4.10 The proposed programme plan for 2027 reflects changes arising from the UN80 Initiative. In particular, the tables of deliverables reflect updated deliverables for 2026, in line with the approved programme budget for 2026.
- 4.11 The Office will be guided by any future decisions taken in the context of the UN80 Initiative, in accordance with the applicable rules and procedures, including decisions, resolutions and established practice of the competent intergovernmental organs. This includes, among others, any decisions concerning proposals to integrate the United Nations Institute for Disarmament Research into the Office so that its analysis informs negotiations and field support, while preserving the Institute's research independence.

Legislative mandates

- 4.12 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

S-10/2	Final Document of the Tenth Special Session of the General Assembly	79/80	Promoting international cooperation on peaceful uses in the context of international security
59/95	Improving the effectiveness of the methods of work of the First Committee	80/25	Relationship between disarmament and development
77/298	The United Nations Global Counter-Terrorism Strategy: eighth review	80/38	The illicit trade in small arms and light weapons in all its aspects
79/1	The Pact for the Future	80/43	Through-life conventional ammunition management
79/57	Women, disarmament, non-proliferation and arms control	80/55	Youth, disarmament and non-proliferation

Security Council resolutions

1325 (2000)	2055 (2012)
1540 (2004)	2117 (2013)
1673 (2006)	2118 (2013)
1810 (2008)	2250 (2015)
1887 (2009)	2475 (2019)
1977 (2011)	

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

General Assembly resolutions and decisions

78/15	Prohibition of the development and manufacture of new types of weapons of mass destruction and new systems of such weapons: report of the Conference on Disarmament	80/52	Implementation of the Convention on Cluster Munitions
		80/57	Lethal autonomous weapons systems
		80/65	Report of the Conference on Disarmament
Decision 79/512	Open-ended working group on the prevention of an arms race in outer space in all its aspects	80/68	Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects
80/35	Implementation of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	80/71	Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction
80/44	Transparency and confidence-building measures in outer space activities		

Subprogramme 2

Weapons of mass destruction

General Assembly resolutions and decisions

42/37 C	Measures to uphold the authority of the 1925 Geneva Protocol and to support the conclusion of a chemical weapons convention	79/60	Addressing the legacy of nuclear weapons: providing victim assistance and environmental remediation to Member States affected by the use or testing of nuclear weapons
42/38 C	Notification of nuclear tests		
72/31	Taking forward multilateral nuclear disarmament negotiations	79/134	Cooperation between the United Nations and the Organisation for the Prohibition of Chemical Weapons
72/51	International Day against Nuclear Tests	79/238	Nuclear war effects and scientific research
73/71	Fourth Conference of Nuclear-Weapon-Free Zones and Mongolia, 2020	79/241	Comprehensive study of the question of nuclear-weapon-free zones in all its aspects
Decision 73/546	Convening a conference on the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction	80/17	Establishment of a nuclear-weapon-free zone in the region of the Middle East
77/66	Eleventh Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons and its Preparatory Committee	80/24	Nuclear disarmament
		80/33	Follow-up to the advisory opinion of the International Court of Justice on the legality of the threat or use of nuclear weapons
78/28; decision 79/513	Treaty banning the production of fissile material for nuclear weapons or other nuclear explosive devices	80/37	Reducing nuclear danger
		80/41	Measures to prevent terrorists from acquiring weapons of mass destruction
79/14	Cooperation between the United Nations and the Preparatory Commission for the Comprehensive Nuclear-Test-Ban Treaty Organization	80/49	Follow-up to the 2013 high-level meeting of the General Assembly on nuclear disarmament
79/30	Mongolia's international security and nuclear-weapon-free status	80/53	Establishment of the Group of Scientific and Technical Experts on Nuclear Disarmament Verification
79/39	Universal Declaration on the Achievement of a Nuclear-Weapon-Free World	80/54	Treaty of the Prohibition of Nuclear Weapons
79/48	Measures to uphold the authority of the 1925 Geneva Protocol	80/67	The risk of nuclear proliferation in the Middle East

Subprogramme 3

Conventional arms

General Assembly resolutions

79/49	Effects of the use of armaments and ammunitions containing depleted uranium	79/59	Information on confidence-building measures in the field of conventional arms
79/53	Countering the threat posed by improvised explosive devices	80/12	Objective information on military matters, including transparency of military expenditures

Part II	Political affairs		
80/28	Transparency in armaments	80/36	Assistance to States for curbing the illicit traffic in small arms and light weapons and collecting them
80/29	Conventional arms control at the regional and subregional levels		

Subprogramme 4 Regional disarmament, capacity-building and outreach

General Assembly resolutions and decisions

47/53 D	World Disarmament Campaign	80/22	Role of science and technology in the context of international security and disarmament
Decision 54/418	Advisory Board on Disarmament Matters		
79/28	United Nations study on disarmament and non-proliferation education	80/27	Regional disarmament
79/45	Observance of environmental norms in the drafting and implementation of agreements on disarmament and arms control	80/42	Confidence-building measures in the regional and subregional context
79/46	Promotion of multilateralism in the area of disarmament and non-proliferation	80/55	Youth, disarmament and non-proliferation
79/63	United Nations disarmament fellowship, training and advisory services	80/58	Artificial intelligence in the military domain and its implications for international peace and security
79/69	United Nations Disarmament Information Programme	80/60	United Nations Regional Centre for Peace and Disarmament in Africa
Decision 79/511	Maintenance of international security – good neighbourliness, stability and development in South-Eastern Europe	80/61	United Nations Regional Centre for Peace, Disarmament and Development in Latin America and the Caribbean
80/13	Implementation of the Declaration of the Indian Ocean as a Zone of Peace	80/62	United Nations Regional Centre for Peace and Disarmament in Asia and the Pacific
80/16	Open-ended working group on security of and in the use of information and communications technologies 2021–2025 established pursuant to General Assembly resolution 75/240	80/64	United Nations regional centres for peace and disarmament
		80/69	Strengthening of security and cooperation in the Mediterranean region

Deliverables

4.13 Table 4.1 lists all cross-cutting deliverables of the programme.

Table 4.1
Cross-cutting deliverables for the period 2025–2027, by category and subcategory

Category and subcategory	2025 planned	2025 actual	2026 planned	2027 planned
A. Facilitation of the intergovernmental process and expert bodies				
Substantive services for meetings (number of three-hour meetings)	3	5	3	3
1. The Advisory Committee on Administrative and Budgetary Questions	1	2	1	1
2. The Committee for Programme and Coordination	1	2	1	1
3. The Fifth Committee	1	1	1	1

Evaluation activities

4.14 The following evaluations are planned for 2027:

- (a) An Office of Internal Oversight Services evaluation of the Office, with a specific focus area to be determined;

- (b) An evaluation conducted by the Office of the small arms and light weapons fellowship training programme covering its design, delivery and contributions to strengthening regional and national small arms and light weapons control systems.

Programme of work

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

Objective

- 4.15 The objective, to which this subprogramme contributes, is to advance multilateral negotiations and deliberations on agreements on disarmament, arms limitation and non-proliferation in all its aspects, as required by States Parties to existing multilateral agreements and the Conference on Disarmament.

Strategy

- 4.16 To contribute to the objective, the subprogramme will:
 - (a) Provide support for negotiations in the Conference on Disarmament and in conferences and meetings of States Parties to various multilateral agreements on disarmament, arms limitation and non-proliferation in all its aspects at the organizational, procedural and substantive levels;
 - (b) Render assistance and provide support for the follow-up to decisions, recommendations and programmes of action adopted at conferences and meetings of States Parties to various multilateral disarmament, arms control and non-proliferation agreements and to treaty-making conferences, expert groups and other disarmament meetings under the responsibility of the subprogramme;
 - (c) Facilitate the efforts of Member States to prevent an arms race in outer space.
- 4.17 The above-mentioned work is expected to result in:
 - (a) Effective and efficient holding of the meetings of the Conference on Disarmament, other conferences, working groups and expert groups and the various treaty bodies falling under the remit of the subprogramme;
 - (b) Strengthened operational viability and compliance with treaty obligations and adherence to and/or implementation of decisions, recommendations and programmes of action, as well as increased reporting by States Parties.

Programme performance in 2025

Increased annual reporting by High Contracting Parties to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects

- 4.18 The High Contracting Parties to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects submit national annual reports on compliance, on the implementation of Amended Protocol II and on the implementation of Protocol V. The subprogramme has undertaken efforts in recent years to promote the implementation of the Convention, including by facilitating increased reporting by the High Contracting Parties, in accordance with the final document of the sixth Review Conference of the Convention.
- 4.19 Progress towards the objective is presented in the performance measure below (see figure 4.I).

Figure 4.I

Performance measure: number of annual reports submitted by High Contracting Parties to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons on compliance, on the implementation of Amended Protocol II and on the implementation of Protocol V

Planned results for 2027

Result 1: increase in deliberations and eventual negotiations in the Conference on Disarmament

Programme performance in 2025 and target for 2027

- 4.20 The subprogramme's work contributed to the early establishment of subsidiary bodies in the Conference on Disarmament, which extensively discussed areas of possible convergence related to the possible future work of the subsidiary body, which did not meet the planned target of States members of the Conference carrying out substantive work in a sustained and progressive manner on priority and emerging issues. The target was not met because none of the reports of the subsidiary bodies of the Conference were agreed and adopted.
- 4.21 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 4.2).

Table 4.2

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Formal and informal thematic discussions were held on agenda items of the Conference and other specific topics, a consensus was reached on the annual report and a resolution was adopted by the General Assembly (resolution 78/61)	States members of the Conference reached an agreement on the establishment of subsidiary bodies and on a recommendation for them to resume their work in 2025	Early establishment of subsidiary bodies in the Conference on Disarmament, which extensively discussed areas of possible convergence related to the possible future work of the subsidiary bodies	States members of the Conference are able to carry out substantive work in a sustained and progressive manner on priority and emerging issues	States members of the Conference are able to carry out substantive work in a sustained and progressive manner on priority and emerging issues

Result 2: prevention of an arms race in outer space**Programme performance in 2025 and target for 2027**

- 4.22 The subprogramme's work contributed to substantive deliberations of the open-ended working group on the prevention of an arms race in outer space in all its aspects, which adopted its agenda and timetable for the period 2025–2028, which met the planned target.
- 4.23 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 4.3).

Table 4.3

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Adoption of substantive recommendations by the Disarmament Commission	Adoption of a substantive report by the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space and inclusion of agreed language on the prevention of an arms race in outer space in the Pact for the Future	The open-ended working group on the prevention of an arms race in outer space in all its aspects adopted its agenda and timetable for the period 2025–2028	Substantive deliberations in intergovernmental bodies contribute to negotiations for the conclusion of an international agreement or agreements to prevent an arms race in outer space	Substantive deliberations in intergovernmental bodies contribute to negotiations for the conclusion of an international agreement or agreements to prevent an arms race in outer space
Conclusion of work within the open-ended working group on reducing space threats through norms, rules and principles of responsible behaviours				
Initiation of work in the Group of Governmental Experts on Further Practical Measures for the Prevention of an Arms Race in Outer Space				

Result 3: addressing emerging technologies in the area of lethal autonomous weapons systems**Proposed programme plan for 2027**

- 4.24 The open-ended Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons, convened within the framework of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, has considered issues related to emerging technologies in the area of lethal autonomous weapons systems. Since the establishment of the Group of Governmental Experts in 2016, the subprogramme has provided substantive and procedural support, including by facilitating the work of the Group, including its consideration and formulation of a set of elements of an instrument, without prejudging its nature, and other possible measures to address emerging technologies in the area of lethal autonomous weapons systems.

Lessons learned and planned change

- 4.25 The lesson for the subprogramme was that the continuity of substantive support to the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons could help to support the advancement of deliberations for the formulation of a set of elements of an instrument and other possible measures to address emerging technologies in the area of lethal autonomous weapons systems. In applying the lesson, the subprogramme will intensify efforts, including by facilitating the timely payment of assessed contributions for multilateral disarmament

conventions, to support implementation of the consolidated financial measures agreed at the sixth Review Conference (CCW/CONF.VI/11, annex III), in order to ensure the operational continuity of the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effect.

4.26 Expected progress towards the objective is presented in the performance measure below (see table 4.4).

Table 4.4
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Adoption of a substantive report by the open-ended Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons, including conclusions, and decision to continue the work of the Group	Open-ended Group of Governmental Experts considered and formulated a set of elements of an instrument, without prejudging its nature, and other possible measures to address emerging technologies in the area of lethal autonomous weapons systems	Open-ended Group of Governmental Experts undertook substantive work to consider and formulate a set of elements of an instrument, without prejudging its nature, and other possible measures to address emerging technologies in the area of lethal autonomous weapons systems as articulated in the Chair's rolling text	Open-ended Group of Governmental Experts submits a report to the seventh Review Conference of the Convention on Certain Conventional Weapons on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effect, containing a set of elements of an instrument, without prejudging its nature, and other possible measures to address emerging technologies in the area of lethal autonomous weapons systems	High Contracting Parties undertake substantive work to address emerging technologies in the area of lethal autonomous weapons systems, on the basis of the outcome of the seventh Review Conference

Deliverables

4.27 Table 4.5 lists all deliverables of the subprogramme.

Table 4.5
Subprogramme 1: deliverables for the period 2025–2027, by category and subcategory

Category and subcategory	2025 planned	2025 actual	2026 planned	2027 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	344	399	318	392
1. Documents, verbatim records and reports of the Conference on Disarmament	130	127	86	130
2. Documents of the Review Conference and Meeting of States Parties to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	32	51	32	32
3. Documents of the meetings of the Review Conference and the Working Group and the Meetings of States Parties to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	80	78	80	130

Section 4 Disarmament

Category and subcategory	2025 planned	2025 actual	2026 planned	2027 planned
4. Documents of the Meeting of the High Contracting Parties to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, of the annual conferences of its Amended Protocol II and Protocol V and of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems	40	98	40	40

6. Reports and documents of the open-ended working group on the prevention of an arms race in outer space in all its aspects	42	20	40	40
Substantive services for meetings (number of three-hour meetings)	209	226	221	213
7. Consultations and meetings of the Conference on Disarmament	95	124	95	95
8. Review Conference and Meetings of the States Parties to the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction	10	10	10	10
9. Meetings of the Review Conference, the Working Group and Meetings of States Parties to the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons and on Their Destruction	36	32	36	44
10. Preparatory Committee, Review Conference and Meetings of the High Contracting Parties to the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects, the annual conferences of its Amended Protocol II and Protocol V, meetings of the Group of Governmental Experts on Emerging Technologies in the Area of Lethal Autonomous Weapons Systems, the Group of Experts of the High Contracting Parties to Amended Protocol II and the Meeting of Experts on Protocol V	36	30	46	36
11. Meetings of States Parties and the Review Conference of the Convention on Cluster Munitions	8	8	14	8
12. Meetings of the open-ended working group on the prevention of an arms race in outer space in all its aspects	24	22	20	20
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	4	–	4	–
13. On the Biological Weapons Convention	4	–	4	–
Technical materials (number of materials)	–	1	–	–
14. On the Convention on Prohibitions or Restrictions on the Use of Certain Conventional Weapons Which May Be Deemed to Be Excessively Injurious or to Have Indiscriminate Effects	–	1	–	–
C. Substantive deliverables				
Databases and substantive digital materials: databases relating to annual national reports on compliance, Protocol V and Amended Protocol II to the Convention on Certain Conventional Weapons, explosive remnants of war under Protocol V to the Convention, articles 7 and 8 (9) of the Convention on the Prohibition of the Use, Stockpiling, Production and Transfer of Anti-Personnel Mines and on Their Destruction, and article 7 of the Convention on Cluster Munitions; electronic reporting system for the confidence-building measures and the cooperation and assistance database of the Biological Weapons Convention; and website relating to the Conference on Disarmament, the Geneva Branch of the Office for Disarmament Affairs, including web pages on financial matters, fissile material, the Biological Weapons Convention, the Convention on Certain Conventional Weapons, the Convention on the Prohibition of Military or Any Other Hostile Use of Environmental Modification Techniques, and the Convention on Cluster Munitions and the Anti-Personnel Landmines Convention.				
D. Communication deliverables				
Outreach programmes, special events and information materials: briefings and outreach materials on disarmament, arms limitation and non-proliferation for the Geneva-based permanent missions and governmental, non-governmental and civil society organizations.				
Digital platforms and multimedia content: web pages on financial issues in support of conventions; and digital tools to improve national reporting and compliance (Biological Weapons Convention and Convention on Certain Conventional Weapons).				

Subprogramme 2

Weapons of mass destruction

Objective

- 4.28 The objective, to which this subprogramme contributes, is to advance disarmament and non-proliferation in all aspects of nuclear weapons and all other weapons of mass destruction and their means of delivery.

Strategy

- 4.29 To contribute to the objective, the subprogramme will:
- (a) Support the process of negotiations, deliberations and consensus-building in the areas of disarmament and non-proliferation of weapons of mass destruction, in particular nuclear weapons and their means of delivery;
 - (b) Support the full implementation of international instruments dealing with the disarmament and non-proliferation of nuclear weapons, including the Treaty on the Non-Proliferation of Nuclear Weapons and the Treaty on the Prohibition of Nuclear Weapons, and for the entry into force of the Comprehensive Nuclear-Test-Ban Treaty;
 - (c) Support the enhancement and implementation of further ways and means of cooperation among the States Parties to nuclear-weapon-free zone treaties and the protocols thereto;
 - (d) Support Member States in their negotiations on the establishment of a Middle East zone free of nuclear weapons and all other weapons of mass destruction;
 - (e) Provide substantive and technical support to office bearers of the First Committee and the Disarmament Commission;
 - (f) Continue to raise awareness of the dangers posed by nuclear weapons, including through substantive and technical support to the International Day for the Total Elimination of Nuclear Weapons and the International Day against Nuclear Tests;
 - (g) Strengthen cooperation with relevant intergovernmental organizations, such as the International Atomic Energy Agency, including in areas such as nuclear security and non-proliferation, and expand interaction, as appropriate, with civil society, in particular research and academic institutions and non-governmental organizations working in the areas of disarmament and non-proliferation of nuclear weapons and their delivery systems;
 - (h) Continue its close cooperation with the Organisation for the Prohibition of Chemical Weapons (OPCW) to promote the universality and full implementation of the Convention on the Prohibition of the Development, Production, Stockpiling and Use of Chemical Weapons and on Their Destruction;
 - (i) Support efforts to ensure accountability for the use of chemical weapons by, inter alia, supporting OPCW efforts in this regard and by working with members of the Security Council in order to build unity on the issue. The subprogramme will also continue to provide briefings to the Council on the implementation of resolution [2118 \(2013\)](#) on the elimination of the chemical weapons programme of the Syrian Arab Republic;
 - (j) Continue to enhance the operational readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons by organizing, with interested Member States and relevant partners, training and capacity-building activities for experts and analytical laboratories.

- 4.30 The above-mentioned work is expected to result in:
- (a) The building of trust and understanding among Member States in order to facilitate consensus on effective measures relating to the total elimination of nuclear weapons and measures to prevent any use of a nuclear weapon and to uphold the norms against the proliferation and testing of nuclear weapons;
 - (b) The strengthening and reinforcement of the norm against chemical weapons use;
 - (c) Enhanced ability of Member States to uphold the global norms against the use of weapons of mass destruction;
 - (d) Strengthened coordination capabilities of Member States to respond to incidents involving the alleged use of biological weapons.

Programme performance in 2025

Member States from the Asia-Pacific region identify potential synergies for their engagement with instruments for addressing the threat posed by the proliferation or use of biological weapons

- 4.31 The subprogramme co-organized, with subprogramme 1, a workshop for Member States from the Asia-Pacific region (South-East Asia and Pacific subregions) to engage regionally on the global norm against biological weapons, in the context of the Biological Weapons Convention, Security Council resolution [1540 \(2004\)](#) and the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons. These three instruments all contribute to preventing and deterring the proliferation or use of biological weapons and can benefit from cooperation with similar stakeholders at the national and regional levels. Building on a pilot workshop, held in 2024, for Member States of Latin American and the Caribbean, the subprogramme brought together national stakeholders, including those whose work is relevant to more than one of these instruments, thereby facilitating opportunities for Member States to identify potential synergies in their engagement on these issues.
- 4.32 Progress towards the objective is presented in the performance measure below (see table 4.6).

Table 4.6
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	Member States from Latin America and the Caribbean identify potential synergies in their engagement on instruments for addressing the threat posed by the proliferation or use of biological weapons, in the context of a pilot regional outreach workshop	Member States from the Asia-Pacific region (South-East Asia and Pacific subregions) identify potential synergies in States' engagement on instruments for addressing the threat posed by the proliferation or use of biological weapons, in the context of a regional outreach workshop

Planned results for 2027

Result 1: process to achieve the establishment of a Middle East zone free of nuclear weapons and other weapons of mass destruction

Programme performance in 2025 and target for 2027

- 4.33 The work of the subprogramme contributed to the completion of the sixth session of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction, with the President of the sixth session, together with the members of the Conference,

undertaking substantive deliberations during the annual session of the Conference and at its intersessional working committee on a number of issues, including: (a) consultation, clarification and cooperation, as well as dispute settlement; (b) negative security assurances; and (c) promoting cooperation with other nuclear-weapons-free zones. The deliberations were aimed at reaching a common position on the negotiation of a Middle East zone treaty on those issues, which met the planned target.

- 4.34 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 4.7).

Table 4.7

Performance measure

<i>2023 (actual)</i>	<i>2024 (actual)</i>	<i>2025 (actual)</i>	<i>2026 (planned)</i>	<i>2027 (planned)</i>
The Conference undertook substantive discussions and agreed to continue deliberations at its intersessional working committee meetings on, inter alia, nuclear verification, peaceful uses and technical cooperation and an index of the list of topics to be addressed by future sessions of the Conference	The Conference undertook substantive deliberations, including through meetings of its intersessional working committee, to advance the preparations for the negotiation of a legally binding instrument The decision adopted at the fourth session on the time of endorsement of the presidency of the annual sessions of the Conference was implemented	Completion of the sixth session of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction, with the President of the sixth session, together with the members of the Conference, undertaking substantive deliberations, including through the intersessional working committee, including on consultation, clarification and cooperation, and dispute settlement, negative security assurances and promoting cooperation with other nuclear-weapons-free zones, aimed at reaching a common position on the negotiation of a Middle East zone treaty on those issues	The President of the seventh session, together with the members of the Conference, undertakes organizational and substantive preparations for the seventh session aimed at reaching a common position on the negotiation of a Middle East zone treaty	The Conference, undertakes substantive deliberations, including through meetings of its intersessional working committee, to advance common understandings and building blocks that can support the negotiation of a legally binding instrument establishing a Middle East zone treaty

Result 2: improved readiness of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons

Programme performance in 2025 and target for 2027

- 4.35 The subprogramme's work contributed to 80 trained experts who were nominated to the roster of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons, which exceeded the planned target of 75.
- 4.36 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 4.II).

Figure 4.II

Performance measure: number of trained experts on the Mechanism's roster (annual)

Result 3: Group of Scientific and Technical Experts on Nuclear Disarmament Verification advances understanding of technical challenges in and possible approaches to nuclear disarmament verification

Proposed programme plan for 2027

- 4.37 To help to advance disarmament and the non-proliferation of nuclear weapons in all its aspects, the subprogramme convened three informal in-person meetings in 2025 on the technical challenges in and possible approaches to nuclear disarmament verification. The subprogramme also prepared a report of the Secretary-General to the General Assembly containing possible options for the establishment of a Group of Scientific and Technical Experts on Nuclear Disarmament Verification within the United Nations, taking into account the views submitted by Member States in writing and through the three informal in-person meetings as the basis for the subprogramme's efforts to support the establishment and work of the Group, as mandated by the Assembly in its resolution [80/53](#). The subprogramme is also mandated, by this resolution, to provide all assistance necessary to the Group, including the provision of relevant documents.

Lessons learned and planned change

- 4.38 The lesson for the subprogramme, informed by previous experience of providing support to groups of experts, was the importance of establishing clear working methods and shared expectations at the outset of mandated activities of groups of experts. Early agreement on roles and responsibilities, decision-making modalities, timelines and communication channels contributes to more efficient deliberations, helps to reduce procedural delays and enables experts to focus on the substantive aspects of the mandate. In applying the lesson, the subprogramme will support the development of standardized orientation briefings, model terms of reference for internal working methods and

structured workplans aligned with mandated deliverables. The subprogramme will also facilitate early consultations among experts to foster a common understanding of objectives and outputs.

4.39 Expected progress towards the objective is presented in the performance measure below (see table 4.8).

Table 4.8

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Final report of the Group of Governmental Experts to further consider nuclear disarmament verification issues is transmitted to the General Assembly	Adoption of General Assembly resolution 79/240, in which the Secretary-General is requested to seek the views of Member States, in writing, on the establishment of a Group of Scientific and Technical Experts on Nuclear Disarmament Verification	Adoption of General Assembly resolution 80/53 establishing the Group of Scientific and Technical Experts on Nuclear Disarmament Verification	Experts selected for the Group of Scientific and Technical Experts on Nuclear Disarmament Verification through a wide call for nominations from Member States on the basis of their outstanding technical expertise and on as wide a geographical basis as possible and giving due regard to gender balance	Group of Scientific and Technical Experts on Nuclear Disarmament Verification commences work required to accomplish the objectives mandated by the General Assembly in its resolution 80/53

Deliverables

23. Pre-session consultations and meetings related to the 2026 Review Conference of the Parties to the Treaty on the Non-Proliferation of Nuclear Weapons	–	–	66	–
B. Generation and transfer of knowledge				
Seminars, workshops and training events (number of days)	38	37	38	28
24. Intersessional briefings of the Conference on the Establishment of a Middle East Zone Free of Nuclear Weapons and Other Weapons of Mass Destruction	8	7	8	8
25. Training courses for the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons on chemical weapons investigations and updating the roster of experts	30	30	30	20
C. Substantive deliverables				
Consultation, advice and advocacy: impartial technical, substantive and procedural advice provided to Member States; consultations with civil society, including on participation by civil society in treaty-related conferences; consultations with academia and specialized technical institutions; liaison with relevant intergovernmental organizations (e.g. OPCW, International Atomic Energy Agency and Comprehensive Nuclear-Test-Ban Treaty Organization); and interdepartmental coordination, including as Vice-Chair of the United Nations Global Counter-Terrorism Coordination Compact Working Group on Emerging Threats and Critical Infrastructure Protection.				
D. Communication deliverables				
Outreach programmes, special events and information materials: fact sheets on weapons of mass destruction, disarmament and associated treaties; side events at relevant United Nations and ad hoc conferences; newsletter of the Secretary-General's Mechanism for Investigation of Alleged Use of Chemical and Biological Weapons; and outreach and advocacy to the general public and students conducted through events organized by the subprogramme.				
Digital platforms and multimedia content: website and social media platforms related to weapons of mass destruction issues.				

^a Reflects corrected information from A/80/6 (Sect.4) because transmission of the comprehensive study is due to be submitted to the General Assembly at its eighty-first session, in 2026.

^b Subject to change based on the decision of States Parties.

Subprogramme 3

Conventional arms

Objective

- 4.41 The objective, to which this subprogramme contributes, is to advance the regulation and limitation of conventional weapons and ammunition, taking into account the legitimate needs of States for self-defence.

Strategy

- 4.42 To contribute to the objective, the subprogramme will:
- (a) Provide substantive support, including preparatory activities for intergovernmental processes, to the following:
 - (i) First Committee of the General Assembly and the Security Council;
 - (ii) Preparations for Biennial Meeting of States to Consider the Implementation of the Programme of Action to Prevent, Combat and Eradicate the Illicit Trade in Small Arms and Light Weapons in All Its Aspects and its open-ended technical expert group to address developments in small arms and light weapons manufacturing, technologies and design;
 - (iii) Meeting of States on the Global Framework for Through-life Conventional Ammunition Management;
 - (b) Support and assist with the development, updating, revision, translation and dissemination, as appropriate, of the following:
 - (i) International Ammunition Technical Guidelines through the SaferGuard programme;
 - (ii) Database on military expenditure;
 - (iii) Register of Conventional Arms;
 - (iv) Modular Small-arms-control Implementation Compendium;
 - (v) Repository of military confidence-building measures;
 - (vi) Database on national reports of the Programme of Action on Small Arms and Light Weapons;
 - (vii) Online platform and reporting database related to the Global Framework for Through-life Conventional Ammunition Management;
 - (viii) Development, design, regionalization and coordination of the dedicated fellowship training programme on small arms and light weapons control and the alignment of a training curriculum with the Programme of Action on Small Arms and Light Weapons, the International Tracing Instrument and other relevant instruments and tools, including the Modular Small-arms-control Implementation Compendium;
 - (ix) Development, design, regionalization and coordination of the fellowship training programme on through-life conventional ammunition management and alignment of a training curriculum with the Global Framework for Through-life Conventional Ammunition Management and other relevant instruments and tools, including the International Ammunition Technical Guidelines;
 - (c) Implement and assist States in the implementation of the outcomes of the fourth United Nations Conference to Review Progress Made in the Implementation of the Programme of Action on Small Arms and Light Weapons;
 - (d) Assist States in the regional and national implementation of the Global Framework for Through-life Conventional Ammunition Management;

- (e) Provide capacity-building support for requesting States to collect and consolidate data to monitor indicator 16.4.2 of the Sustainable Development Goals;
- (f) In partnership with United Nations system entities:
 - (i) Promote safe and secure weapons and ammunition management in disarmament, demobilization and reintegration processes and in peace operation contexts;
 - (ii) Support the integration of small arms control considerations into United Nations country-level system-wide approaches to development;
- (g) Support, implement and facilitate assistance projects that develop the capacity of national institutions with regard to conventional arms and ammunition control, including through (i) the United Nations Trust Facility Supporting Cooperation on Arms Regulation, (ii) the Saving Lives Entity fund, (iii) the SaferGuard Programme, (iii) the maintenance and expansion of the roster of experts validated according to the International Ammunition Technical Guidelines, (iv) the establishment and operationalization of an efficient and agile global mechanism for requesting, offering and receiving assistance in through-life conventional ammunition management, and (v) a structured procedure to process offers of and requests for assistance submitted under the Programme of Action on Small Arms and Light Weapons and the International Tracing Instrument; support the continued work of the Ammunition Management Advisory Team; and support Silencing the Guns by 2030 and its Africa Amnesty Month initiative of the African Union;
- (h) Implement, as required, relevant recommendations issued in 2025 by the Group of Governmental Experts on the United Nations Register of Conventional Arms and undertake preparations for the meetings of the Group to be held in 2027 and 2028;
- (i) Manage the transparency instruments on military expenditure and the Register of Conventional Arms and provide support to States for their increased participation and use;
- (j) Support initiatives and efforts for fostering military confidence-building measures at the subregional and regional levels;
- (k) Support efforts to combat, prevent and eradicate the illicit trade in small arms and light weapons, their parts and ammunition in accordance with actions 18 (f) and 26 (g) of the Pact for the Future;
- (l) Support the efforts of Member States, pursuant to their request, to help to ensure that military spending does not compromise investment in sustainable development and building sustainable peace, consistent with measures contained in the report of the Secretary-General entitled *The Security We Need: Rebalancing Military Spending for a Sustainable and Peaceful Future*.

4.43 The above-mentioned work is expected to result in:

- (a) Strengthened implementation of global arms control instruments, including legislation, policies and regulations on small arms and light weapons and conventional ammunition at the national, regional and subregional levels;
- (b) Enhanced effectiveness of existing international assistance frameworks through the implementation of the Programme of Action on Small Arms and Light Weapons, the International Tracing Instrument and the Global Framework for Through-life Conventional Ammunition Management;
- (c) Improved integration of small arms and light weapons and conventional ammunition control considerations into development and prevention processes and frameworks;
- (d) Reduced armed violence and risk of armed conflict by reducing the destabilizing effect of increasing arms and ammunition transfers and accumulations, as well as fostering confidence-building measures among States;

- (e) Continued relevance and improved participation of States in the United Nations Report on Military Expenditures and the Register of Conventional Arms.

Programme performance in 2025

Increased understanding of and proposals to mitigate the impact of the global increase in military expenditure on progress towards the achievement of the Sustainable Development Goals

- 4.44 Through the Pact for the Future, Member States expressed concern about the potential impact that the global increase in military expenditure could have on investment in sustainable development and sustaining peace. To take this forward, the subprogramme, in collaboration with the Executive Office of the Secretary-General and the United Nations Development Programme, undertook consultations with relevant United Nations entities, international financial institutions, Member States, academia, experts and civil society. That input informed the report of the Secretary-General, *The Security We Need: Rebalancing Military Spending for a Sustainable and Peaceful Future*, which provided an analysis on the impact of the global increase in military expenditure on the achievement of the Sustainable Development Goals. The Secretary-General, in his report, articulated that higher levels of military expenditure did not always lead to greater stability or peace and that growing military expenditure was crowding out resources for sustainable development. The Secretary-General made the case for investing in peace and set out an agenda to mitigate the impact of the global increase in military expenditure on the progress towards the achievement of the Goals. To support broad dissemination of the research and the report, a dedicated outreach campaign and web page were launched to engage Member States and the wider public.
- 4.45 Progress towards the objective is presented in the performance measure below (see table 4.10).

Table 4.10

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
–	The Pact of the Future contained requests for the Secretary-General to provide an analysis of the impact of the global increase in military expenditure on the achievement of the Sustainable Development Goals	Member States have access to the report of the Secretary-General, <i>The Security We Need: Rebalancing Military Spending for a Sustainable and Peaceful Future</i> , which includes an urgent call for action

Planned results for 2027

Result 1: increased utilization of the global assistance mechanism for through-life ammunition management

Programme performance in 2025 and target for 2027

- 4.46 The subprogramme's work contributed to the development of technical requirements for developing the online platform for hosting the global assistance mechanism for through-life ammunition management, which did not meet the planned target of Member States making requests and gaining access to offers for assistance in utilizing the global assistance mechanism for through-life ammunition management. The target was not met because the resources for the establishment of the online platform for operationalizing the global assistance mechanism for through-life ammunition management were affected owing to liquidity challenges, including an information technology consultant to develop the secure online platform who could not be hired and hosting services that could not be procured.

- 4.47 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 4.11).

Table 4.11
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
The General Assembly requested the establishment, under the SaferGuard programme, of an efficient and agile global mechanism for requesting, offering and receiving assistance in through-life conventional ammunition management	The global assistance mechanism for through-life ammunition management, including its modalities and processes, was designed and conceptualized through multi-stakeholder consultations	Finalization of technical requirements for the global assistance mechanism for through-life ammunition management	Member States make requests, gain access to offers and provide and receive assistance in through-life conventional ammunition management facilitated by the global assistance mechanism for through-life ammunition management	An increasing number of Member States make requests, gain access to offers and provide and receive assistance in through-life conventional ammunition management facilitated by the global assistance mechanism for through-life ammunition management

Result 2: addressing developments in the manufacturing, technology and design of small arms and light weapons to prevent, combat and eradicate their illicit trade and misuse

Programme performance in 2025 and target for 2027

- 4.48 The subprogramme's work contributed to the preparatory work of the open-ended technical expert group under the Programme of Action on Small Arms and Light Weapons, including briefing notes, informal meetings and the nomination of a Chair-designate, which met the planned target.
- 4.49 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 4.12).

Table 4.12
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	The General Assembly, in its resolution 79/40, decided to establish an open-ended technical expert group, which would meet for the first time in 2026	Preparatory work of the open-ended technical expert group under the Programme of Action on Small Arms and Light Weapons, including briefing notes, informal meetings and nomination of a Chair-designate, is completed	The first meeting of the open-ended technical expert group under the Programme of Action on Small Arms and Light Weapons is held	The open-ended technical group under the Programme of Action on Small Arms and Light Weapons makes progress in developing its recommendations during informal consultations among States

Result 3: strengthened expertise to advance implementation of the Programme of Action on Small Arms and Light Weapons and its International Tracing Instrument

Proposed programme plan for 2027

- 4.50 Since 2024, the subprogramme has designed, developed and helped to operationalize the small arms and light weapons fellowship training programme as a standing initiative to strengthen the technical and institutional capacity of Member States to implement the Programme of Action on Small Arms and Light Weapons and the International Tracing Instrument. In 2025, the subprogramme tailored the curricula to regional contexts and coordinated the implementation of two regional sessions, in Latin American and the Caribbean and in Africa, with support from subprogramme 4, resulting in the successful completion of the training of government officials and practitioners, combining technical modules on marking, tracing and stockpile management with practical exercises and idea incubation.

Lessons learned and planned change

- 4.51 The lesson for the subprogramme was the importance of embedding structured mentorship and sustained post-training engagement within the programme design. While fellows actively participated and developed project proposals, follow-up mechanisms for implementation and reporting would benefit from more structured engagement and coaching. In applying the lesson, the subprogramme will strengthen the mentorship and coaching approaches of the fellows. This will include follow-up and impact-tracking components, ensuring that fellows receive technical assistance to refine and operationalize their individual projects to contribute to national reporting and implementation regarding the Programme of Action on Small Arms and Light Weapons and its International Tracing Instrument. These changes are designed to deepen the fellowship's effectiveness and foster tangible improvements in control practices regarding small arms and light weapons at the institutional and policy levels.
- 4.52 Expected progress towards the objective is presented in the performance measure below (see figure 4.III).

Figure 4.III

Performance measure: number of projects undertaken by fellows after completing the training programme (cumulative)

Deliverables

- 4.53 Table 4.13 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: briefing to delegates on United Nations transparency instruments (Register of Conventional Arms and United Nations Report on Military Expenditures); structured engagement, mentoring and coaching of fellows, including technical review of projects undertaken by fellows after completing the training programme; and expert seminars in preparation for the convening of the open-ended technical expert group.

Databases and substantive digital materials: online reporting systems related to global reported arms trade, military expenditure, military confidence-building measures and implementation of the Programme of Action on Small Arms and Light Weapons available for use in voluntary reporting by Member States; online collaborative platform for International Ammunition Technical Guidelines management; online secured platform for the global assistance mechanism for through-life conventional ammunition management; a structured procedure to process offers of and requests for assistance submitted under the Programme of Action on Small Arms and Light Weapons and the International Tracing Instrument; and online reporting and data collection platform related to the Global Framework for Through-life Conventional Ammunition Management.

D. Communication deliverables

Digital platforms and multimedia content: conventional arms webpage; website of the SaferGuard programme on ammunition.

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 4).

Subprogramme 4 Regional disarmament, capacity-building and outreach

Objective

- 4.54 The objective, to which this subprogramme contributes, is to advance the understanding and expertise of Member States and the public for the attainment of disarmament, non-proliferation and arms control goals and to ensure cooperation at the global and regional levels on disarmament, non-proliferation and arms control.

Strategy

- 4.55 To contribute to the objective, the subprogramme will:
- (a) Undertake outreach and information-sharing activities using websites, databases and communication platforms, in cooperation with Member States and relevant stakeholders, including organizing events, panel discussions, exhibitions, media engagement and public communications and producing publications tailored to diverse audiences;
 - (b) Support civil society engagement and promote the meaningful and inclusive participation and empowerment of young people in intergovernmental forums by facilitating access arrangements, organizing consultative meetings and arranging for presentations by invited stakeholders, as well as through a dedicated digital platform Youth for Disarmament and token grants and awards supported by voluntary contributions;
 - (c) Implement the recommendations of the 2002 United Nations study on disarmament and non-proliferation education, in cooperation with Member States and other relevant partners, by producing and disseminating educational materials and developing and maintaining e-learning and other online educational resources on substantive topics for fellowships and

for the general public, including relevant hosting and maintenance requirements, with due regard given to multilingualism and accessibility;

- (d) Provide the support necessary to operationalize all aspects of the global mechanism on developments in the field of information and communications technology (ICT) in the context of international security, pursuant to General Assembly resolution [80/16](#);
- (e) Facilitate and support the conduct of training activities for the implementation of mandated fellowship capacity-building programmes;
- (f) Provide technical and legal training, conduct capacity-building activities and support the implementation by Member States of relevant treaties, international standards and guidelines, including the Programme of Action on Small Arms and Light Weapons in All Its Aspects, the Arms Trade Treaty, the Biological Weapons Convention, Security Council resolutions [1325 \(2000\)](#), [1540 \(2004\)](#), [1673 \(2006\)](#), [1810 \(2008\)](#), [1977 \(2011\)](#), [2055 \(2012\)](#), [2325 \(2016\)](#), [2370 \(2017\)](#), [2572 \(2021\)](#), [2622 \(2022\)](#) and [2663 \(2022\)](#) and General Assembly resolutions [79/57](#), [80/60](#), [80/61](#) and [80/62](#).

4.56 The above-mentioned work is expected to result in:

- (a) Increased understanding, expertise and informed engagement of Member States on disarmament, non-proliferation and arms control issues;
- (b) Increased interest in and support for multilateral disarmament efforts and enhanced engagement by the general public and other stakeholders on disarmament, non-proliferation and arms control issues, as appropriate and as mandated;
- (c) Progress in the advancement of multilateral deliberations by States on disarmament, non-proliferation and arms control issues, including ICT security in the context of international security leading to common understandings among States;
- (d) Increased adherence to the disarmament instruments and strengthened small arms, light weapons and ammunition control, thereby advancing regional and international peace and security, including curbing the illicit trade in and the circulation of small arms and light weapons;
- (e) Confidence-building measures among Member States;
- (f) Cooperation with regional and subregional organizations.

Programme performance in 2025

Strengthened national disarmament expertise for advancing disarmament efforts

- 4.57 The subprogramme provided blended learning opportunities, which may include study tours, online instruction, lectures, simulations and in-person training across regions, through the implementation of the United Nations Disarmament Fellowship, Training and Advisory Services Programme and the United Nations programme of fellowships on small arms and light weapons. These fellowships focus on strengthening practical knowledge, technical skills and specialized expertise for disarmament, non-proliferation and arms control goals, instruments and processes and on strengthening awareness of the value of disarmament, enabling fellows to engage more effectively in disarmament efforts at all levels. Through this structured approach, the subprogramme fosters a growing global network of practitioners that enhances international cooperation and provides sustained support to the development and implementation of multilateral disarmament and arms control agreements and instruments.
- 4.58 Progress towards the objective is presented in the performance measure below (see table 4.14).

Table 4.14
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	—	Fellowships produced concrete national impact, including appointment of a Biological Weapons Convention national contact point (Zambia) and development of a centralized weapons registration database (Suriname) Participant satisfaction in the fellowship programmes was consistently high, with more than 90 per cent positive feedback in the programme of fellowships on small arms and light weapons programmes and 98 per cent of participants in the United Nations Disarmament Fellowship, Training and Advisory Services Programme rating the programme 4 or 5 (of a scale 1 to 5)

Planned results for 2027

Result 1: Global Mechanism on developments in the field of information and communications technologies in the context of international security and advancing responsible State behaviour in the use of information and communication technologies

Proposed programme plan for 2027

- 4.59 The subprogramme provides support to the open-ended working group on security of and in the use of information and communications technologies 2021–2025 in the context of international security in the successful fulfilment of its mandate. Through General Assembly resolution [80/16](#), States endorsed the final report of the open-ended working group and requested the Secretary-General to provide the support necessary to operationalize all aspects of the Global Mechanism, starting in 2026.

Lessons learned and planned change

- 4.60 The lesson for the subprogramme was that early planning and financial support for delegations could significantly improve both attendance and meaningful and inclusive participation of States in intergovernmental discussions on ICT in the context of international security. In applying the lesson, the subprogramme will undertake outreach to identify potential barriers faced by delegations' participation and intensify its efforts to support programmes that facilitate the participation of delegates in intergovernmental discussions, including sponsorship programmes. In addition, the subprogramme will support delegations, pursuant to their request, with the provision of informal briefings and background materials to advance the work of the Global Mechanism.
- 4.61 Expected progress towards the objective is presented in the performance measure below (see table 4.15).

Table 4.15
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	—	States endorsed the final report of the open-ended working group on security of and in the use of ICT 2021–2025 and requested the Secretary-General to provide the support necessary to operationalize all aspects of the Global Mechanism on developments in the field of ICT in the context of international security, starting in 2026	Substantive deliberations in the Global Mechanism on developments in the field of ICT in the context of international security and advancing responsible State behaviour in the use of ICT contribute to the convergence of common understandings among States	Substantive deliberations in the Global Mechanism on developments in the field of ICT in the context of international security and advancing responsible State behaviour in the use of ICT contribute to the convergence of common understandings among States

Deliverables

4.62 Table 4.16 lists all deliverables of the subprogramme.

Table 4.16
Subprogramme 4: deliverables for the period 2025–2027, by category and subcategory

Category and subcategory	2025 planned	2025 actual	2026 planned ^a	2027 planned
A. Facilitation of the intergovernmental process and expert bodies				
Parliamentary documentation (number of documents)	20	20	24	20
1. Reports of the Secretary-General to the General Assembly on the United Nations regional centres for peace and disarmament; the strengthening of security and cooperation in the Mediterranean region; and confidence-building measures in the regional and subregional context	3	3	5	3
2. Reports of the Secretary-General on the United Nations study on disarmament and non-proliferation education; the United Nations Disarmament Information Programme; young people, disarmament and non-proliferation; and the United Nations Disarmament Fellowship, Training and Advisory Services Programme	2	2	3	2
3. Reports of the Secretary-General on the role of science and technology and on artificial intelligence in the military domain; progress report of the open-ended working group on security of and in the use of ICT 2021–2025; report of the Global Mechanism on developments in the field of ICT in the context of international security and advancing responsible behaviour in the use of ICT; and written factual summary of the informal exchanges on artificial intelligence in the military domain and its implications for international peace and security	3	3	4	3
4. Reports of the Secretary-General on environmental norms in the context of disarmament and arms control, on the promotion of multilateralism and on the work of the Advisory Board on Disarmament Matters (including pre-session, in-session and post-session documents)	12	12	12	12

Category and subcategory	2025 planned	2025 actual	2026 planned ^a	2027 planned
Substantive services for meetings (number of three-hour meetings)	33	33	43	33
5. The Advisory Board on Disarmament Matters	12	12	12	12
6. The open-ended working group on security of and in the use of ICT 2021–2025	20	20	–	–
7. Global Mechanism on developments in the field of ICT in the context of international security and advancing responsible behaviour in the use of ICT	–	–	24	20
8. Informal exchanges for States to further share perspectives on observations and conclusions as presented in the report of the Secretary-General 80/78 on artificial intelligence in the military domain and its implications for international peace and security	–	–	6	–
9. Meeting of the First Committee	1	1	1	1
B. Generation and transfer of knowledge				
Field and technical cooperation projects (number of projects)	15	29	13	26
10. On effective small arms control, including physical security and stockpile management	6	15	5	11
11. On the implementation of General Assembly resolution 65/69 on women, disarmament, non-proliferation and arms control	3	5	3	5
12. On peace and disarmament education, including projects for young people, with an emphasis on the Sustainable Development Goals	6	9	5	10
Seminars, workshops and training events (number of days)	233	427	332	392
13. Training event for teachers on disarmament and non-proliferation	1	1	1	1
14. United Nations fellowship programme on the Programme of Action on Small Arms and Light Weapons	36	36	72	72
15. United Nations fellowship programme on the Global Framework for Through-life Conventional Ammunition Management	–	–	–	36
16. United Nations Disarmament Fellowship, Training and Advisory Services Programme	70	45	45	45
17. Seminars, workshops and training and capacity-building events on small arms and light weapons	91	300	200	200
18. Seminars, workshops and training and capacity-building events on the non-proliferation of weapons of mass destruction and the implementation and universalization of non-proliferation instruments and relevant Security Council resolutions	33	42	12	34
19. International conferences on disarmament, non-proliferation and arms control	2	3	2	4
Publications (number of publications)	11	13	7	8
20. On disarmament, including the United Nations Disarmament Yearbook, occasional papers and other serialized and non-serialized publications	8	8	4 [8]	4
21. On disarmament, non-proliferation and arms control	3	5	3	4
C. Substantive deliverables				
Consultation, advice and advocacy: substantive, technical and legal advice and training on the effective implementation of relevant instruments in accordance with Security Council and General Assembly mandates upon request by Member States, regional and subregional organizations and civil society organizations in Africa, Asia and the Pacific and Latin America and the Caribbean.				
Databases and substantive digital materials: database on the status of disarmament and arms regulation agreements; disarmament reference library and e-documents library; and e-learning resources for fellowships.				
D. Communication deliverables				
Outreach programmes, special events and information materials: pamphlets, brochures, publicity kits, guides and posters; disarmament activities of the Messenger of Peace, including public service announcements; symposiums, workshops, contests for young people and panel discussions on disarmament issues; briefings for visitors and outside groups on disarmament; disarmament and non-proliferation education materials; audiovisual resources, including videos, events and exhibits promoting disarmament and non-proliferation; websites and e-learning platforms such as the Disarmament Education Dashboard; and outreach events for young people, women and other stakeholders.				
External and media relations: opinion pieces placed in journals.				
Digital platforms and multimedia content: websites, databases and social media platforms.				

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 4).

Annex

Programme performance in 2025

Subprogramme 1

Multilateral negotiations and deliberations on disarmament and arms limitation

- A.1 The programme performance in 2025 includes programme performance presented under result 1.¹

Result 1: strengthened disarmament expertise through the United Nations Disarmament Fellowship, Training and Advisory Services Programme

- A.2 The subprogramme's work contributed to strengthened disarmament expertise of government officials through study visits to international organizations and countries in the Asia-Pacific and other regions upon their invitation, which did not meet the planned target of conducting study visits in all regions. The target was not met owing to limited resources available for the travel of fellows due to liquidity challenges.
- A.3 The performance measure is presented below (see table A.1).

Table A.1
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)
–	For the first time since its establishment, the Programme conducted a study visit to an African country	Study visits under the Programme conducted in the Asia-Pacific and other regions	Participants in the Programme are offered study visits that cover all geographical regions in an equitable manner

Subprogramme 4
Information and outreach

- A.4 The programme performance in 2025 includes programme performance presented under results 1 and 2.

Result 1: empowerment of youth in the field of disarmament and non-proliferation

- A.5 The subprogramme's work contributed to 100 youth leaders from 61 countries participating in the second phase of the Youth Leader Fund for a World without Nuclear Weapons programme, which met the planned target.
- A.6 The performance measure is presented below (see table A.2).

¹ As outlined in paragraph 4.4 above, the present report reflects a change in the programme structure for 2027. For this reason, the programme performance information for 2025 related to the United Nations Disarmament Fellowship, Training and Advisory Services Programme, which was previously presented under subprogramme 1, is included in the present annex.

Table A.2
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)
100 youth leaders from 60 countries selected to participate in an online meeting to launch the Youth Leader Fund for a World without Nuclear Weapons	100 youth leaders from 64 countries participated in the first phase of the Youth Leader Fund for a World without Nuclear Weapons programme	100 youth leaders from 61 countries participated in the second phase of the Youth Leader Fund for a World without Nuclear Weapons programme	Youth leaders participate in webinars, training sessions and site visits related to nuclear disarmament and non-proliferation for the second phase of the Youth Leader Fund for a World without Nuclear Weapons programme

Result 2: increased awareness of disarmament and non-proliferation issues

Programme performance in 2025 and target for 2027

- A.7 The subprogramme's work contributed to an average monthly number of accounts reaching 52,854, owing mainly to a spike in March from a post featuring a pop music group to amplify the "Not One Nuclear Explosion" campaign, which exceeded the planned target of 18,099.
- A.8 The performance measure is presented below (see figure A.I).

Figure A.I

Performance measure: average number of unique accounts reached per month on Instagram (annual)

Subprogramme 5 Regional disarmament

- A.9 The programme performance in 2025 includes programme performance presented under results 1 and 2.

Result 1: regional, subregional and national-level sensitization and support to the implementation of the Global Framework for Through-life Conventional Ammunition Management

- A.10 The subprogramme's work contributed to the participation of Member States and regional organizations in awareness-raising activities and preparatory discussions on implementation modalities for the Global Framework for Through-life Conventional Ammunition Management, which met the planned target.

A.11 The performance measure is presented below (see table A.3).

Table A.3
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)
Adoption of the Global Framework for Through-life Conventional Ammunition Management by the General Assembly in resolution 78/47	Regional, subregional and national actors participated in activities to raise awareness of the Global Framework for Through-life Conventional Ammunition Management	Member States and regional organizations participated in awareness-raising activities and preparatory discussions on implementation modalities for the Global Framework for Through-life Conventional Ammunition Management	Increased information-sharing by States on ammunition management

Result 2: increased integration of disarmament into national development frameworks

A.12 The subprogramme's work contributed to the increased consideration of arms control and violence reduction within national development and sectoral planning processes, as reflected in the development of national strategies informed by relevant analytical input in at least one region, which met the planned target.

A.13 The performance measure is presented below (see table A.4).

Table A.4
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)
—	—	Member States in at least one region develop national strategies informed by an analysis of arms control and violence reduction	Member States in one additional region develop national strategies informed by an analysis of arms control and violence reduction
