Subprogramme 8. Sustainable forest management	51
Subprogramme 9. Financing for sustainable development	56

A. Proposed programme plan for 2027 and programme performance in 2025

Overall orientation

Mandates and background

- 9.1 The Department of Economic and Social Affairs supports the development pillar of the United Nations Secretariat by fostering international cooperation for sustainable development for all. The Department's responsibilities include: (a) providing substantive support on development issues to the General Assembly, the Economic and Social Council and its functional commissions, and expert bodies; (b) monitoring and analysing development trends, prospects and policy issues globally; and (c) supporting the translation of policy frameworks developed in United Nations conferences and summits into policies and programmes at the country level and assisting Member States in building their national capacities. In doing so, the Department supports the implementation of the 2030 Agenda for Sustainable Development and the achievement of its Sustainable Development Goals through, among others, the regular programme of technical cooperation and United Nations Development Account projects. The mandate derives from the proposals put forward in the 1997 report of the Secretary-General entitled "Renewing the United Nations: a programme for reform" (A/51/950); in implementing the proposals, the General Assembly, in its resolution 52/220, noted the creation of the new Department of Economic and Social Affairs.
- 9.2 The Department forms the backbone of the normative and analytical support provided by the Secretariat to intergovernmental bodies and processes addressing the economic, social and environmental dimensions of sustainable development.

Strategy and external factors for 2027

- 9.3 The world continues to suffer setbacks in development progress, characterized by heightened global challenges, including climate change, debt distress and high and rising inequalities. These are now further compounded by policy uncertainty, financial volatility, growing fragmentation and weakening international development cooperation. Countries in special situations, including the least developed countries, landlocked developing countries and small island developing States, remain particularly challenged. Middle-income countries still face challenges in achieving sustainable development.
- 9.4 Amid these challenges, a coherent and integrated approach in support of Member States is critical to accelerate progress in achieving the Goals.
- 9.5 The Department continues to champion synergistic, future-focused approaches to sustainable development, addressing multiple, interlinked challenges to improve the lives and livelihoods of all people. This includes its work on climate action, sustainable infrastructure investment and risk-informed development cooperation. The Department continues to adapt its work to address the rapidly changing global policy landscape.
- 9.6 The Department deploys foresight to anticipate economic, social and population trends. It generates, analyses and compiles a wide range of data and statistics to inform Member States and other stakeholders as they take stock of policy options to address global trends.
- 9.7 The Department identifies emerging trends and policy options for eradicating poverty, addressing climate change and inequalities and promoting opportunities for global progress.
- 9.8 In 2027, the Department will intensify its intergovernmental, analytical and capacity-development efforts to support Member States for the 2027 Sustainable Development Goals Summit, focusing on accelerating progress towards the Goals in a rapidly changing global policy environment shaped by rising uncertainty and fragmentation. Core areas of delivery include the implementation of the Sevilla Commitment, with an emphasis on mobilizing development financing, reforming the

international financial architecture and improving international tax cooperation; the follow-up to the Doha Political Declaration of the “World Social Summit” and the Pact for the Future; support for the General Assembly review of the Economic and Social Council and the high-level political forum on sustainable development processes; and the strengthening of data systems and evidence for monitoring the Goals through capacity development. The Department will continue to provide strategic substantive support to the resident coordinator system and United Nations country teams, enhancing national implementation of internationally agreed objectives, with a focus on countries in Africa and countries in special situations. It will also support development cooperation with middle-income countries, in accordance with its mandate.

- 9.9 With regard to cooperation with other entities at the global, regional, national and local levels, the Department contributes to building multi-stakeholder partnerships and capacity development in thematic areas, including forests, natural resources, water, energy, climate, the ocean, transport, science and technology, and special concerns of small island developing States.
- 9.10 With regard to inter-agency coordination and liaison, the Department continues to support the quadrennial comprehensive policy review of operational activities for development of the United Nations system, in collaboration with United Nations system entities and the United Nations Sustainable Development Group. In collaboration with the Development Coordination Office, the Department facilitates structured engagement with resident coordinators strengthening delivery of capacity-building activities. These efforts help to translate global norms and policy frameworks into national action towards the 2030 Agenda and other internationally agreed objectives. Moreover, the Department, through the expanded Executive Committee on Economic and Social Affairs Plus, promotes common approaches and synergies that support the implementation of the 2030 Agenda, including through the voluntary national reviews and reporting on progress towards achieving the Sustainable Development Goals. Furthermore, the Department continues to work with various agencies and stakeholders to improve policy analysis and knowledge products for Member States. To ensure coherence within and across topic areas, the Department continues to chair or co-chair inter-agency mechanisms for persons with disabilities, Indigenous Peoples, older persons and young people, legal identity, financing for development, statistics, and science, technology and innovation, among others. Moreover, the United Nations Economists’ Network continues to advance policy research on key current and emerging economic and financial issues, and their impact on sustainable development.
- 9.11 With regard to the external factors, the overall plan for 2027 is based on the following planning assumptions:
 - (a) Continued cooperation with policymakers and relevant national, regional and international stakeholders and entities on sustainable development issues in the various intergovernmental processes;
 - (b) Continued availability of up-to-date and accurate information, data and trends for analytical products;
 - (c) Recognition of the need for mitigation measures to address risks posed by growing policy uncertainty and fragmentation.
- 9.12 The Department integrates a gender perspective into its normative and analytical work and its support for intergovernmental bodies, including in its programme activities, deliverables and results, as appropriate. It continues to apply gender analysis in its work and highlight issues related to gender equality in the substantive documentation and deliberations of intergovernmental bodies, as appropriate.
- 9.13 In line with the United Nations Disability Inclusion Strategy, the Department promotes inclusive sustainable development for all, including persons with disabilities, and realizes the promise of the 2030 Agenda to leave no one behind. As secretariat to the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the Department facilitates global dialogue to address existing gaps in translating international commitments to persons with disabilities into

development policies, programming and practices at the national and international levels. This includes the compilation and analysis of disability data and the highlighting of best practices for fostering more accessible, disability-inclusive societies.

Adjustments arising from the UN80 Initiative

- 9.14 The proposed programme plan for 2027 reflects changes arising from the UN80 Initiative. In particular, the tables of deliverables reflect the updated planned deliverables for 2026, in line with the approved programme budget for 2026. In addition, the Department is proposing a realignment of workstreams and responsibilities across subprogrammes to further advance sustainable, inclusive and science- and evidence-based solutions for the 2030 Agenda and better reflect emerging policy trends and practical strategies for achieving the Goals. In particular, an expansion of the scope of subprogramme 7 to include the science, technology and innovation clusters is proposed. This includes the coordination of the Technology Facilitation Mechanism and the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals, as well as the online platform on existing science, technology and innovation initiatives (2030 Connect), which were previously reflected under subprogramme 3. This adjustment reflects the growing importance of digital transformation, emerging technologies and data-driven governance, which are increasingly shaping how institutions design policies and deliver services. Moreover, it will further strengthen cross-regional learning and help to ensure that United Nations support for institutions and digital transformation remains coherent, innovative and aligned with intergovernmental frameworks. It will also enable the Department to provide more integrated support to Member States to elevate global policy discussions, strengthen multi-stakeholder engagement and help institutions to equip learners with the knowledge and skills needed to build a more sustainable future. This includes enhancing synergies in capacity-building in the interrelated areas of science, technology and digital transformation. In line with these adjustments, subprogramme 7 has been renamed “Institutions and digital transformation”, and the applicable planned activities and deliverables are reflected under subprogramme 7.
- 9.15 The Department will be guided by any future decisions taken in the context of the UN80 Initiative, in accordance with the applicable rules and procedures, including decisions, resolutions and established practices of the competent intergovernmental organs. This includes, among others, any decisions concerning proposals for strengthening collaboration with the United Nations Conference on Trade and Development (UNCTAD), the regional commissions, the Office of the High Representative for the Least Developed Countries, Landlocked Developing Countries and Small Island Developing States, and other entities through joint mechanisms. The Department will explore joint options for strengthening macroeconomic analysis, with a view to contributing more harmonized analysis and policy support to Member States and building a United Nations system data commons to better link data, statistics and insights. The Department will also consider proposals aimed at streamlining support for the least developed countries, landlocked developing countries and small island developing States and strengthening and optimizing organizational arrangements in this regard, as appropriate. Furthermore, the Department will explore, in collaboration with UNCTAD, the establishment of joint knowledge hubs, co-led by the best-placed entities and linked to regional and resident coordinator offices, to pool knowledge on key issues spread across United Nations system entities.

Legislative mandates

- 9.16 The list below, which was reviewed in the preparation of the proposed programme budget, provides all mandates entrusted to the programme.

General Assembly resolutions

47/190	Report of the United Nations Conference on Environment and Development	70/201	Implementation of Agenda 21, the Programme for the Further Implementation of Agenda 21 and the outcomes of the World Summit on Sustainable Development and of the United Nations Conference on Sustainable Development
47/191	Institutional arrangements to follow up the United Nations Conference on Environment and Development		
50/227	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	70/299	Follow-up and review of the 2030 Agenda for Sustainable Development at the global level
51/176	Implementation of the Programme of Action of the International Conference on Population and Development	72/279	Repositioning of the United Nations development system in the context of the quadrennial comprehensive policy review of operational activities for development of the United Nations system
51/240	Agenda for Development		
52/220	Questions relating to the proposed programme budget for the biennium 1998–1999	76/258	Doha Programme of Action for the Least Developed Countries
56/177; 80/178	Implementation of the outcome of the World Summit for Social Development and of the twenty-fourth special session of the General Assembly	77/335	Revitalization of the work of the General Assembly
57/144	Follow-up to the outcome of the Millennium Summit	78/1	Political declaration of the high-level political forum on sustainable development convened under the auspices of the General Assembly
57/253	World Summit on Sustainable Development	78/160; 80/147	Science, technology and innovation for sustainable development
57/270 B	Integrated and coordinated implementation of and follow-up to the outcomes of major United Nations conferences and summits in the economic and social fields	78/285	Review of the implementation of General Assembly resolution 75/290 A on the strengthening of the Economic and Social Council and resolution 75/290 B on the high-level political forum on sustainable development and the follow-up and review of the 2030 Agenda for Sustainable Development at the global level
58/220	Economic and technical cooperation among developing countries		
58/269	Strengthening of the United Nations: an agenda for further change		
59/243	Integration of the economies in transition into the world economy	78/317	The Antigua and Barbuda Agenda for Small Island Developing States: A Renewed Declaration for Resilient Prosperity
60/1	2005 World Summit Outcome	79/1	The Pact for the Future
60/265	Follow-up to the development outcome of the 2005 World Summit, including the Millennium Development Goals and the other internationally agreed development goals	79/216	Role of the United Nations in promoting development in the context of globalization and interdependence
63/303	Outcome of the Conference on the World Financial and Economic Crisis and Its Impact on Development	79/224	Human resources development
66/288	The future we want	80/118	Information and communications technologies for sustainable development
70/1	Transforming our world: the 2030 Agenda for Sustainable Development	80/124	Commodities
		80/137	Disaster risk reduction
		80/153	Implementation of the Third United Nations Decade for the Eradication of Poverty (2018–2027)
		80/154	Eradicating rural poverty to implement the 2030 Agenda for Sustainable Development

Economic and Social Council resolutions

1996/31	Consultative relationship between the United Nations and non-governmental organizations	2009/29; 2012/30	Role of the Economic and Social Council in the integrated and coordinated implementation of and follow-up to the outcomes of the major United Nations conferences and summits, in the light of relevant General Assembly resolutions, including resolution 61/16
1998/7	Importance of population census activities for evaluation of progress in implementing the Programme of Action of the International Conference on Population and Development		

Section 9 Economic and social affairs

2015/15	Progress in the implementation of General Assembly resolution 67/226 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system	2023/14	Creating full and productive employment and decent work for all as a way of overcoming inequalities to accelerate the recovery from the COVID-19 pandemic and the full implementation of the 2030 Agenda for Sustainable Development
2021/30	Open-source technologies for sustainable development	2024/19	Progress in the implementation of General Assembly resolution 75/233 on the quadrennial comprehensive policy review of operational activities for development of the United Nations system

Economic and Social Council agreed conclusion

2007	Ministerial declaration on strengthening efforts to eradicate poverty and hunger, including through the global partnership for development
------	--

Ministerial communiqués of the high-level segment of the substantive session of the Economic and Social Council

2003	Promoting an integrated approach to rural development in developing countries for poverty eradication and sustainable development	2007	Strengthening efforts at all levels to promote pro-poor sustained economic growth, including through equitable macroeconomic policies
2004	Resources mobilization and enabling environment for poverty eradication in the context of the implementation of the Programme of Action for the Least Developed Countries for the Decade 2001–2010	2007	Annual ministerial review on the theme “Strengthening efforts to eradicate poverty and hunger, including through the global partnership for development”
2006	Creating an environment at the national and international levels conducive to generating full and productive employment and decent work for all, and its impact on sustainable development	2008	Development Cooperation Forum
		2008	Annual ministerial review on the theme “Implementing the internationally agreed goals and commitments in regard to sustainable development”

Ministerial declarations of the high-level segment of the Economic and Social Council and the high-level political forum on sustainable development, convened under the auspices of the Council

E/HLS/2016/1	Implementing the post-2015 development agenda: moving from commitments to results; Ensuring that no one is left behind	E/HLS/2022/1	Building back better from the coronavirus disease (COVID-19) while advancing the full implementation of the 2030 Agenda for Sustainable Development
E/HLS/2017/1	Eradicating poverty in all its forms and dimensions through promoting sustainable development, expanding opportunities and addressing related challenges; Eradicating poverty and promoting prosperity in a changing world	E/HLS/2024/1	Reinforcing the 2030 Agenda for Sustainable Development and eradicating poverty in times of multiple crises: the effective delivery of sustainable, resilient and innovative solutions
		E/HLS/2025/1	Advancing sustainable, inclusive, science- and evidence-based solutions for the 2030 Agenda for Sustainable Development and its Sustainable Development Goals for leaving no one behind

Subprogramme 1

Intergovernmental support and coordination for sustainable development

General Assembly resolutions and decisions

61/16	Strengthening of the Economic and Social Council	68/1; 72/305	Review of the implementation of General Assembly resolution 61/16 on the strengthening of the Economic and Social Council
67/290	Format and organizational aspects of the high-level political forum on sustainable development		

Part IV International cooperation for development

75/290 A;	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council	75/511 B	High-level political forum on sustainable development
	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level	76/4	United Nations Pledging Conference for Development Activities
	Economic and Social Council	77/175; 79/216	Review of the functioning of the reinvigorated resident coordinator system, including its funding arrangement
	75/290 B	79/226	Role of the United Nations in promoting development in the context of globalization and interdependence
	Review of the implementation of General Assembly resolution 72/305 on the strengthening of the Economic and Social Council	80/155	Quadrennial comprehensive policy review of operational activities for development of the United Nations system
	Review of the implementation of General Assembly resolutions 67/290 on the format and organizational aspects of the high-level political forum on sustainable development and 70/299 on the follow-up and review of the 2030 Agenda for Sustainable Development at the global level		Operational activities for development of the United Nations system

Economic and Social Council resolutions and decisions

2004/52	Long-term programme of support for Haiti	2024/342	Improving the work of the Committee on Non-Governmental Organizations
2008/4	Measures to improve the quadrennial reporting procedures	2025/22	Ad Hoc Advisory Group on Haiti
2009/32; 2025/328	African countries emerging from conflict	2025/329	Sustainable development in the Sahel
2020/2	Support to the Sahel region	2026/302	Review of the functional commissions and expert bodies of the Economic and Social Council

Subprogramme 2 Inclusive social development

General Assembly resolutions

37/52	World Programme of Action concerning Disabled Persons	61/295	United Nations Declaration on the Rights of Indigenous Peoples
45/106; 46/91	Implementation of the International Plan of Action on Ageing and related activities	62/10	World Day of Social Justice
47/196	Observance of an international day for the eradication of poverty	62/126	Policies and programmes involving youth: youth in the global economy – promoting youth participation in social and economic development
48/96	Standard Rules on the Equalization of Opportunities for Persons with Disabilities	66/127; 80/179	Follow-up to the Second World Assembly on Ageing
50/81	World Programme of Action for Youth to the Year 2000 and Beyond	66/149	World Down Syndrome Day
50/141	International Year of Older Persons: towards a society for all ages	68/3	Outcome document of the high-level meeting of the General Assembly on the realization of the Millennium Development Goals and other internationally agreed development goals for persons with disabilities: the way forward, a disability-inclusive development agenda towards 2015 and beyond
51/58	The role of cooperatives in the light of new economic and social trends		Outcome document of the high-level plenary meeting of the General Assembly known as the World Conference on Indigenous Peoples
54/120; 80/180	Policies and programmes involving youth		
S-24/2	Further initiatives for social development		
61/106	Convention on the Rights of Persons with Disabilities	69/2	

Section 9 Economic and social affairs

69/145	World Youth Skills Day	79/8	Sport as an enabler of sustainable development
70/170	Towards the full realization of an inclusive and accessible United Nations for persons with disabilities	79/149	Inclusive development for and with persons with disabilities
77/240	Promoting and mainstreaming easy-to-understand communication for accessibility for persons with disabilities	79/159; 80/191 79/213	Rights of Indigenous Peoples Promoting the social and solidarity economy for sustainable development
77/324	World Basketball Day	80/5	Doha Political Declaration of the “World Social Summit” under the title “the Second World Summit for Social Development”
78/195	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: situations of risk and humanitarian emergencies	80/8	Building a peaceful and better world through sport and the Olympic ideal
78/281	World Football Day	80/175	Inclusive policies and programmes to address homelessness, including in the aftermath of the coronavirus disease (COVID-19)
78/310	World Fair Play Day		Promoting social integration through social inclusion
78/324	Consideration of decision 14/1 of the Open-ended Working Group on Ageing, entitled “Recommendations regarding the identification of possible gaps in the protection of the human rights of older persons and how best to address them”	80/181 80/182 80/183	Cooperatives in social development Follow-up to the thirtieth anniversary of the International Year of the Family and beyond
78/325	United Nations Games	80/197	Implementation of the Convention on the Rights of Persons with Disabilities and the Optional Protocol thereto: amplified barriers in diverse context
78/328	Enhancing the participation of Indigenous Peoples’ representatives and institutions in meetings of relevant United Nations bodies on issues affecting them		

Economic and Social Council resolutions and decisions

1996/7	Follow-up to the World Summit for Social Development and the future role of the Commission for Social Development	2020/7	Affordable housing and social protection systems for all to address homelessness
2000/22	Establishment of a Permanent Forum on Indigenous Issues	2021/10	Socially just transition towards sustainable development: the role of digital technologies on social development and well-being of all
2008/18	Promoting full employment and decent work for all	2023/15	Fourth review and appraisal of the Madrid International Plan of Action on Ageing, 2002
2016/8	Rethinking and strengthening social development in the contemporary world	2025/5	Future organization and methods of work of the Commission for Social Development
2017/12	Promoting the rights of persons with disabilities and strengthening the mainstreaming of disability in the implementation of the 2030 Agenda for Sustainable Development	2025/6 2025/8	Social dimensions of the New Partnership for Africa’s Development Modalities for the fifth review and appraisal of the Madrid International Plan of Action on Ageing, 2002
2018/5	Strategies for eradicating poverty to achieve sustainable development for all	E/2026/26	Report of the Commission for Social Development on its sixty-fourth session and provisional agenda and documentation for its sixty-fifth session
2019/6	Addressing inequalities and challenges to social inclusion through fiscal, wage and social protection policies		

Economic and Social Council agreed conclusions

1996/1	Coordination of the United Nations system activities for poverty eradication
--------	--

Commission for Social Development resolutions

45/2	Youth	61/1	Policies and programmes involving youth
------	-------	------	---

Subprogramme 3 Sustainable development

General Assembly resolutions and decisions

71/222	International Decade for Action, “Water for Sustainable Development”, 2018–2028	79/204	Towards the Sustainable Development of the Caribbean Sea for present and future generations
71/312	Our ocean, our future: call for action	79/206; 80/138	Protection of global climate for present and future generations of humankind
72/212; 78/148	Strengthening the links between all modes of transport to achieve the Sustainable Development Goals	79/210	Harmony with Nature
76/296	Our ocean, our future, our responsibility	79/211; 80/142	Ensuring access to affordable, reliable, sustainable and modern energy for all
77/158	International Year of Glaciers’ Preservation, 2025	79/314	Our ocean, our future: united for urgent action
77/286; 78/128	World Sustainable Transport Day	80/108	2028 United Nations Conference to Support the Implementation of Sustainable Development Goal 14: Conserve and sustainably use the oceans, seas and marine resources for sustainable development
77/334	Follow-up to the United Nations Conference on the Midterm Comprehensive Review of the Implementation of the Objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028	80/132	United Nations Decade of Sustainable Transport 2026–2035
78/327	Modalities of the 2026 United Nations Water Conference to Accelerate the Implementation of Sustainable Development Goal 6: Ensure availability and sustainable management of water and sanitation for all	80/133	Agricultural technology for sustainable development
78/558	Enhancing action on sea level rise	80/136	Follow up to and implementation of the Antigua and Barbuda Agenda for Small Island Developing States: A Renewed Declaration for Resilient Prosperity
79/202; 80/135	Promoting sustainable consumption and production patterns for the implementation of the 2030 Agenda for Sustainable Development, building on Agenda 21	80/144	Sustainable mountain development
		80/146	Multidimensional vulnerability index
		80/157	Agriculture development, food security and nutrition

Subprogramme 4 Statistics

General Assembly resolutions

68/261	Fundamental Principles of Official Statistics	71/313	Work of the Statistical Commission pertaining to the 2030 Agenda for Sustainable Development
69/266	A global geodetic reference frame for sustainable development		
69/282	World Statistics Day		

Economic and Social Council resolutions and decisions

2006/6	Strengthening statistical capacity	2020/5	Strengthening coordination of the statistical programmes in the United Nations system
2011/24	Committee of Experts on Global Geospatial Information Management	2022/3	Ensuring that the work in the field of statistics and data is adaptive to the changing statistical and data ecosystem
2013/21	Fundamental Principles of Official Statistics	2022/24	Enhancing global geospatial information management arrangements
2014/31	A global geodetic reference frame for sustainable development	2023/337	World Geographical Names Database
2016/27	Strengthening institutional arrangements on geospatial information management	2024/2	An inclusive and representative Statistical Commission to leave no one behind
2018/2	Future organization and methods of work of the United Nations Group of Experts on Geographical Names	2025/12	System of National Accounts 2025
2018/14	Strategic Framework on Geospatial Information and Services for Disasters	2025/13	2030 World Population and Housing Census Programme

Section 9		Economic and social affairs	
2025/315	Report of the Statistical Commission on its fifty-sixth session and provisional agenda and dates of the fifty-seventh session of the Commission	2026/305	Report of the Committee of Experts on Global Geospatial Information Management on its fifteenth session and provisional agenda and dates of the sixteenth session of the Committee
2025/343	Report of the United Nations Group of Experts on Geographical Names on its 2025 session and provisional agenda and dates of its 2027 session		
Subprogramme 5			
Population			
<i>General Assembly resolutions</i>			
49/128	Report of the International Conference on Population and Development	71/1	New York Declaration for Refugees and Migrants
S-21/2	Key actions for the further implementation of the Programme of Action of the International Conference on Population and Development	73/195	Global Compact for Safe, Orderly and Regular Migration
65/234	Follow-up to the International Conference on Population and Development beyond 2014	73/326	Format and organizational aspects of the international migration review forums
68/4	Declaration of the High-level Dialogue on International Migration and Development	76/266	Progress Declaration of the International Migration Review Forum
		77/176; 79/217	International migration and development
<i>Economic and Social Council resolutions and decisions</i>			
1994/2	Work programme in the field of population	2005/213	Improvement of the work of the Commission on Population and Development
1995/55	Implementation of the Programme of Action of the International Conference on Population and Development	2016/25	Future organization and methods of work of the Commission on Population and Development
1997/2	International migration and development		
1997/42	Follow-up to the International Conference on Population and Development	2022/332	Cycle for the review and appraisal of the implementation of the Programme of Action of the International Conference on Population and Development
1999/10	Population growth, structure and distribution		
<i>Commission on Population and Development resolutions</i>			
2004/1	Work programme in the field of population	2013/1	New trends in migration: demographic aspects
2007/1	Changing age structures of populations and their implications for development	2014/1	Assessment of the status of implementation of the Programme of Action of the International Conference on Population and Development
2008/1	Population distribution, urbanization, internal migration and development	2016/1	Strengthening the demographic evidence base for the 2030 Agenda for Sustainable Development
2009/1	The contribution of the Programme of Action of the International Conference on Population and Development to the internationally agreed development goals, including the Millennium Development Goals	2021/1	Population, food security, nutrition and sustainable development
2010/1	Health, morbidity, mortality and development	2022/1	Population and sustainable development, in particular sustained and inclusive economic growth
2011/1	Fertility, reproductive health and development		
2012/1	Adolescents and youth		
Subprogramme 6			
Economic analysis and policy			
<i>General Assembly resolutions</i>			
118 (II)	Reports on world economic conditions and trends	59/209; 67/221	Smooth transition for countries graduating from the list of least developed countries

Part IV International cooperation for development

61/210	Integration of the economies in transition into the world economy	79/230	Graduation of Cambodia and Senegal from the least developed country category
68/18; 73/133	Graduation of countries from the least developed country category	80/120	Unilateral economic measures as a means of political and economic coercion against developing countries
76/8	Graduation of Bangladesh, the Lao People's Democratic Republic and Nepal from the least developed country category	80/121	International trade and development
77/323	Extension of the preparatory period preceding the graduation of Solomon Islands from the least developed country category	80/149	Development cooperation with middle-income countries
78/125	Graduation of Bhutan from the least developed country category	80/150	Follow-up to the Fifth United Nations Conference on the Least Developed Countries
78/126	Deferral of the graduation of Angola from the least developed country category to a later date	80/151	Follow-up to the Third United Nations Conference on Landlocked Developing Countries
79/215	Towards a New International Economic Order		

Economic and Social Council resolutions and decisions

1990/52	Role of the United Nations in the early identification, analysis and forecasting of world economic developments	2011/274	Review of United Nations support for small island developing States
1998/46	Further measures for the restructuring and revitalization of the United Nations in the economic, social and related fields	2024/7	Report of the Committee for Development Policy on its twenty-sixth session
2007/34	Report of the Committee for Development Policy on its ninth session	2025/2	Report of the Committee for Development Policy on its twenty-seventh session
		2025/23	Doha Programme of Action for the Least Developed Countries for the decade 2022–2031

**Subprogramme 7
Institutions and digital transformation***General Assembly resolutions*

50/225; 60/34	Public administration and development	79/231	Promoting and fostering the efficiency, accountability, effectiveness and transparency of public administration by strengthening supreme audit institutions
69/327	Promoting inclusive and accountable public services for sustainable development		
71/256	New Urban Agenda	79/334	Impact of rapid technological change on the achievement of the Sustainable Development Goals and targets
77/150	Information and communication technologies for sustainable development		
77/320	Impact of rapid technological change on the achievement of the Sustainable Development Goals and targets	80/173	Outcome document of the high-level meeting of the General Assembly on the overall review of the implementation of the outcomes of the World Summit on the Information Society
78/311	Enhancing international cooperation on capacity-building of artificial intelligence		
79/190	Preventing and combating corrupt practices and the transfer of proceeds of corruption, facilitating asset recovery and returning such assets to legitimate owners, in particular to countries of origin, in accordance with the United Nations Convention against Corruption		

Economic and Social Council resolutions

2001/45	Restructuring and revitalization of the Group of Experts on the United Nations Programme in Public Administration and Finance	2022/9	Report of the Committee of Experts on Public Administration on its twenty-first session
2021/30	Open-source technologies for sustainable development	2023/3; 2024/13; 2025/18	Assessment of the progress made in the implementation of and follow-up to the outcomes of the World Summit on the Information Society

2023/28	Report of the Committee of Experts on Public Administration on its twenty-second session	2024/16	Report of the Committee of Experts on Public Administration on its twenty-third session
2024/14 ; 2025/19	Science, technology and innovation for development	2025/31	Report of the Committee of Experts on Public Administration on its twenty-fourth session

Subprogramme 8 Sustainable forest management

General Assembly resolutions

62/98	Non-legally binding instrument on all types of forests	78/320	Fostering sustainable forest management, including afforestation and reforestation, in degraded lands, including drylands, as an effective solution to environmental challenges
67/200	International Day of Forests		
70/199 ; 71/286	United Nations forest instrument	79/283	United Nations Decade for Afforestation and Reforestation in line with Sustainable Forest Management (2027–2036)
71/285	United Nations strategic plan for forests 2017–2030		

Economic and Social Council resolutions

2000/35	Report of the fourth session of the Intergovernmental Forum on Forests	2017/4	United Nations strategic plan for forests 2017–2030 and quadrennial programme of work of the United Nations Forum on Forests for the period 2017–2020
2015/33	International arrangement on forests beyond 2015	2024/15	Outcome of the nineteenth session of the United Nations Forum on Forests

Subprogramme 9 Financing for sustainable development

General Assembly resolutions

56/210 B	International Conference on Financing for Development	79/228	Towards global partnerships: a principle-based approach to enhanced cooperation between the United Nations and all relevant partners
57/250	High-Level Dialogue on strengthening international economic cooperation for development through partnership	79/319	Interaction between the United Nations, national parliaments and the Inter-Parliamentary Union
57/273	Ensuring effective secretariat support for sustained follow-up to the outcome of the International Conference on Financing for Development	79/323	Sevilla Commitment
		80/122	International financial system and development
		80/123	External debt sustainability and development
63/239	Doha Declaration on Financing for Development: outcome document of the Follow-up International Conference on Financing for Development to Review the Implementation of the Monterrey Consensus	80/125	Financial inclusion for sustainable development
		80/127	Promoting investments for sustainable development
69/313	Addis Ababa Action Agenda of the Third International Conference on Financing for Development (Addis Ababa Action Agenda)	80/128	Promotion of inclusive and effective international tax cooperation at the United Nations
71/327	The United Nations in global economic governance	80/129	Follow-up to and implementation of the outcomes of the International Conferences on Financing for Development
		80/156	South-South cooperation

Economic and Social Council resolutions

2004/69 ; 2006/48 ; 2017/2	Committee of Experts on International Cooperation in Tax Matters	E/FFDF/2024/3 ; E/FFDF/2025/2	Report of the Economic and Social Council forum on financing for development follow-up (Follow-up and review of the financing for development outcomes and the means of implementation of the 2030 Agenda for Sustainable Development)
2017/3	United Nations code of conduct on cooperation in combating international tax evasion		

Deliverables

9.17 Table 9.1 lists all cross-cutting deliverables of the programme.

Evaluation activities

- 9.18 The following evaluations completed in 2025 have guided the proposed programme plan for 2027:
- (a) Office of Internal Oversight Services (OIOS) thematic evaluation: SDG climate-focused partnerships;
 - (b) System-wide evaluation: United Nations Disability Inclusion Strategy;
 - (c) System-wide evaluation: Progress towards a “new generation of United Nations country teams”.
- 9.19 In response to the results of the evaluations referenced above, the Department is, inter alia:
- (a) strengthening the use of partnerships to advance Sustainable Development Goals related to addressing the adverse impacts of climate change;
 - (b) engaging in Secretariat-wide partnership platforms to address common partnership challenges;
 - (c) strengthening standards for disability inclusion and accountability;
 - (d) ensuring more effective and efficient implementation of the United Nations Disability Inclusion Strategy; and
 - (e) streamlining the monitoring frameworks of the quadrennial comprehensive policy review and the resident coordinator system to ensure that they are more strategic and results-oriented.
- 9.20 The following evaluations are planned for 2027:
- (a) OIOS programme evaluation on the Department’s subprogrammes;
 - (b) Internal and/or external evaluations on cross-cutting or thematic topics across subprogrammes, subject to the availability of resources;
 - (c) Evaluations on capacity-building activities.

Programme of work

Subprogramme 1

Intergovernmental support and coordination for sustainable development

Objective

- 9.21 The objective, to which this subprogramme contributes, is to advance the roles of the General Assembly, the Economic and Social Council and the high-level political forum on sustainable development in the integrated implementation of and follow-up to the 2030 Agenda and the outcomes of other United Nations conferences and summits in the economic, social, environmental and related fields.

Strategy

- 9.22 To contribute to the objective, the subprogramme will continue to support the Economic and Social Council and the high-level political forum on sustainable development in the promotion and review of the integrated implementation of the 2030 Agenda and related international commitments within the context of the follow-up to the 2023 political declaration adopted at the high-level political forum convened under the auspices of the General Assembly and the ministerial declaration of the high-level segment of the 2025 session of the Economic and Social Council and the 2025 high-level political forum on sustainable development. Specifically, the subprogramme will:
- (a) Provide evidence-based analysis and advice to the Council, including to its President and Bureau, by: (i) facilitating policy dialogue and the formulation of policy recommendations, supporting the follow-up of major global sustainable development-related commitments; (ii) monitoring and leveraging the work of its subsidiary bodies and United Nations system entities; (iii) identifying new and emerging issues impacting the Sustainable Development Goals; (iv) reinforcing the links between policy discussions and reviews and national sustainable development efforts; and (v) supporting the implementation of the outcome of the General Assembly review of the Economic and Social Council and the high-level political forum at its eightieth session;
 - (b) Support the high-level political forum on sustainable development held under the auspices of the Council and the General Assembly (the 2027 Sustainable Development Goals Summit) on the follow-up to and implementation of the 2030 Agenda by: (i) facilitating the progress review, policy dialogue and development of policy recommendations for the accelerated achievement of the Sustainable Development Goals and the 2030 Agenda, including through enhanced advocacy and communication efforts; (ii) assisting countries in preparing evidence-based, inclusive and analytical voluntary national reviews of their implementation of the 2030 Agenda; and (iii) engaging United Nations country teams, other subprogrammes of the Department and United Nations system entities in supporting the review process;
 - (c) Provide substantive support, upon request, to policy discussions and negotiations of the General Assembly, notably its Second Committee (economic and financial issues);
 - (d) Provide evidence and analysis for Member States to review and guide the operational activities of the United Nations development system based on mandates from the General Assembly's 2024 quadrennial comprehensive policy review of the operational activities for development of the United Nations system, including through the redesigned quadrennial comprehensive policy review monitoring framework, in collaboration with United Nations system entities;
 - (e) Support the resident coordinator system in guiding United Nations country teams in assisting countries in conducting voluntary national reviews and in enabling the country teams to provide coordinated assessment of the implementation of the quadrennial comprehensive policy review, in coordination with the Development Coordination Office;
 - (f) Support the work of the Ad Hoc Advisory Group on Haiti in providing advice on the long-term development strategy of the country, promoting socioeconomic recovery, reconstruction and sustainability and encouraging international support, based on Haiti's national development priorities;
 - (g) Provide analysis, evidence and recommendations on effective, people-centred and gender-sensitive approaches to address multiple and interlinked global development challenges and accelerate the implementation of the 2030 Agenda, including addressing the impacts of those challenges on women and people in vulnerable situations, ensuring that no one is left behind;
 - (h) Support the engagement of non-governmental organizations (NGOs) in the work of the Council and the participation of major groups and other stakeholders in relevant intergovernmental processes, including the high-level political forum on sustainable development;

- (i) Strengthen the engagement of young people in the work of the United Nations by improving the annual Council youth forum, in cooperation with the United Nations Youth Office and subprogramme 2, and facilitating the participation of youth speakers in other Council segments, forums, special meetings and the high-level political forum on sustainable development.
- 9.23 The above-mentioned work is expected to result in:
- (a) Enhanced policy and operational guidance by the General Assembly and the Economic and Social Council on the implementation of the 2030 Agenda at the global, regional and country levels;
 - (b) A strengthened Council and high-level political forum on sustainable development, which will include improved understanding of the role of the Council as a principal Charter body for the coordinated and integrated implementation of the 2030 Agenda and that of the high-level political forum for more effective follow-up and review of the achievement of the Sustainable Development Goals;
 - (c) Better understanding among Member States, United Nations system organizations and other stakeholders of the multiple and interlinked global challenges affecting implementation of the 2030 Agenda, and of policy options and practical measures for addressing those challenges, while accelerating progress towards the achievement of the Sustainable Development Goals and the implementation of the Pact for the Future, and better coordination and coherence in the global response to ongoing challenges;
 - (d) Progress at the country level towards realizing the Sustainable Development Goals, including in countries presenting voluntary national reviews at the high-level political forum on sustainable development;
 - (e) Effective, efficient and coordinated United Nations development system support towards implementing the 2030 Agenda and responding to global development challenges, including support for voluntary national reviews, as well as improved and clearer guidance from Member States to the United Nations development system;
 - (f) Increased and coordinated international support for Haiti's long-term development, stability and sustainable development;
 - (g) The voice of young people being heard at deliberations through the Council's youth forum;
 - (h) Improved engagement of NGOs in the work of the United Nations through support for the Committee on Non-Governmental Organizations, including through the integrated civil society organization system;
 - (i) Increased participation of major groups and other stakeholders in the work of the high-level political forum on sustainable development, as mandated in General Assembly resolution [67/290](#).

Programme performance in 2025

Reaffirmed political commitments to the 2030 Agenda for Sustainable Development on its tenth anniversary

- 9.24 The tenth anniversary of the 2030 Agenda was a critical juncture for Member States and stakeholders, who marked the occasion with productive and meaningful dialogue, engagement in intergovernmental decision-making and contributions to renewed political commitment for the Sustainable Development Goals. The subprogramme supported the Economic and Social Council, including its various segments and forums, and the high-level political forum on sustainable development. The subprogramme organized the 2025 high-level political forum, bringing together more than 6,000 participants, including more than 800 stakeholder representatives, reviewed progress and policy options for accelerating progress on the Goals under review (Goals 3, 5, 8, 14 and 17) and provided a platform for 35 voluntary national reviews.
- 9.25 Progress towards the objective is presented in the performance measure below (see table 9.2).

Table 9.2
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
Member States sustained multilateral engagement through Economic and Social Council-led intergovernmental dialogue, maintaining focus on sustainable development amid global development challenges	Member States engaged in intergovernmental dialogue to assess progress on the implementation of the 2030 Agenda, align priorities across United Nations processes and articulate shared directions for sustainable development, contributing to the Summit of the Future	Member States reaffirmed their political commitment to the 2030 Agenda through the adoption of the ministerial declaration of the high-level segment of the 2025 session of the Economic and Social Council and the 2025 high-level political forum on sustainable development, emphasizing accelerated, evidence-based and multilateral action in the remaining years to 2030

Planned results for 2027

Result 1: strengthened role of the Economic and Social Council to support Member States to translate commitments from the Sustainable Development Goals Summit into actions and national policies

Programme performance in 2025 and target for 2027

- 9.26 The subprogramme's work contributed to the Economic and Social Council and its subsidiary bodies providing policy guidance towards intergovernmental meetings, including the Fourth International Conference on Financing for Development, which met the planned target.
- 9.27 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.3).

Table 9.3
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Strengthened coordination between the Economic and Social Council and the General Assembly, leading to policy guidance from the Council that helps Member States to translate commitments from the Sustainable Development Goals Summit into national policies and programmes	Economic and Social Council provided policy guidance to the preparations for the Summit of the Future through the ministerial declaration of the Council and the high-level political forum on sustainable development, calling for accelerated action for the achievement of Goals and full implementation of the political declaration of the 2023 Sustainable Development Goals Summit	Economic and Social Council and its subsidiary bodies provided policy guidance towards intergovernmental meetings, including the Fourth International Conference on Financing for Development	Economic and Social Council provides further guidance to enhance the work of its subsidiary bodies, including through its review of the implementation of the recommendations of the 2022 review of its functional commissions and expert bodies	Economic and Social Council policy guidance supports Member States in identifying shared priorities for the 2027 Sustainable Development Goals Summit, strengthening collective efforts to close major gaps in progress towards achievement of the Goals in the lead-up to 2030

Result 2: accelerated achievement of the Sustainable Development Goals through an effective preparatory process for voluntary national reviews

Programme performance in 2025 and target for 2027

- 9.28 The subprogramme's work contributed to 91 per cent of countries engaging more than one national entity in the preparation of their voluntary national reviews, which exceeded the planned target of 90 per cent.
- 9.29 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 9.I).

Figure 9.I

Performance measure: countries that engaged more than one national entity in the preparation of their voluntary national reviews

(Percentage)

Result 3: strengthened Economic and Social Council guidance to the United Nations development system for improved delivery of operational activities for development

Proposed programme plan for 2027

- 9.30 Economic and Social Council system-wide guidance is essential to ensure that the United Nations development system delivers operational activities for development with greater efficiency, transparency and accountability. The subprogramme supports the Council's oversight role by managing the collection, validation and analysis of system-wide performance data, enabling Member States to assess trends, identify gaps and provide evidence-based guidance to strengthen United Nations support for the 2030 Agenda.

Lessons learned and planned change

- 9.31 The lesson for the subprogramme was that the monitoring tools were complex and that more could be done to simplify their use by Member States. In applying the lesson, the subprogramme will introduce impact-focused performance indicators, digitalize data management and analysis, and streamline surveys and other data collection instruments to strengthen evidence-based decision-making and reduce the burden on stakeholders.
- 9.32 Expected progress towards the objective is presented in the performance measure below (see table 9.4).

Table 9.4
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	Member States' feedback informed the refinement of monitoring frameworks to support more strategic guidance on operational activities	Streamlined quadrennial comprehensive policy review reporting and consolidated reform results provided Member States with a clearer assessment of system-wide quadrennial comprehensive policy review implementation	Member States use simplified results-focused indicators and analysis to inform discussions and strategic guidance on operational activities	Results-focused quadrennial comprehensive policy review monitoring and reporting enable Member States to assess system-wide performance trends and identify implementation gaps

Deliverables

9.33 Table 9.5 lists all deliverables of the subprogramme.

Table 9.5
Subprogramme 1: deliverables for the period 2025–2027, by category and subcategory

14. High-level political forum on sustainable development: workshops (regional) on the preparation of voluntary national reviews in the context of the high-level political forum	5	5	– [5]	–
15. High-level political forum on sustainable development: seminars, workshops and other events related to the preparation of the high-level political forum	4	2	4	4
Technical materials (number of materials)	12	8	5	5
16. Studies on the implementation of the quadrennial comprehensive policy review	7	6	4 [7]	4
17. Studies and materials on issues related to the Economic and Social Council	1	1	– [1]	–
18. Studies and materials on issues related to the high-level political forum on sustainable development, including on the voluntary national reviews	3	1	1 [3]	1
19. Studies and materials on issues related to the Committee on Non-Governmental Organizations	1	–	–	–

C. Substantive deliverables

Consultation, advice and advocacy: consultations on: General Assembly and Economic and Social Council resolutions, the quadrennial comprehensive policy review of United Nations system operational activities for development, ministerial declarations of the Council and the high-level political forum on sustainable development, and reports of the Committee on Non-Governmental Organizations; advice and analysis to the President and Bureau of the Council, the Bureau of the Second Committee and joint Bureau meetings, Member States and stakeholders on sustainable development issues; consultation and advice to the Ad Hoc Advisory Group on Haiti; advocacy for the accelerated implementation of the 2030 Agenda and participation of NGOs, major groups and other stakeholders in the work of the Council and the high-level political forum; advocacy for the funding compact; and advice on inter-agency coordination mechanisms.

Databases and substantive digital materials: database on voluntary national reviews (406 entries); database on input to the high-level political forum (1,400 entries); paperless committee for official documentation of the Committee on Non-Governmental Organizations (41 sessions); integrated information and communications technology platforms for 6,468 NGOs in consultative status; indicator framework on the implementation of the quadrennial comprehensive policy review for Member States (400 new entries); database on the funding of United Nations operational activities for development (25,000 new entries); and database on the funding compact agreed to by Member States and the United Nations Sustainable Development Group in 2024.

D. Communication deliverables

Outreach programmes, special events and information materials: information materials on the work of the Economic and Social Council, the General Assembly and the high-level political forum on sustainable development; content for social media platforms, in collaboration with the Department of Global Communications; and webinars for some 6,000 NGOs in consultative status on participation in the activities of the Council and the United Nations.

Digital platforms and multimedia content: web pages and multimedia content for the Economic and Social Council and the high-level political forum on sustainable development; and website of the integrated Civil Society Organizations System.

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 9).

Subprogramme 2

Inclusive social development

Objective

- 9.34 The objective, to which this subprogramme contributes, is to advance policies for the eradication of poverty, the reduction in inequality and the achievement of greater social inclusion and well-being for all.

Strategy

- 9.35 To contribute to the objective, the subprogramme will:
- (a) Conduct evidence-based research and analysis, including on Indigenous Peoples, persons with disabilities, older persons and young people;
 - (b) Monitor national and global socioeconomic trends to identify emerging issues and assess their implications for social policy at the national and international levels, which will help Member States to make progress towards achieving the commitments made in the Copenhagen Declaration on Social Development, the Doha Political Declaration of the “World Social Summit” under the title “the Second World Summit for Social Development”, the Pact for the Future, and Sustainable Development Goals 1 to 11 and 16;
 - (c) Provide substantive support for intergovernmental dialogue and processes, including the sessions of the Commission for Social Development, the Permanent Forum on Indigenous Issues, the Conference of States Parties to the Convention on the Rights of Persons with Disabilities, the Economic and Social Council and the General Assembly;
 - (d) Provide analyses, technical advice and capacity development to requesting countries in partnership with resident coordinators and United Nations entities. The subprogramme’s analytical work will include a focus on reducing inequality, insecurity and strengthening social protection systems, and it will advance the situation of those in vulnerable situations and engage more closely with United Nations country teams to enhance action at the national level;
 - (e) Support Member States on issues related to shocks and recovery by promoting socially inclusive policy responses designed to eradicate poverty, reduce inequalities and protect the most vulnerable populations.
- 9.36 The above-mentioned work is expected to result in:
- (a) Enhanced knowledge and awareness of Member States to ensure that no one is left behind;
 - (b) Recognition by Member States of specific social development issues as a basis for action at the national level;
 - (c) Increased capacity of Member States to effectively implement the social dimension of the 2030 Agenda and the commitments contained in the Copenhagen Declaration on Social Development and the Doha Political Declaration of the “World Social Summit” under the title “the Second World Summit for Social Development”;
 - (d) Progress of Member States in achieving more resilient and inclusive societies, placing the world back on track to implementing the 2030 Agenda.

Programme performance in 2025

The *World Social Report 2025* informed social policy dialogue in intergovernmental bodies

- 9.37 Global trends such as growing economic insecurity and inequality, declining levels of trust in public institutions and social fragmentation can negatively impact societies. The subprogramme leveraged external and United Nations system partnerships to produce the *World Social Report 2025*, highlighting current social challenges and underscoring the need for policies grounded in equity, economic security and solidarity. The *Report* was co-produced with the United Nations University World Institute for Development Economics Research and generated strong interest and uptake from Member States, senior leadership and international partners. Launched in the lead-up to the Second World Summit for Social Development, the *Report* was widely cited and referenced in policy discussions and deliberations.
- 9.38 Progress towards the objective is presented in the performance measure below (see table 9.6).

Table 9.6

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
Consultations with United Nations system and external partners, and collaboration with United Nations University World Institute for Development Economics Research	An advisory board of prominent experts on economic and social issues from academia, the United Nations system and government guided the drafting process of the <i>World Social Report 2025</i>	At the Second World Summit for Social Development, Member States issued a call to action to address the barriers to social progress identified in the <i>World Social Report</i>

Planned results for 2027

Result 1: improved coherence of the United Nations system efforts in addressing the needs of Indigenous Peoples

Programme performance in 2025 and target for 2027

- 9.39 The subprogramme's work contributed to the integration of the indicator framework for the system-wide action plan on the rights of Indigenous Peoples into reporting elements of United Nations country teams, which did not meet the planned target of additional countries using a final indicator framework for the system-wide action plan. The target was not met because the launch of the indicator framework was delayed owing to modifications to the methodology for its development.
- 9.40 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.7).

Table 9.7
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
The Inter-Agency Support Group on Indigenous Peoples' Issues identified elements to develop an indicator framework for the system-wide action plan on the rights of Indigenous Peoples	Indicator framework for the system-wide action plan was developed	Indicator framework for the system-wide action plan was integrated into reporting elements of United Nations country teams	A reporting mechanism for the system-wide action plan is in use by United Nations country teams	Increased engagement of Indigenous Peoples with United Nations country teams supports and promotes the implementation of the United Nations Declaration on the Rights of Indigenous Peoples

Result 2: accelerated social development through the Second World Summit for Social Development

Programme performance in 2025 and target for 2027

- 9.41 The subprogramme's work contributed to the Summit being held in Qatar in November 2025 and to Member States adopting the Doha Political Declaration of the "World Social Summit", under the title "the Second World Summit for Social Development", which met the planned target.
- 9.42 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.8).

Table 9.8
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Member States express concern about the uneven and slow progress in social development	The General Assembly adopted resolutions 78/261 and 78/318, on convening the Second World Summit for Social Development	The Summit was held in Qatar and an action-oriented political declaration (General Assembly resolution 80/5) was adopted by Member States	A follow-up plan to the outcome of the Summit is developed by Member States	Member States translate Summit commitments into concrete national policy actions

Result 3: improved quality of life of older persons through the fifth review and appraisal of the implementation of the Madrid International Plan of Action on Ageing

Proposed programme plan for 2027

- 9.43 The Madrid International Plan of Action on Ageing, adopted in 2002, provides a framework of commitments and policy approaches related to population ageing and older persons. Its implementation is reviewed every five years. Participation in that review ensures that national policies and strategies are evaluated through a bottom-up, participatory process involving older persons. By identifying policy gaps and priority actions, the review process supports more effective national responses that directly affect the well-being and quality of life of older persons. The subprogramme has supported Member States' review of the Madrid Plan of Action through analytical work and capacity-building.

Lessons learned and planned change

9.44 The lesson for the subprogramme was the need to strengthen the support to Member States to mainstream ageing into national development strategies and to enhance awareness of the Madrid Plan of Action. In applying the lesson, the subprogramme will organize technical assistance and awareness-raising projects to support inclusive national reviews of the Madrid Plan of Action.

9.45 Expected progress towards the objective is presented in the performance measure below (see table 9.9).

Table 9.9

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
The fourth review of the Madrid International Plan of Action on Ageing found limited knowledge and use of the Plan by policymakers and disparities among and within regions in its implementation	Stakeholders' capacity was strengthened to implement the Madrid Plan of Action in support of the well-being for older persons	Member States began preparations for national, regional and global reviews of the Madrid Plan of Action following the adoption of the modalities and timeline for the fifth review cycle	Efforts to engage in capacity-building initiatives focused on promoting the Madrid Plan of Action are accelerated among stakeholders	Member States participate in the fifth review cycle of the Madrid Plan of Action, including through regional review processes

Deliverables

9.46 Table 9.10 lists all deliverables of the subprogramme.

Table 9.10

17. Segments of the report of the Secretary-General on homelessness (joint report with the United Nations Human Settlements Programme (UN-Habitat))	1	–	–	1
C. Substantive deliverables				
Consultation, advice and advocacy: advice to requesting Member States on socioeconomic situations and normative, policy and administrative frameworks on the social dimensions of sustainable development and the Sustainable Development Goals; and expert advice to more than 40 Member States on sustainable development issues, including on high-level bilateral consultations and intergovernmental meetings.				
Databases and substantive digital materials: database on policies and measures to combat hunger and poverty.				
D. Communication deliverables				
Outreach programmes, special events and information materials: special events, including commemorations of international days on various social issues; and policy briefs and communication activities to promote advancement of social development.				
External and media relations: briefings, press conferences and press releases on various social issues.				
Digital platforms and multimedia content: electronic, audio and video messaging on ageing, cooperatives, disability, family, issues concerning Indigenous Peoples, young people and sport for development and peace.				

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 9).

Subprogramme 3 Sustainable development

Objective

- 9.47 The objective, to which this subprogramme contributes, is to accelerate the implementation of the 2030 Agenda, including the achievement of the Sustainable Development Goals and their targets and commitments, through increased engagement of Member States and other stakeholders.

Strategy

- 9.48 To contribute to the objective, the subprogramme will:
- (a) Prepare analytical reports and assessments, maintain online databases and organize thematic expert meetings and conferences on specific Sustainable Development Goals and their interlinkages;
 - (b) Organize, in the lead up to the high-level political forum on sustainable development, expert group meetings and conferences for Member States, on the themes of the forum and the Sustainable Development Goals that are under review;

- (c) Play a central role in inter-agency coordination mechanisms on water, energy, small island developing States, oceans and transport, and through its long-standing cooperation with specific agencies on issues such as climate change and partnership-building for sustainable development;
- (d) Convene special events in connection with the high-level political forum on sustainable development, including the Sustainable Development Goals business forum and the local and regional governments forum, enabling the sharing of lessons learned and good practices among Member States and stakeholders in the development arena;
- (e) Organize, in coordination with the regional commissions, resident coordinator offices and United Nations country teams, as applicable, capacity-building activities at the global, regional and national levels on the above topics.

9.49 The above-mentioned work is expected to result in:

- (a) Increased knowledge of Member States and stakeholders of the 2030 Agenda and its Sustainable Development Goals, including for their deliberations during the high-level political forum on sustainable development and other related forums, and for the development of related national policies and programmes;
- (b) Increased integration of Sustainable Development Goals into inclusive national planning processes, policies and strategies, and increased action and initiatives taken by Member States and other stakeholders to accelerate the implementation of the 2030 Agenda.

Programme performance in 2025

Implementation plan for the United Nations Decade of Sustainable Transport (2026–2035) launched

9.50 Member States called for the preparation of an implementation plan for the United Nations Decade of Sustainable Transport (2026–2035) to catalyse action in this area. The subprogramme, in collaboration with the regional economic commissions and in consultation with Member States and other relevant stakeholders, prepared the implementation plan, providing a shared vision for the Decade with six priority areas and the means of implementation needed for transformative action by all stakeholders. The implementation plan strengthens the links between all modes of transport to achieve the Goals and emphasizes the accessibility and safety and security of transport systems, focusing on the needs of women and girls and of persons with disabilities.

9.51 Progress towards the objective is presented in the performance measure below (see table 9.11).

Table 9.11
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
The General Assembly adopted resolution 78/148 , in which it called for the preparation of an implementation plan for the United Nations Decade of Sustainable Transport	Member States, specialized agencies, funds, programmes and bodies of the United Nations, other intergovernmental organizations, NGOs and stakeholders carried out inclusive consultations to inform the implementation plan	The implementation plan was launched, providing a shared vision and indicating priority areas that informed Member States' actions on sustainable transport Member States used the plan to accelerate collective action towards sustainable, inclusive, accessible, affordable, safe, low- or zero-emission, energy-efficient, quality, reliable and resilient transport systems worldwide

Planned results for 2027

Result 1: accelerated progress for Sustainable Development Goal 14 through the third United Nations Ocean Conference

Programme performance in 2025 and target for 2027

- 9.52 The subprogramme's work contributed to the adoption of the political declaration entitled "Our ocean, our future: united for urgent action" at the third Ocean Conference, which met the planned target.
- 9.53 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.12).

Table 9.12

Performance measure

<i>2023 (actual)</i>	<i>2024 (actual)</i>	<i>2025 (actual)</i>	<i>2026 (planned)</i>	<i>2027 (planned)</i>
The General Assembly adopted resolution 78/128 on the modalities for the third Ocean Conference	Preparatory meeting for the third Ocean Conference held in July 2024 Member States agreed on the overall programme of the Conference	A political declaration, with commitments, was adopted by Member States at the third Ocean Conference	Member States advance the objectives contained in the political declaration and support the implementation of commitments made during the third Ocean Conference	Member States negotiate and adopt a resolution on the modalities for the fourth United Nations Ocean Conference, and preparations commence for the Conference to be held in June 2028

Result 2: accelerating the achievement of Sustainable Development Goal 6 through the 2026 United Nations Water Conference

Programme performance in 2025 and target for 2027

- 9.54 The subprogramme's work contributed to preparatory meetings being held, at which Member States adopted the themes of the six interactive dialogues to be held during the 2026 United Nations Water Conference, which met the planned target.
- 9.55 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.13).

Table 9.13
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
2023 United Nations Water Conference attracted more than 2,000 participants 200 Sustainable Development Goal 6 commitments were registered	United Nations System-wide Strategy for Water and Sanitation was launched in July 2024 General Assembly resolution 78/327 on the modalities for the 2026 United Nations Water Conference to accelerate the achievement of Sustainable Development Goal 6 was adopted	Preparatory meetings were held, and the themes of six interactive dialogues were determined by Member States	The 2026 United Nations Water Conference is held in December on accelerated and collective action to support the achievement of Sustainable Development Goal 6, leaving no one behind	Member States and stakeholders lead the final review of the implementation of the objectives of the International Decade for Action, “Water for Sustainable Development”, 2018–2028, to accelerate implementation of Sustainable Development Goal 6

Result 3: The *Global Sustainable Development Report 2027* guides the implementation of the 2030 Agenda**Proposed programme plan for 2027**

- 9.56 The *Global Sustainable Development Report*, produced by independent scientists, is critical in providing science-based policy recommendations to accelerate the achievement of the Sustainable Development Goals. The subprogramme has supported scientists in finalizing and launching the *Report*, informing Member States of the latest progress on the implementation of the 2030 Agenda.

Lessons learned and planned change

- 9.57 The lesson for the subprogramme was that, compared with previous reports, the *Global Sustainable Development Report 2027* needs to be broader in scope, emphasizing policy utility in different contexts, including developing countries, and open access to science and knowledge building. In applying the lesson, the subprogramme will brief Member States on the development of the *Report*, ensuring that it responds to policy needs for delivery of the Sustainable Development Goals.
- 9.58 Expected progress towards the objective is presented in the performance measure below (see table 9.14).

Table 9.14
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Member States gained access to the <i>Global Sustainable Development Report 2023</i> , providing a critical assessment at the midpoint of implementation of the 2030 Agenda	The <i>Global Sustainable Development Report 2023</i> served as a strategic resource for Member States to shape policymaking, planning, financing and accountability	Member States provided feedback on the plan to prepare the <i>Global Sustainable Development Report 2027</i>	Consultations on the first draft of the <i>Report</i> enable knowledge-sharing and ensure the <i>Report</i> ’s relevance and policy utility	Member States use the <i>Global Sustainable Development Report 2027</i> for science-based policy guidance to achieve the Sustainable Development Goals by 2030

Deliverables

9.59 Table 9.15 lists all deliverables of the subprogramme.

Table 9.15

Subprogramme 3: deliverables for the period 2025–2027, by category and subcategory

8. Training events on strengthening national capacities in all areas of sustainable development for and with national policymakers in developing countries and small island developing States with economies in transition	100	161	80 [100]	80
Publications (number of publications)	–	–	–	1
9. <i>Global Sustainable Development Report</i> (quadrennial report)	–	–	–	1
Technical materials (number of materials)	15	28	15	15
10. On the 2030 Agenda for Sustainable Development	15	28	15	15
C. Substantive deliverables				
Consultation, advice and advocacy: briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings, and materials related to stakeholder engagement in the 2030 Agenda follow-up and review, and on multi-stakeholder partnerships in support of the Sustainable Development Goals.				
Databases and substantive digital materials: public databases on voluntary initiatives, small island developing States, partnerships (8,800 registered), voluntary commitments made during the United Nations Conference to Support the Implementation of Sustainable Development Goals 14 (2,200 registered), Sustainable Development Goals good practices (500 registered), the United Nations system achievement of the Goals, Sustainable Development Goals acceleration actions (460 registered), UN-Energy (200 commitments registered), harmony with nature and other topics of sustainable development and the United Nations system Sustainable Development Goal implementation database.				
D. Communication deliverables				
Outreach programmes, special events and information materials: special meetings and side events on sustainable development issues during major United Nations conferences.				
Digital platforms and multimedia content: redesigned Sustainable Development Website (sdgs.un.org).				

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 9).

^b Deliverables related to the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals are now associated with subprogramme 7.

Subprogramme 4

Statistics

Objective

- 9.60 The objective, to which this subprogramme contributes, is to strengthen the capacity of Member States with regard to the production and use of high-quality, timely, disaggregated, open data and national statistics and geospatial information as a basis on which to inform policy and decision-making for the 2030 Agenda and for other United Nations policy agendas and to review progress at the national and international levels.

Strategy

- 9.61 To contribute to the objective, the subprogramme will:
- (a) Develop, disseminate and support the implementation by Member States of statistical and geospatial information frameworks, standards and methods, especially those related to the Sustainable Development Goals, the Integrated Geospatial Information Framework and other new emerging policy issues;
 - (b) Provide technical assistance and advice to Member States through training on the modernization of statistical information systems, the Integrated Geospatial Information Framework, the use of big data, artificial intelligence and data science, population data systems, environmental-economic accounting, quality assurance, survey instruments and citizen data, to fill data gaps and leave no one excluded from decision-making and policies that affect them;
 - (c) Provide substantive support to United Nations intergovernmental bodies, in particular the Statistical Commission, the Committee of Experts on Geospatial Information Management and the United Nations Group of Experts on Geographical Names, including by preparing reports and convening sessions;
 - (d) Facilitate and expand the coordination and coherence of international statistical and geospatial information programmes and activities by promoting the availability, accessibility and application of geospatial information, including the standardization of geographical names, and better integration of statistical and geospatial information;
 - (e) Cooperate with the resident coordinator system and United Nations country teams in data and statistical activities and their interaction with the global statistical community, including through the Global Network of Data Officers and Statisticians; cooperate closely with other international organizations and establish partnerships with civil society organizations, academia and private sector/non-traditional data providers, including through the platform of the United Nations World Data Forum;
 - (f) Collect, compile and disseminate global statistical information and data in the areas of economic, social, demographic and environmental statistics, including the Sustainable Development Goal indicators, through the use of technology and interoperability standards, such as the Statistical Data and Metadata Exchange;
 - (g) Issue flagship data publications, maintain databases and data platforms and continue to modernize UNdata as a United Nations system-wide portal, and support the development of open data hubs and labs to showcase innovative uses of data, artificial intelligence and data science, and enhance the visualization of data and metadata;
 - (h) Develop and share guidance and information on initiatives, tools and best practices to help national statistics systems to continue to operate and respond to the new specific data needs to address and mitigate the impact of global development challenges on societies, advance responsible, equitable and interoperable data governance approaches, address issues of open

and timely access to critical data needed by Governments and all sectors of society to accelerate the implementation of the 2030 Agenda, and prepare for successor frameworks, such as those associated with “beyond gross domestic product (GDP)” and well-being measurement.

9.62 The above-mentioned work is expected to result in:

- (a) Enhanced quality, availability and access to policy-relevant statistical and geospatial information;
- (b) Increased production and dissemination by Member States of better data and national statistics and geospatial information that are comparable and in line with the adopted updated international frameworks and standards, and provision of enhanced and open access to them;
- (c) Enhanced coordination across international organizations mandated to provide international official statistics, and improved coherence and more effective functioning of the global statistical and geospatial information systems;
- (d) Increased statistical and geospatial information capacity of Member States and the United Nations system.

Programme performance in 2025

Users have improved understanding of migration statistics

9.63 The increasing complexity of international migration presents challenges for statistical measurement and policy formulation. The Global Compact for Safe, Orderly and Regular Migration recognized the importance of data for evidence-based policies. The subprogramme coordinated the revision of the Recommendations on Statistics of International Migration. One of the key recommendations arising from that revision was focused on the implementation of effective communication strategies to improve the use and relevance of migration statistics, with an emphasis on the needs of users of such data, primarily migration policymakers. Based on the recommendations, the subprogramme strengthened its outreach to various stakeholders on issues relating to migration and migrants, fostering dialogue between users and producers of migration statistics at knowledge-sharing and capacity-building events.

9.64 Progress towards the objective is presented in the performance measure below (see table 9.16).

Table 9.16
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	—	Data users have a better understanding of how to use and interpret migration statistics, enabling the formulation of evidence-based policies while reducing the prospect of misinformation and disinformation

Planned results for 2027

Result 1: UNdata modernization: a single entry point for authoritative statistical data from the United Nations system

Programme performance in 2025 and target for 2027

9.65 The subprogramme’s work contributed to an average of 45,983 UNdata user sessions per month, which exceeded the planned target of 42,000.

- 9.66 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 9.II).

Figure 9.II

Performance measure: average number of UNdata user sessions per month

Result 2: improved global capacity for evidence-based Sustainable Development Goals progress monitoring

Programme performance in 2025 and target for 2027

- 9.67 The subprogramme's work contributed to the availability of 165 tier I indicators in the global Sustainable Development Goals indicator database, which met the planned target.
- 9.68 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 9.III).

Figure 9.III

Performance measure: number of tier I indicators in the global Sustainable Development Goals indicator database (cumulative)

Result 3: Member States implement the System of National Accounts 2025

Proposed programme plan for 2027

- 9.69 The Statistical Commission adopted the System of National Accounts 2025 as an international statistical standard, following four years of concerted efforts by the global statistical community to update the System of National Accounts 2008. The System of National Accounts 2025 reflects changes in the global economy and addresses user demands for better information about well-being

and sustainability. In its resolution [2025/12](#), the Economic and Social Council recommended that Member States use the System of National Accounts 2025 in their international reporting, while the Statistical Commission endorsed its implementation strategy, with a 2029–2030 target date. The subprogramme will continue its support to Member States that have not yet implemented the System of National Accounts 2008, which is a prerequisite for the implementation of the System of National Accounts 2025. Given that countries that have not yet implemented the System of National Accounts 2008 face more significant challenges in doing so, supporting them will require more time and greater effort. As a result, it may not be possible to achieve implementation of the System of National Accounts 2008 in more than 17 countries in the reporting period.

Lessons learned and planned change

- 9.70 The lesson for the subprogramme was that the broad and intensive collaboration of all stakeholders enabled the successful updating of the System of National Accounts 2008. In applying the lesson, the subprogramme will use its ability to bring together all stakeholders during the implementation of the System of National Accounts 2025, ensuring that Member States have the capacity to produce national accounts in line with the updated standard.
- 9.71 Expected progress towards the objective is presented in the performance measure below (see figure 9.IV).

Figure 9.IV

Performance measure: number of Member States that have made progress towards the implementation of the System of National Accounts 2025 (cumulative)

Deliverables

- 9.72 Table 9.17 lists all deliverables of the subprogramme.

C. Substantive deliverables

Consultation, advice and advocacy: consultation and advice on economic, demographic and social and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas; and briefings/expert advice to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: UN Comtrade Database, containing over 139 billion trade records with 345, 000 data files, 277,000 registered user accounts and over 6 trillion records downloaded; UNdata platform, containing 99 million records, with approximately 2.3 million users; Global Sustainable Development Goal Indicators Database, containing 3 million data records, with 100,000 users; and databases on cross-cutting statistical areas, with data for more than 200 statistical territories (includes countries and areas).

D. Communication deliverables

Outreach programmes, special events and information materials: outreach, events and information materials on economic, demographic, social and environmental statistics and geospatial information, Sustainable Development Goal indicators and cross-cutting statistical areas.

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 9).

Subprogramme 5 Population

Objective

- 9.73 The objective, to which this subprogramme contributes, is to improve knowledge of global population trends, advance an evidence-based understanding of interaction between population change and sustainable development among policymakers and the public, and strengthen the international community's capacity to effectively address current and emerging population issues and integrate the population dimension into the international development agenda.

Strategy

9.74 To contribute to the objective, the subprogramme will:

- (a) Prepare studies on population growth, population ageing, migration, urbanization, fertility, family planning, mortality and other aspects of population in relation to sustainable development using population estimates and projections, the analysis of demographic trends and the evaluation of population policies;
- (b) Produce comprehensive global data sets on selected topics, as well as reports to highlight these topics and related data, and an annual report on a selected major demographic topic. Data sets will include aggregated results for groups of countries in special situations;
- (c) Provide normative guidance and capacity development on population data and analysis to requesting countries and to United Nations country teams;
- (d) Provide substantive support to United Nations intergovernmental bodies, in particular the Commission on Population and Development, including by preparing reports and convening expert meetings and panels;
- (e) Assist Governments in assessing progress made in implementing the Programme of Action of the International Conference on Population and Development held in 1994, focusing on the global monitoring of Sustainable Development Goal indicators on reproductive health, international migration, child and maternal mortality and population ageing, often in partnership with other entities of the United Nations system;
- (f) Improve the United Nations estimates and projections of the global population and study the interaction of COVID-19 and other global development challenges with demographic phenomena, including mortality, population ageing, fertility and family planning and international migration, and including these analyses, as appropriate, in publications and technical materials.

9.75 The above-mentioned work is expected to result in:

- (a) Improved access to data and reports on population matters for Governments and other users and increased use of the subprogramme's data and findings in the work of stakeholders;
- (b) Increased awareness of population trends and their relationship to sustainable development through accurate data and policy-relevant reports, benefiting Member States and other stakeholders in policy and development planning;
- (c) Advancement in the international community's use of scientifically grounded information about the demographic impacts of the COVID-19 pandemic and other global development challenges.

Programme performance in 2025

National and district population projections produced using internationally recognized probabilistic methods

- 9.76 Accurate subnational demographic data are essential for equitable resource allocation and monitoring of the Sustainable Development Goals. Following the 2024 Population and Housing Census, Uganda requested robust projections to guide its national development plan, implementation of Agenda 2063 of the African Union and implementation of the 2030 Agenda. The subprogramme conducted a technical workshop and advisory mission in June 2025, providing training to 18 national experts in advanced demographic methods. Following international best practices, the training covered the most recent protocols for census evaluation and adjustment, Bayesian probabilistic methods for fertility, mortality and migration, and extensions for subnational applications.
- 9.77 Progress towards the objective is presented in the performance measure below (see table 9.18).

Table 9.18
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
–	–	Uganda produced improved official national and subnational probabilistic population projections in line with international best practices

Planned results for 2027**Result 1: enhanced comparability of estimates and projections of urbanization and spatial distribution for the Sustainable Development Goals****Programme performance in 2025 and target for 2027**

- 9.78 The subprogramme's work contributed to a cumulative total of 61 Member States implementing the new "degree of urbanisation" to enable comparable global urbanization trends, which met the planned target.
- 9.79 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.19).

Table 9.19
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Stakeholders and Member States contributed to methodological advancements in the estimation and projection of urbanization time series	Member States and other stakeholders contributed to the compilation of data on urban and rural populations from the 2020 census round for 106 countries	61 Member States have implemented the new "degree of urbanization" to enable comparable global urbanization trends	Stakeholders and Member States benefit from updated estimates using both national definitions and a globally comparable definition to assess sustainable urbanization	Member States use "degree of urbanization data" in evaluating progress towards Goal 11 for the Sustainable Development Goals Summit

Result 2: enhanced online tools for demographic analysis, projection and visualization**Programme performance in 2025 and target for 2027**

- 9.80 The subprogramme's work contributed to further enhancements to the online demographic analysis and population project platform, which did not meet the planned target of Member States participating in testing of online platforms to inform any further upgrade. The target was not met due to liquidity constraints that prevented the subprogramme from recruiting staff and from engaging with Member States for in-country testing of the platforms. In addition, the release of the World Population Prospects has been postponed from 2026 to 2027 in line with the revised estimates for 2026. This is reflected in the planned target for 2027.
- 9.81 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.20).

Table 9.20
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Development work initiated on online demographic analysis and population projection platforms	Platforms enhanced with data from World Population Prospects 2024	Platforms further enhanced with multilingual support and expanded tools enabling users to adjust census age distributions and compare projection scenarios	Member States have access to fully developed online platforms that incorporate the input and methods of the 2026 revision of World Population Prospects and related training materials ^a	Member States have access to fully developed online platforms that incorporate the input and methods of the 2027 revision of World Population Prospects and related training materials

^a In line with the change in deliverables reported in the revised estimates, the revision of the World Population Prospects has been postponed to 2027.

Result 3: strengthened evidence base on international migration to support policymaking and promote a well-informed public discourse

Proposed programme plan for 2027

- 9.82 Robust estimates of international migration and country capacity to collect data on policy-relevant indicators are critical to monitoring the migration-related targets of the 2030 Agenda and the implementation of the Global Compact for Safe, Orderly and Regular Migration. The subprogramme has released methodologically upgraded estimates of the number of international migrants and co-led the development of a proposed limited set of indicators to support voluntary national reviews of Global Compact progress.

Lessons learned and planned change

- 9.83 The lesson for the subprogramme was that further efforts were needed to apply the new estimation methods for all countries and areas, improve disaggregation of estimates and provide support to countries to report on migration-related Sustainable Development Goals and the implementation of the Global Compact. In applying the lesson, the subprogramme will release updated estimates disaggregated by age, sex, origin and destination, update Goal indicator 10.7.2 and expand capacity-building initiatives.
- 9.84 Expected progress towards the objective is presented in the performance measure below (see table 9.21).

Table 9.21
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	Member States gained access to the 2024 revision of the International Migrant Stock data set and to a proposed limited set of indicators	Member States provided feedback on international migration estimates and requested support for voluntary national reviews of the Global Compact	Member States conduct voluntary national reviews of the Global Compact that include a limited set of indicators	At least six Member States produce and use migration data and indicators

Deliverables

9.85 Table 9.22 lists all deliverables of the subprogramme.

Table 9.22

Subprogramme 5: deliverables for the period 2025–2027, by category and subcategory

16. Reports of expert group meetings on population topics	2	2	1 [2]	1
17. Technical papers on population topics	3	3	2 [3]	2
C. Substantive deliverables				
Consultation, advice and advocacy: briefings and consultations with Member States concerning the annual session of the Commission on Population and Development; and briefings/expert advice to Member States on population and sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.				
Databases and substantive digital materials: databases and data sets on population topics, including documentation.				
D. Communication deliverables				
Outreach programmes, special events and information materials: policy briefs, key messages and information kits on population topics; and special events on population topics.				
External and media relations: press conferences and press releases related to the Commission on Population and Development; press releases to support the launch of major publications or data sets; and responses to requests from Member States, the media, United Nations entities, resident coordinators and other stakeholders.				
Digital platforms and multimedia content: interactive data visualizations and social media and multimedia content on population topics.				

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 9).

Subprogramme 6

Economic analysis and policy

Objective

- 9.86 The objective, to which this subprogramme contributes, is to strengthen national capacities and international policy coordination for identifying and managing short-term macroeconomic risks, to shape medium- and long-term socioeconomic policies for development and to accelerate sustainable development, especially of least developed countries, small island developing States and other countries in special situations.

Strategy

- 9.87 To contribute to the objective, the subprogramme will:
- (a) At the national, regional and global levels, monitor and forecast the macroeconomic situation, focusing on countries in special situations, including the least developed countries, and support Member States in the formulation of global, regional and national policies through expert group meetings, country-level empirical evidence analysis and background studies on short- and long-term economic development thematic issues;
 - (b) Broaden the scope of economic forecasting and simulation tools to assess policy trade-offs in promoting economic growth, while reducing poverty and inequality and enhancing environmental sustainability, in line with the 2030 Agenda;
 - (c) Support the Committee for Development Policy and provide analytical input to the intergovernmental processes related to the least developed countries, as well as to the annual themes of meetings of the Economic and Social Council and of the high-level political forum on sustainable development;
 - (d) Design and implement capacity development activities for a range of countries, including for graduating and recently graduated least developed countries, enhancing capacity for economic planning, monitoring and policymaking;
 - (e) Examine rapid technological change, noting both its constructive and disruptive potential and identifying the strategies and policies necessary to harness its positive potential for achieving sustainable development, while mitigating its possible negative effects;
 - (f) Provide policy guidance and recommendations on selected topics to Member States for recovery from recurrent shocks and challenges, building on the subprogramme's analytical work;
 - (g) Provide analytical input and customized online resources to the resident coordinator system for supporting Member States and for the preparation of common country analyses and United Nations Sustainable Development Cooperation Frameworks, and other pertinent topics;
 - (h) Deliver the substantive leadership and coordination of the United Nations Economists' Network, bringing together United Nations system economists to share perspectives from the local, national, regional and global levels;
 - (i) Maintain the global economic outlook database, the least developed country criteria database, the Support Measures Portal for Least Developed Countries on international support measures and other online resources available to policymakers and other national and international stakeholders;
 - (j) Advance the formulation of a specific response plan, aimed at better addressing the multidimensional nature of sustainable development and facilitating sustainable development cooperation and coordinated and inclusive support to middle-income countries based on their specific challenges and diverse needs.

9.88 The above-mentioned work is expected to result in:

- (a) Greater articulation of short-term macroeconomic stability with long-term development goals, while advancing the achievement of the Sustainable Development Goals, through the improved integration of economic, social and environmental priorities into national development plans and strategies;
- (b) Improved awareness among Member States of the multilateral efforts and economic policy options necessary for a sustainable recovery from recurrent shocks and challenges, consistent with the 2030 Agenda;
- (c) Improved information basis for the Committee for Development Policy and the Economic and Social Council when assessing and recommending least developed countries for graduation;
- (d) Enhanced awareness and knowledge of Member States and the international community of the development trajectory of the least developed countries, their risks and challenges and the specific support options;
- (e) Increased capacity of Member States to effectively use international support measures, prepare for graduation from the least developed country category and ensure the stability of their development progress and the realization of the 2030 Agenda;
- (f) Enhanced collaboration, coordination and efficacy of the United Nations development system, which will provide a more coherent cooperation framework towards the implementation of the 2030 Agenda and bolster sustainable development at the country level.

Programme performance in 2025

Improved digital tools to strengthen government officials' knowledge of macroeconomics and trade

- 9.89 Digital tools are increasingly vital for strengthening policymaking and trade promotion, as they enable Member States to access timely information, conduct integrated assessments and build capacity for sustainable development. In 2025, the provision of support through digital tools, complementing in-person training and capacity-building, became essential as a cost-effective solution amid unexpected resource constraints at the United Nations and heightened uncertainty in the global trading system. The subprogramme assisted Member States by developing online courses on the overlapping generations model and the climate, land, energy and water systems model, enhancing their ability to analyse complex interlinkages across macroeconomic, microeconomic and resource management frameworks. In addition, the subprogramme facilitated the use of the upgraded mobile application-based ePing alert system, which provides Governments and stakeholders with real-time notifications on trade-related measures. These efforts contributed to more coherent policymaking, greater transparency and stronger engagement in international trade processes.
- 9.90 Progress towards the objective is presented in the performance measure below (see table 9.23).

Table 9.23
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
—	—	The overlapping generations model was applied for country-level policy analysis Workshop participants in Indonesia, the Philippines and South Africa developed policy simulations aligned with national priorities, which then informed policy notes, analytical papers and a draft tax reform assessment report

Planned results for 2027

Result 1: use of advanced policy simulation tools for data-driven and evidence-informed policymaking

Programme performance in 2025 and target for 2027

- 9.91 The subprogramme's work contributed to 34 countries conducting quantitative assessments for coherent policymaking on sustainable development, which did not meet the planned target of 36. The target was not met because the subprogramme, based on country demand, focused on introducing additional features to the existing simulation tools in countries that had already conducted the assessments.
- 9.92 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 9.V).

Figure 9.V

Performance measure: number of countries conducting quantitative assessments for coherent policymaking on sustainable development (cumulative)

Result 2: increased engagement and use of analytical products for evidence-based policymaking
Programme performance in 2025 and target for 2027

- 9.93 The subprogramme's work contributed to stakeholders engaging in consultations on key analytical products, which did not meet the planned target of Member States and stakeholders engaging in consultations on key analytical products. The target was not met due to liquidity-related constraints, which limited the subprogramme's ability to convene and facilitate the envisaged consultations with Member States.
- 9.94 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.24).

Table 9.24

Performance measure

<i>2023 (actual)</i>	<i>2024 (actual)</i>	<i>2025 (actual)</i>	<i>2026 (planned)</i>	<i>2027 (planned)</i>
–	Stakeholders engaged through the Economic and Social Council and in collaboration with the Dag Hammarskjöld Library, United Nations University and United Nations Academic Impact	Engagement with various stakeholders continued However, consultations with Member States on key analytical products could not take place	Member States and stakeholders use insights from analyses of key global challenges and development issues to inform discussions and drive policymaking	United Nations Sustainable Development Cooperation Frameworks and common country analyses take into account global analysis and recommendations

Result 3: least developed countries are prepared to navigate the graduation process and post-graduation landscape

Proposed programme plan for 2027

- 9.95 Sustainable graduation from the least developed countries category is essential to ensure that development gains are preserved and that countries continue to maintain the stability of their development progress after graduation. The Committee for Development Policy triennial review process, which identifies graduation eligibility, and the Committee's enhanced monitoring mechanism for graduating and graduated countries provide a coherent and long-term framework for Member States to ensure sustainable graduation. The subprogramme has strengthened Member States' knowledge on this topic and their policymaking capacity by improving data accuracy, enhancing economic analysis and fostering deeper engagement with the countries concerned.

Lessons learned and planned change

- 9.96 The lesson for the subprogramme was that greater emphasis is needed on early engagement with potentially graduating countries and on tailoring analytical support to their specific development contexts and economic structures. This requires complex analysis of development data and processes, as well as meaningful dialogue with national stakeholders to ensure ownership and effective follow-up. In applying the lesson, the subprogramme will continue to customize its approach to forecasting and its policy recommendations on structural transformation to the needs of graduating countries and will continue to support those countries in developing the skills to manage and analyse their own data for future analysis post-graduation.
- 9.97 Expected progress towards the objective is presented in the performance measure below (see figure 9.VI).

Figure 9.VI

Performance measure: number of countries that develop a strategy or assessment to navigate the graduation process (cumulative)

Deliverables

9.98 Table 9.25 lists all deliverables of the subprogramme.

--------------------------	-----------------	----------------	------------------------------	-----------------

C. Substantive deliverables

Consultation, advice and advocacy: policy advice on economic thematic issues and/or economic national situations to Member States on sustainable development issues, including high-level bilateral consultations and intergovernmental meetings.

Databases and substantive digital materials: ePing, an online platform with approximately 28,000 registered users, covering 193 countries; Support Measures Portal for Least Developed Countries on international support measures; least developed country data and impact assessments (3 online databases, covering 142 countries and 26 years of data); modelling tools for sustainable development policies; and global economic outlook database.

D. Communication deliverables

External and media relations: 2 global and 5 regional press releases on the world economic situation.

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 9).

Subprogramme 7 Institutions and digital transformation

Objective

- 9.99 The objective, to which this subprogramme contributes, is to advance effective, accountable and inclusive governance and institutions for sustainable development and to accelerate digital transformation.

Strategy

- 9.100 To contribute to the objective, the subprogramme will:
- (a) Service the Committee of Experts on Public Administration, including by organizing expert meetings; preparing analytical papers and technical guidelines to operationalize the principles of effective governance for sustainable development, developed by the Committee and endorsed by the Economic and Social Council in 2018, together with all relevant stakeholders; and providing input on issues related to governance and public administration to the meetings of the Council and the high-level political forum on sustainable development;
 - (b) Play a central role in inter-agency coordination mechanisms in the area of science, technology and innovation;
 - (c) Promote policy guidance on innovation, digital government and digital transformation, including the use of artificial intelligence, for the Sustainable Development Goals through the United Nations E-Government Survey, monitor global developments on institutional dimensions covered by Goals 16 and 17 and review national institutional arrangements for the achievement of the Goals, with a specific focus on countries in special situations, and in direct support of the follow-up on and review of the 2030 Agenda;
 - (d) Foster policy dialogue and advocacy for the implementation of the outcomes of the World Summit on the Information Society and facilitate the implementation of and follow-up on its assigned action lines, namely, C1 (the role of Governments and all stakeholders in the promotion of information and communications technology (ICT) for development), C7 (ICT applications: benefits in all aspects of life (e-government)) and C11 (international and regional cooperation);
 - (e) Facilitate multi-stakeholder policy dialogue on Internet governance, including discussion of public policy issues related to key elements of Internet governance, such as interoperable data governance approaches, digital inclusion and data protection (General Assembly resolution 70/125, para. 63), and shape policy decisions at the global, national and local levels by supporting the annual meeting of the Internet Governance Forum and intersessional activities;

- (f) Coordinate the work of the Technology Facilitation Mechanism, including the multi-stakeholder forum on science, technology and innovation for the Sustainable Development Goals; the United Nations Group of 10 High-level Representatives of Civil Society, the Private Sector and the Scientific Community to Promote Science, Technology and Innovation for the Sustainable Development Goals; and the online platform on existing science, technology and innovation initiatives (2030 Connect);
- (g) Expand capacity development to respond to Member States' requests for technical cooperation on strengthening their governance, public institutions and human resources capacities in alignment with the decade of action and delivery for sustainable development, including through partnerships with regional commissions and the resident coordinator system and increased efforts to support international peer exchanges on effective governance for sustainable development;
- (h) Expand work on equipping the public sector workforce with the capacities to realize the 2030 Agenda and the Pact for the Future, which includes developing and piloting new methodologies on leadership and changing mindsets, institutional arrangements for policy coherence, transparency and integrity in the public service, strategic foresight, digital government and interoperable data governance approaches, and innovation for public service delivery, with an emphasis on countries in special situations, in collaboration with the resident coordinator system;
- (i) Support Member States in promoting innovation in public governance through follow-up mechanisms to the United Nations Public Service Day Awards Ceremony and Forum, such as peer-to-peer learning for the transfer and adaptation of innovative practices, including on gender-sensitive analysis, and through the United Nations Public Administration Network;
- (j) Support supreme audit institutions on auditing Sustainable Development Goals achievement by providing analytical work, expert advice, technical assistance and capacity-building, on the basis of existing demand for support by groups of the International Organization of Supreme Audit Institutions;
- (k) Promote and leverage public governance innovative practices and digital government strategies action plans and road maps.

9.101 The above-mentioned work is expected to result in:

- (a) Enhanced awareness and knowledge of emerging governance and public administration issues at the national and subnational levels and countries contextualizing institutional aspects of their voluntary national reviews so that Member States can develop their capacities to promote effective governance for sustainable development in a dynamic international context;
- (b) Increased capacities of Member States to build effective, accountable and inclusive institutions at all levels to achieve the Sustainable Development Goals and deliver on the Pact for the Future;
- (c) Increased capacity of Member States in designing and implementing effective and inclusive digital government policies, strategies and services to improve people's lives at all levels of government;
- (d) Improved capacities of public servants to deliver services to people in areas such as health and education, justice, social protection and employment, focusing on professionalization of the public sector workforce, an ethical, responsive and ICT-enabled public administration and progress towards gender equality in the public sector;
- (e) Increased use of science and technology to leverage their full potential for the achievement of the Sustainable Development Goals by Member States and other stakeholders;
- (f) Adjustments by Member States at the structural, organizational and programme levels to accelerate Sustainable Development Goals delivery;
- (g) Adoption of digital government strategies to build resilient societies and close digital divides.

Programme performance in 2025

Supreme audit institutions assessed the implementation of Sustainable Development Goal 13 on climate action

- 9.102 Supreme audit institutions are uniquely positioned to strengthen climate action under Sustainable Development Goal 13 through independent audits and assessments. The subprogramme provided technical assistance to 18 supreme audit institutions, led by the Federal Court of Accounts of Brazil, to develop a standardized methodology and web-based tool, ClimateScanner, for assessing government actions and progress in addressing adverse impacts of climate change. This included peer learning among supreme audit institutions, experience-sharing on auditing climate action and discussions of the roll-out of these assessments, which involved auditors from several countries, including least developed countries and small island developing States. The assessments identified constraints, key risks and priority areas in governance, finance and public policy related to climate change. The findings are aimed at helping Governments to improve climate action and at accelerating the implementation of Goal 13 at the national level. The results were presented at the Conference of the Parties to the United Nations Framework Convention on Climate Change in 2024 and 2025.
- 9.103 Progress towards the objective is presented in the performance measure below (see figure 9.VII).

Figure 9.VII

Performance measure: number of assessments conducted by supreme audit institutions on government actions to address adverse impacts of climate change (cumulative)

Planned results for 2027

Result 1: national implementation of the principles of effective governance for sustainable development to enhance trust in public institutions

Programme performance in 2025 and target for 2027

- 9.104 The subprogramme's work contributed to public officials utilizing the principles of effective governance for sustainable development and associated tools to perform their functions, which met the planned target.
- 9.105 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.26).

Table 9.26
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Public officials at the national level promoted effective localization	Public officials raised awareness of accountability, transparency and inclusiveness in building effective governance systems, and integrated the assessment of those aspects into monitoring and evaluation systems	Approximately 150 public officials utilized the principles of effective governance for sustainable development and associated tools to perform their functions	Public officials increase their capacity for institutional collaboration for sound policymaking in support of the 2030 Agenda	Approximately 250 public officials and institutions at all levels apply the principles of competence to perform their functions effectively

Result 2: efficient and resilient response to future challenges and opportunities to accelerate sustainable development

Programme performance in 2025 and target for 2027

- 9.106 The subprogramme's work contributed to public officials cultivating a foresight-driven organizational culture and used foresight and systems thinking insights for decision-making to achieve the Sustainable Development Goals, which met the planned target.
- 9.107 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.27).

Table 9.27
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Public officials acquired knowledge and competencies on strategic planning and foresight	Public officials implemented institutional reforms for long-term strategic planning and multi-stakeholder engagement, formulating national development plans and promoting the presence and leadership of women within public institutions	Approximately 265 trained public officials cultivated a foresight-driven organizational culture and used foresight and systems thinking insights for decision-making to achieve the Sustainable Development Goals	Public officials shift mindsets towards strategic foresight to enhance anticipatory governance	Public officials apply strategic foresight and systems thinking methodologies to inform policy and planning decisions and support their consistent use across government

Result 3: public officials apply behavioural insights and adopt good practices to advance innovation and digital transformation

Proposed programme plan for 2027

- 9.108 Rapid technological, social and institutional changes continue to shape the demands placed on public institutions, which underscores the need for more innovative technological tools to improve public services. The subprogramme has prepared analytical products and conducted capacity development activities to enable public officials to accelerate innovation and use digital tools to modernize public services.

Lessons learned and planned change

- 9.109 The lesson for the subprogramme was that efforts to introduce innovation and digital tools in public institutions lead to lasting results only when they are paired with intentional changes in how the institutions operate, including change in organizational culture. Reforms are also effective when guidance is tailored to each setting and considers both technical solutions and organizational practices. In applying the lesson, the subprogramme will place greater emphasis on understanding how people and organizations actually behave and expand customized tools and peer-learning opportunities to better respond to the changing needs of Member States.
- 9.110 Expected progress towards the objective is presented in the performance measure below (see figure 9.VIII).

Figure 9.VIII

Performance measure: number of trained public officials who apply behavioural insights, innovation and digital transformation good practices to improve public service delivery

Deliverables

- 9.111 Table 9.28 lists all deliverables of the subprogramme.

Table 9.28

C. Substantive deliverables

Consultation, advice and advocacy: briefings/expert advice to Member States on governance and public administration aspects of sustainable development, including consultations and intergovernmental meetings; and knowledge-sharing and networks, including the United Nations Public Administration Network, a global network (more than 30 members and 5,000 users) that connects relevant international, regional, subregional and national institutions and experts worldwide working on effective governance for sustainable development in line with Sustainable Development Goals 16 and 17.

Category and subcategory	2025 planned	2025 actual	2026 planned ^a	2027 planned
--------------------------	-----------------	----------------	------------------------------	-----------------

Databases and substantive digital materials: databases, including the United Nations Public Service Innovation Hub, with more than 350 good practices in public administration innovation at the national and subnational levels, the e-government knowledge base, covering 193 Member States and the most populous cities in each Member State, and the public database on the Technology Facilitation Mechanism, including 2030 Connect.

D. Communication deliverables

Outreach programmes, special events and information materials: United Nations Public Administration Network newsletter; social media content and alerts; and virtual and in-person outreach activities on major deliverables.

Digital platforms and multimedia content: subprogramme websites, including of the United Nations Public Administration Network, the Division for Public Institutions and Digital Government, the United Nations Project Office on Governance and the Internet Governance Forum.

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in [A/80/6 \(Sect.9\)](#).

Subprogramme 8 Sustainable forest management

Objective

- 9.112 The objective, to which this subprogramme contributes, is to ensure the effective implementation of sustainable management of all types of forests at all levels in accordance with the United Nations Strategic Plan for Forests 2017–2030.

Strategy

- 9.113 To contribute to the objective, the subprogramme will:
- (a) Support the intergovernmental forest policy dialogue through the United Nations Forum on Forests, in accordance with the strategic plan, the quadrennial programme of work (2025–2028) and the outcomes of the nineteenth session of the Forum, including the 2024 midterm review of the effectiveness of the International Arrangement on Forests, and coordinate the Forum's input to the high-level political forum on sustainable development;
 - (b) Advance coordination and cooperation with relevant United Nations entities, member organizations of the Collaborative Partnership on Forests and other stakeholders;
 - (c) Develop the online clearinghouse of the Global Forest Financing Facilitation Network and assist countries and partners in designing forest financing strategies, facilitating access to financing and assisting Member States in mobilizing resources for sustainable forest management;
 - (d) Place an emphasis on the special needs and circumstances of Africa, the least developed countries, countries with low forest cover, countries with high forest cover, countries with medium forest cover and low deforestation and small island developing States, as well as countries with economies in transition (Economic and Social Council resolution [2017/4](#), para. 63);
 - (e) Advance the implementation of the United Nations Strategic Plan for Forests 2017–2030, including through assisting countries in developing a robust national reporting format for the submission of national reports to the United Nations Forum on Forests, preparing the second *Global Forest Goals Report* and implementation of the strategic plan's communication and outreach strategy;

- (f) Support common country analyses, which inform the United Nations Sustainable Development Cooperation Framework, thereby providing resident coordinators with the tools to tailor their responses to countries' specific needs and priorities and to support the implementation of the 2030 Agenda, including through national implementation of sustainable forest management;
- (g) Support Member States, as appropriate, on issues related to sustainable forest management, through its normative work, technical assistance and capacity-building activities, including the international policy dialogue on the integration of sustainable forest management into decision-making processes concerning land use planning and development, in line with United Nations Forum on Forests resolutions.

9.114 The above-mentioned work is expected to result in:

- (a) Strengthened political commitment and action for sustainable forest management, leading to increased contributions by forests to Sustainable Development Goals achievement, including on climate change, biodiversity, land and greater integration of forests into national sustainable development plans and poverty reduction strategies;
- (b) Improved capacity of eligible countries to mobilize and gain access to financing for sustainable forest management, and improved information on and access to existing and emerging multilateral and other funding sources and data;
- (c) Member States' progress towards achieving the Global Forest Goals and the forest-related Sustainable Development Goals;
- (d) Increased awareness among Member States of the benefits of forests based on the 2027 theme of the International Day of Forests, and on highlighting the interdependent role of forests in enabling the world to meet the Sustainable Development Goals that will be reviewed during the 2027 high-level political forum on sustainable development.

Programme performance in 2025

Member States commence implementation of the new quadrennial programme of work (2025–2028) to accelerate the United Nations Strategic Plan for Forests

9.115 The adoption of the quadrennial programme of work for the period 2025–2028 is critical to the implementation of the United Nations Strategic Plan for Forests 2017–2030 because it will ensure that global forest policy aligns with the Sustainable Development Goals. The subprogramme provided technical assistance and specialized expertise to Member States, identifying priority areas regarding issues of global concern for forests. These contributions facilitated Member States' deliberations, enabling the alignment of national initiatives and resources with the priorities for the period 2025–2028.

9.116 Progress towards the objective is presented in the performance measure below (see table 9.29).

Table 9.29

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
–	Member States adopted the quadrennial programme of work for the period 2025–2028 following the midterm review of the International Arrangement on Forests, establishing a road map for policy dialogue and priority actions	Member States implemented the new quadrennial programme of work, aligning national actions and resource mobilization efforts with the priorities for the period 2025–2028

Planned results for 2027

Result 1: increased reach of the United Nations Forum on Forests and contribution of forests to the 2030 Agenda

Programme performance in 2025 and target for 2027

- 9.117 The subprogramme's work contributed to stakeholders accessing relevant information on forest-related issues, which did not meet the planned target of Member States exchanging best practices and accessing new communications products to raise awareness on the social, economic and environmental benefits of forests. The target was not met due to liquidity constraints that prevented the subprogramme from hiring specialized consultants for website migration and the development of multimedia products. Subsequently, the digital infrastructure required for interactive exchange was unavailable, limiting the subprogramme's ability to raise awareness on the benefits of forests.
- 9.118 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.30).

Table 9.30

Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
Member States had access to communications products with user-friendly design and functionality on issues related to forests and health, forest fires, and the contributions of forests to sustainable energy and livelihoods	Member States had access to best practices and relevant information through the redesigned website of the Forum, including social media products to raise awareness on the benefits of forests	Member States' ability to exchange best practices and access new communications products to raise awareness on the social, economic and environmental benefits of forests was limited due to liquidity constraints	Member States exchange best practices and access new communication products on the multiple benefits of forests and trees beyond the forest sector, and on the important role of people in vulnerable situations, including Indigenous Peoples, and women and girls	Member States integrate communications products and best practices into national forest awareness campaigns

Result 2: advancement of the Sustainable Development Goals through the United Nations Strategic Plan for Forests 2017–2030

Programme performance in 2025 and target for 2027

- 9.119 The subprogramme's work contributed to Member States and forest stakeholders accelerating action on forests, addressing climate change, biodiversity loss and sustainable development, which met the planned target.
- 9.120 Progress towards the objective and the target for 2027 are presented in the performance measure below (see table 9.31).

Table 9.31

Performance measure

<i>2023 (actual)</i>	<i>2024 (actual)</i>	<i>2025 (actual)</i>	<i>2026 (planned)</i>	<i>2027 (planned)</i>
Member States and forest stakeholders discussed the interlinkages of forests and the Sustainable Development Goals, climate, biodiversity and land	Member States and forest stakeholders highlighted the significance of forests during meetings of the conferences of parties of the Rio Conventions, and the Collaborative Partnership on Forests governing bodies	Member States and forest stakeholders accelerated action on forests, addressing climate change, biodiversity loss and sustainable development, including through the Collaborative Partnership on Forests joint initiative on integrated fire management and by scaling up forest financing	Member States and forest stakeholders build political momentum on forests and their contributions to sustainable development through the adoption of a resolution at the twenty-first session of the United Nations Forum on Forests	Member States and forest stakeholders translate the resolution adopted at the twenty-first session into concrete actions to accelerate progress towards the Global Forest Goals and strengthen multi-stakeholder collaboration on climate and biodiversity

Result 3: strengthened commitment and action by the International Arrangement on Forests to achieve the Global Forest Goals

Proposed programme plan for 2027

- 9.121 The United Nations Forum on Forests, the central pillar of the International Arrangement on Forests, oversees implementation of the United Nations Strategic Plan for Forests 2017–2030. The subprogramme supported Member States in reviewing and assessing their progress in implementation of the Plan. A key element of this assessment is the voluntary national reports submitted by Member States through an online reporting platform.

Lessons learned and planned change

- 9.122 The lesson for the subprogramme was that despite the launch of the online reporting platform in early 2025, few voluntary national reports have been submitted due to national capacity constraints on collecting forest-related data. Given that these submissions inform the *Global Forest Goals Report*, it is important that many more Member States provide information on their country-specific progress. In applying the lesson, the subprogramme will provide training to Member States on collecting forest-related data from their national statistical systems and entering such data into the platform and facilitate platform use, ensuring a more robust data set for the final review in 2030.
- 9.123 Expected progress towards the objective is presented in the performance measure below (see table 9.32).

Table 9.32
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
—	—	Member States assessed progress in implementing the United Nations Strategic Plan for Forests, though fewer than 50 voluntary national reports were submitted via the new online platform	Member States identify specific national capacity gaps in data collection following the 2026 national reporting exercise and publication of the <i>Global Forest Goals Report</i>	Member States assess data gaps and are able to collect forest-related data from their national statistical systems to inform preparations for the 2030 reporting cycle

Deliverables

9.124 Table 9.33 lists all deliverables of the subprogramme.

Table 9.33

^a Reflects updated planned deliverables for 2026. Values in square brackets represent the number of planned deliverables reflected in A/80/6 (Sect. 9).

Subprogramme 9 Financing for sustainable development

Objective

- 9.125 The objective, to which this subprogramme contributes, is to advance the follow-up on and review of the implementation of the outcomes of the International Conferences on Financing for Development, including the Sevilla Commitment, and the delivery of the means of implementation of the 2030 Agenda.

Strategy

- 9.126 To contribute to the objective, the subprogramme will:
- (a) Promote and support the follow-up to the agreements and commitments reached at the Fourth International Conference on Financing for Development;
 - (b) Build on continuing analytical work in collaboration with the Inter-Agency Task Force on Financing for Development and prepare the annual *Financing for Sustainable Development Report*, and other reports for the Economic and Social Council forum on financing for development follow-up and for Second Committee and other deliberations;
 - (c) Support reform to the international financial architecture, including the sovereign debt and development cooperation architecture, and support the development of principles of responsible borrowing and lending, inclusive dialogue on sovereign debt solutions and credit ratings, and capacity development;
 - (d) Support the revitalized Development Cooperation Forum in its review of trends, progress and emerging issues in international development cooperation, with a view to promoting global knowledge-sharing and learning, enhancing the coherence, effectiveness, accountability and impact of development cooperation and providing policy guidance and recommendations; and support countries in designing and implementing integrated national financing frameworks through the Integrated National Financing Framework Facility;
 - (e) Scale up investment for the Sustainable Development Goals with concrete solutions, building on the work of the Global Investors for Sustainable Development Alliance, including through the Sustainable Development Goals Investment Fair, enabling engagement between Member States and investors, along with capacity development for developing investable projects and country platforms and for improving infrastructure asset management;

- (f) Support Member States in norm-setting for international tax cooperation and in improving domestic resource mobilization to enhance progress towards the Sustainable Development Goals, thereby enhancing tax policies and administration and addressing tax evasion, aggressive tax avoidance and illicit financial flows; provide policy support to expert bodies and intergovernmental processes, including the Intergovernmental Negotiating Committee on the United Nations Framework Convention on International Tax Cooperation, along with capacity-building to foster more inclusive and effective international tax cooperation.

9.127 The above-mentioned work is expected to result in:

- (a) Policy and action on financing for sustainable development through a strengthened analytical foundation and inclusive dialogue, including in the area of sovereign debt, for the outcomes of the Economic and Social Council forum on financing for development follow-up and Second Committee deliberations;
- (b) Enhanced coherence, effectiveness and accountability of international development cooperation through the use, by Governments and stakeholders, of policy guidance and recommendations for the effective implementation of the 2030 Agenda, the Sevilla Commitment, the Paris Agreement and the Sendai Framework; countries designing and using integrated national financing frameworks, including actionable policy options, to mobilize financing for sustainable development;
- (c) Accelerated mobilization of resources for the Sustainable Development Goals, leading to greater investment opportunities with positive impacts, including in countries in special situations;
- (d) Improved solutions at all levels for strengthening international tax cooperation, including through the United Nations framework convention on international tax cooperation and its two protocols, improving domestic resource mobilization and more effective implementation by Governments and other stakeholders of United Nations norms, policy and practical guidance on tax matters.

Programme performance in 2025

A new financing framework, the Sevilla Commitment, adopted as a follow-up to the Addis Ababa Action Agenda

9.128 At the Fourth International Conference on Financing for Development, the Sevilla Commitment was adopted as a follow-up to the Addis Ababa Action Agenda, with a view to strengthening international cooperation to mobilize financing for sustainable development and accelerate progress towards the Sustainable Development Goals. The subprogramme supported Member States in advancing the intergovernmental process and provided substantive and organizational support to the Conference and the sessions of its preparatory committee, including analytical inputs and logistical, administrative and substantive services. These efforts facilitated inclusive and substantive engagement among Member States on the Sevilla Commitment. Moreover, Member States agreed on policy commitments and follow-up mechanisms that were reflected in the Sevilla Commitment, including new high-level meetings on financial integrity and credit ratings.

9.129 Progress towards the objective is presented in the performance measure below (see table 9.34).

Table 9.34
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)
Member States launched the intergovernmental process for the Fourth International Conference on Financing for Development	Member States advanced substantive preparations for the Fourth International Conference on Financing for Development by convening preparatory committee sessions; discussions were focused on action areas to inform the intergovernmental negotiations	At the Fourth International Conference on Financing for Development, Member States adopted the Sevilla Commitment (General Assembly resolution 79/323) Member States further committed to ensuring that the outcomes of the Conference are considered at the Economic and Social Council Forum on financing for development follow-up

Planned results for 2027

Result 1: strengthened engagement of Member States in the financing for development follow-up process to improve coherence and implementation of agreed outcomes

Programme performance in 2025 and target for 2027

- 9.130 The subprogramme's work contributed to 187 countries participating in the intergovernmental follow-up process to the international conferences on financing for development, which exceeded the planned target of 120 countries. Given that the increase in the number of countries participating in the intergovernmental follow-up process in 2025 was specifically due to the Fourth International Conference on Financing for Development, the planned target for 2027 is lower than the actual number of countries participating in 2025 because the other intergovernmental follow-up processes that have a similar scale and attendance are expected to take place after 2027.
- 9.131 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 9.IX).

Figure 9.IX

Performance measure: number of countries participating in the intergovernmental follow-up process to the international conferences on financing for development (annual)

Result 2: enhanced engagement of developing countries in shaping international tax norms**Programme performance in 2025 and target for 2027**

- 9.132 The subprogramme's work contributed to 56 developing countries engaging in shaping international tax norms in the work of the Intergovernmental Negotiating Committee on the United Nations Framework Convention on International Tax Cooperation, which exceeded the planned target of 45 countries.
- 9.133 Progress towards the objective and the target for 2027 are presented in the performance measure below (see figure 9.X).

Figure 9.X

Performance measure: number of developing countries engaging in shaping international tax norms (cumulative)

**Result 3: international debt architecture is operationalized****Proposed programme plan for 2027**

- 9.134 Debt challenges continue to be a constraint on sustainable development. In 2025, Member States adopted an ambitious package of debt actions in the Sevilla Commitment, complemented by debt initiatives set out in the Sevilla Platform for Action. The subprogramme supported this agenda, coordinating a system-wide follow-up, including through a working group on responsible borrowing and lending principles, the United Nations dialogue on debt and the Sevilla Forum on Debt.

Lessons learned and planned change

- 9.135 The lesson for the subprogramme was that progress on debt requires sustained engagement with relevant stakeholders through analytical, convening and capacity-building functions. In applying the lesson, the subprogramme will strengthen the link between these functions. It will provide support to the working group and the intergovernmental dialogues on debt and support debt initiatives under the Sevilla Platform for Action.
- 9.136 Expected progress towards the objective is presented in the performance measure below (see table 9.35).

Table 9.35
Performance measure

2023 (actual)	2024 (actual)	2025 (actual)	2026 (planned)	2027 (planned)
–	Member States and other stakeholders provided input on debt to inform the elements paper for the Fourth International Conference on Financing for Development outcome document	Member States adopted a package of debt actions at the Fourth International Conference on Financing for Development	Member States commence the implementation of the debt package, including consultations on responsible borrowing and lending principles	Consolidated responsible borrowing and lending principles are finalized, with five jurisdictions committing to incorporating them into national legislation

Deliverables

9.137 Table 9.36 lists all deliverables of the subprogramme.
